***Riding Moon Cycles Moon Days*** Laraine Mesavage, 2016-11-10 Today we walk a different path. Let us set aside the work of the day and talk of real things. Come walk the path through gentle ferns, across the bridge, and through the mists. Come inside, linger awhile and savor a soothing drink. We'll sit back in our cozy chairs, sink into the cushions and feel safely wrapped in a warm cocoon of peace. The busy world is far away. In here, the fire is welcoming and warm. In summer we'll move to the porch and sip on a cool tea or refreshing lemonade. Tuck your feet up under you or put them up on the soft upholstered stool. It's time to weigh and ponder and contemplate the moon. For a few precious moments, we'll stop the frantic pace. From this place of quiet reflection, we'll gaze softly past the curtains or across the porch and look beyond into the other realm that no one else can touch. We'll talk of silent thoughts and quiet hopes and inner wonderings. We'll whisper about the personal. Of important thoughts inside. We'll share the moon's illumination and talk about the truth within. Find comfort when you're troubled and cheers for when you win. On days when you slump with disappointment, you'll find a sympathetic ear. When your heart aches we'll find out why. When emptiness creeps upon your doorstep, we'll open the door to balance. On other days you'll get a gentle push to a new start. When you feel purged and cleansed, we'll face the unknown abyss with faith in the possible. Lie down under the apple tree and absorb the magic of the apple blossoms. When drunken cries of victory fill your heart with gladness, we'll dance with gratitude and joy! Close your hands around your cup and enjoy the view from this gentle shelter. Your joys and pains and secret thoughts are honored equally here. Every day for every moon we'll peek beyond and choose the view that you want to see. And the one you need to see. Some moons we'll laugh and sing and others cry and howl. You - you! - are the oracle, dear one. Let us remember. Explore the mysteries within. Let us recall the wisdom hidden inside our guts, buried in our hearts, waiting to be revealed in a bubble of illumination. Ride the moon days. Reach deep. Find the source of long forgotten memories and soar to the heights of your own truth. Self-knowledge. Asking the right question. What will you do when you get the thing that you say you want? The answers are inside, waiting to be unlocked each day. The adventure begins. No matter what any moon brings, you'll find a welcome here.

***Everything Moon*** Rosemary A. Millham, 2012-07 Whether you are simply curious about our mysterious neighbor-the Moon-or a teacher looking for ways to teach concepts about the Moon without misconceptions, *Everything Moon* is the non-technical, comprehensive guide you are seeking. From theories on the origin of the Moon, to phases, tides, eclipses, geology, past, current, and future missions, to the Apollo Program, *Everything Moon* guides you through the science and history you need to understand the Moon and includes creative, engaging investigations to develop important concepts. Written with teachers and students in mind, *Everything Moon* is a book for anyone who has ever asked themselves questions about our view of the Moon: what causes the same face of the Moon to face Earth every day; is there really a dark side of the Moon; what causes eclipses, tides and phases? With clear explanations, images, activities, and examples, *Everything Moon* will not only answer your questions about the Moon, but will spark a lively interest in all things lunar.

***Moon*** Edgar Williams, 2014-06-15 Long before a rocket hit the Man in the Moon in the eye in Georges Méliès's early film *Le Voyage dans la Lune*, the earth's lone satellite had entranced humans. We have worshipped it as a deity,

believed it to cause madness, used it as a means of organizing time, and we now know that it manipulates the tides—our understanding of the moon continues to evolve. Following the moon from its origins to its rich cultural resonance in literature, art, religion, and politics, Moon provides a comprehensive account of the significance of our lunar companion. Edgar Williams explores the interdependence of the Earth and the moon, not only the possibility that life on Earth would not be viable without the moon, but also the way it has embedded itself in culture. In addition to delving into roles the moon has played in literature from science fiction and comics to poetry, he examines how Elizabeth I was worshipped as the moon goddess Diana, the moon's place in folklore and astrology, and humanity's long-standing dream of inhabiting its surface. Filled with entertaining anecdotes, this book is the kind of succinct, witty, and informative look at everything lunar that only comes around once in a blue moon.

**Apollo's Muse** Mia Fineman, Beth Saunders, 2019-07-01 p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 14.0px Verdana} On July 20, 1969, half a billion viewers around the world watched as the first television footage of American astronauts on the moon was beamed back to earth—a thrilling turning point in the history of images, satisfying an age-old curiosity about our planet's only natural satellite. To celebrate the fiftieth anniversary of the Apollo 11 moon landing, this captivating volume surveys the role photography has played in the scientific study and artistic interpretation of the moon from the dawn of the medium to the present, highlighting not only stunning photographic works but also related prints, drawings, paintings, and astronomical instruments. Apollo's Muse traces the history of lunar photography, from newly discovered daguerreotypes of the 1840s to contemporary film and video works. Along the way, it explores nineteenth century efforts to map the lunar surface, whimsical fantasies of life on the moon, the visual language of the Cold War space race, and work created in response to the moon landing by artists such as Robert Rauschenberg, Nancy Graves, and Aleksandra Mir. A delightful introduction by Tom Hanks, star of the award winning 1995 film Apollo 13, delves into the universal fascination with representations of the cosmos and the ways in which space travel has radically expanded the limits of human vision.

**Moon Power** Merilyn Keskula, 2020-09-03 The Moon is not just a static piece of cosmic matter in our night sky, but a dynamic living being. Throughout her journey around the Earth which takes about 29.5 days she shows us her different faces, growing from a silver sliver in the sky to an awe-inspiring illuminated sphere, before returning to darkness again. She changes colour and moves through a variety of star constellations reflecting the energies at play each day. The Moon gives us a map to a cyclical way of living; the blueprint for a life that breathes in harmony with the rhythm of the natural world around us. She teaches us about the importance of embracing quiet and reflective times as much as celebrating the times we experience life in its fullest expression. She informs us when to plant the seeds of our dreams and when to take stock and harvest what we have been growing. What will you discover about yourself when you tune into the moon?

**Full Moon** Michael Light, Andrew Chaikin, 1999 The most thrilling of all journeys--the missions of the Apollo astronauts to the surface of the Moon and back--yielded 32,000 extraordinarily beautiful photographs, the record of a unique human achievement. Until recently, only a handful of these photographs had been released for publication; but now, for the first time, NASA has allowed a selection of the master negatives and transparencies to be scanned electronically, rendering the sharpest images of space that we have ever seen. Michael Light has woven 129 of these stunningly clear images into a single composite voyage, a narrative of breathtaking immediacy and authenticity that begins with the launch and is followed by a walk in space, an orbit of the Moon, a lunar

landing and exploration, and a return to Earth with an orbit and splashdown. Graced by five 45-inch-wide gatefolds that display the lunar landscape, from above the surface and at eye level, in unprecedented detail and clarity, Full Moon conveys on each page the excitement, disorientation, and awe that the astronauts themselves felt as they were shot into space and then as they explored an alien landscape and looked back at their home planet from hundreds of thousands of miles away. Published on the