One Million Things Animal Life ,2009-06-15 Everything you want to know, see and find out about animals A visually amazing encyclopedia all about animals. Crammed full of incredible stuff to dip into, from cool crustaceans to amazing arachnids, all revealed in a fascinating, exciting, totally different way: it's like a natural history museum, a search engine and the world's biggest zoo all rolled into one. Loads of animal-related topics, hundreds of pictures, thousands of words and squillions of amazing things to discover and explore. So Find it. See it. Know it.

Canine Confidential Marc Bekoff,2018-04-13 Get to know your best friend better: “Everyone who owns a dog, breeds or trains dogs, or works with dogs should read this informative book.” —Library Journal Just think about the different behaviors you see at a dog park. We have a good understanding of what it means when dogs wag their tails—but what about when they sniff and roll on a stinky spot? Why do they play tug-of-war with one dog, while showing their bellies to another? Why are some dogs shy, while others are bold? What goes on in dogs’ heads and hearts—and how much can we know and understand? Written by award-winning scientist—and lifelong dog lover—Marc Bekoff, *Canine Confidential* not only brilliantly opens up the world of dog behavior, but also helps us understand how we can make our dogs’ lives better. Rooted in the most up-to-date science on cognition and emotion—fields that have exploded in recent years—*Canine Confidential* is a wonderfully accessible treasure trove of new information and myth-busting. Peeing, we learn, isn’t always marking; grass-eating isn’t always an attempt to trigger vomiting; it’s okay to hug a dog—on their terms; and so much more. There’s still much we don’t know, but at the core of the book is the certainty that

dogs do have deep emotional lives, and that as their companions and trainers we must recognize them as the unique, complex individuals they are—so we can keep them as happy and healthy as possible.

“Bekoff shares his own studies and others’ research, along with real-life stories, in a winning tone.” —Booklist

The Magic of Touch Viktor Reinhardt, Annie Reinhardt, 2017

Indifference Naisargi N. Davé, 2023-06-30 In *Indifference*, Naisargi N. Davé examines the complex worlds of animalists and animalism in India. Through ethnographic fieldwork with animal healers, animal activists, farmers, laborers, transporters, and animals themselves, and moving across animal shelters and dairy farms to city streets and abattoirs, Davé shows how human-animal relations often manifest through care and violence. More surprisingly, what Davé also finds animating interspecies relationality in India is an ethic of indifference--that is, an orientation of mutual regard rather than curiosity, love, desire, or animus. For Davé, indifference is a respect for others in their otherness that allows human and nonhuman animals to flourish in immanent encounters. Indifference, then, becomes the basis for an interspecies ethics and a method of care and practice in everyday life. With indifference, Davé describes both a mode of relationality in the world and a scholarly approach: seeking what is possible when we approach ethico-political concepts with indifference rather than commitment or antagonism. Moments of indifference, Davé contends, offer the promise of otherwise worlds.

The Travelling Vet Jonathan Cranston, 2018-11-01 Jonathan Cranston is no ordinary vet. In addition to his day job in the Gloucestershire countryside treating cows, dogs, pigs and cats, he's also worked with an astonishing range of species around the world, including crocodiles, rhinos and pandas. In this charming collection he

introduces us to some of his favourite patients, ranging from beloved family pets through to magnificent creatures of the wild. Whether microchipping armadillos, anaesthetising giraffes or birthing a calf, Jonathan's love for his work and the entire animal kingdom is infectious. From the preposterous (castrating a sugar glider) to the poignant (encountering victims of rhino poaching), the stories in *The Travelling Vet* will delight and enthrall every animal lover.

Nature and Outdoor Life ...: Sports and games. Pets and hobbies
,1927

Dog Is Love Clive D. L. Wynne,2019 A pioneering canine behaviorist draws on cutting-edge research to show that a single, simple trait--the capacity to love--is what makes dogs such perfect companions for humans, and to explain how we can better reciprocate their affection.

Pets and People Christine Overall,2017-02-01 Animal ethics is generating growing interest both within academia and outside it. This book focuses on ethical issues connected to animals who play an extremely important role in human lives: companion animals (pets), with a special emphasis on dogs and cats, the animals most often chosen as pets. Companion animals are both vulnerable to and dependent upon us. What responsibilities do we owe to them, especially since we have the power and authority to make literal life-and-death decisions about them? What kinds of relationships should we have with our companion animals? And what might we learn from cats and dogs about the nature and limits of our own morality? The contributors write from a variety of philosophical perspectives, including utilitarianism, care ethics, feminist ethics, phenomenology, and the genealogy of ideas. The eighteen chapters are divided into two sections, to provide a general background to ethical debate about

companion animals, followed by a focus on a number of crucial aspects of human relationships to companion animals. The first section discusses the nature of our relationships to companion animals, the foundations of our moral responsibilities to companion animals, what our relationships with companion animals teach us, and whether animals themselves can act ethically. The second part explores some specific ethical issues related to crucial aspects of companion animals' lives--breeding, reproduction, sterilization, cloning, adoption, feeding, training, working, sexual interactions, longevity, dying, and euthanasia.

Run, Spot, Run Jessica Pierce, 2016-05-06 44. Enriching Animals' Lives -- 45. Which Animals Should Be Pets? -- 46. Offering Better Protection -- 47. Speaking for Spot -- 48. So, Is Pet Keeping Ethical? -- Notes -- Bibliography -- Index

How to Give Your Dog a Longer and Healthier Life Claire Bessant, Peter Neville, Bradley Viner, 1994 Caring for the older dog does not require any mysterious search for the secret of youth, nor even necessarily having to change one's car - with a little knowledge and planning, it is a simple and straightforward process.

Life on Display Karen A. Rader, Victoria E. M. Cain, 2014-10-03 Life on Display traces the history of biological exhibits in American museums to demonstrate how science museums have shaped and been shaped by understandings of science and public education in twentieth-century society. Karen Rader and Victoria Cain document how public natural history and science museums' ongoing efforts to create popular educational displays led these institutions to develop new identities, ones that changed their positions in both twentieth-century science and American culture. They describe how, pre-1945, biological exhibitions changed dramatically--from rows upon rows of

specimen collections to large-scale dioramas with push-button displays—as museums attempted to negotiate the changing, and often conflicting, interests of scientists, educators, and the public. The authors then reveal how, from the 1950s through the 1980s, museum staffs experimented with wildly different definitions of life science and life science education, and how, in the process, natural history and science museums and science centers faced significant public and scientific scrutiny. The book concludes with a discussion of the ways corporate sponsorship and contemporary blockbuster economics influenced the content and display of science and natural history museums in the century's last decades. As a dynamic historical account of how museums negotiated their multiple roles in science and society, *Life on Display* will attract a diverse audience of cultural historians, sociologists, and ethnographers of science, as well as museum practitioners.

The Child and Child-nature Bertha Maria freifrau von Marenholtz-Bülow, 1895

Run, Spot, Run Jessica Pierce, 2016-05-06 “A thoughtful book” about how to ensure that the animals we love benefit from the relationship as much as we do (Kirkus Reviews). We feel love for our companions, and happiness that we’re providing them with a safe, healthy life. But sometimes we also feel guilt. When we see our cats gazing wistfully out the window, or watch a goldfish swim lazy circles in a bowl, we can’t help but wonder: Are we doing the right thing, keeping these independent beings locked up, subject to our control? Is keeping pets actually good for the pets themselves? That’s the question that animates Jessica Pierce’s powerful *Run, Spot, Run*. A bioethicist and a lover of pets herself (including, over the years, dogs, cats, fish, rats, hermit crabs, and more), Pierce explores the ambiguous

ethics at the heart of this relationship, and through a mix of personal stories, philosophical reflections, and scientifically informed analyses of animal behavior and natural history, she puts pet-keeping to the test. Is it ethical to keep pets at all? Are some species more suited to the relationship than others? Are there species one should never attempt to own? And are there ways that we can improve our pets' lives, so that we can be confident that we are giving them as much as they give us? "With gentle humor, clear compelling language, and always in search of the physically and emotionally healthiest lives possible for our animal companions, *Run, Spot, Run* moved me all the more because it's written from the inside looking out. Pierce herself lives with three pets and understands the deep urge so many of us feel to connect across species lines."—Barbara King, author of *How Animals Grieve*

A Three Dog Life Abigail Thomas, 2007 Author Abigail Thomas shares the story of how she started a new life after an accident left her husband brain damaged and institutionalized.

Animal Jam Katherine Noll, 2017 A strategy guide for National Geographic's massive multiplayer online game, *Animal Jam*, where players choose what animal they want to be and explore the land of Jamaa.

Animal-Assisted Therapy in Counseling Cynthia K.

Chandler, 2024-05-08 The fourth edition of *Animal-Assisted Therapy in Counseling* is the most comprehensive book available dedicated to training mental health practitioners in the performance of animal-assisted therapy in counseling. This edition includes material on real-world animal-assisted interventions featuring counselor-client dialogues and sample therapeutic opportunities. Each chapter includes the most recent research and practice, and a wide variety of case

examples present animal-assisted interventions in different settings with different types of animals. This unique resource is an indispensable guide for any counselor or psychotherapist looking to develop and implement animal-assisted therapy techniques in practice.

Fanciers' Journal and Poultry Exchange ,1876

The Curious Incident of the Dog in the Night-Time Mark Haddon,2009-02-24 A bestselling modern classic—both poignant and funny—narrated by a fifteen year old autistic savant obsessed with Sherlock Holmes, this dazzling novel weaves together an old-fashioned mystery, a contemporary coming-of-age story, and a fascinating excursion into a mind incapable of processing emotions. Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057. Although gifted with a superbly logical brain, Christopher is autistic. Everyday interactions and admonishments have little meaning for him. At fifteen, Christopher's carefully constructed world falls apart when he finds his neighbour's dog Wellington impaled on a garden fork, and he is initially blamed for the killing. Christopher decides that he will track down the real killer, and turns to his favourite fictional character, the impeccably logical Sherlock Holmes, for inspiration. But the investigation leads him down some unexpected paths and ultimately brings him face to face with the dissolution of his parents' marriage. As Christopher tries to deal with the crisis within his own family, the narrative draws readers into the workings of Christopher's mind. And herein lies the key to the brilliance of Mark Haddon's choice of narrator: The most wrenching of emotional moments are chronicled by a boy who cannot fathom emotions. The effect is dazzling, making for one of the freshest debut in years: a comedy, a

tearjerker, a mystery story, a novel of exceptional literary merit that is great fun to read.

The Illustrated Cat's Life Warren Eckstein,1995
Our Dumb Animals George Thorndike Angell,1915
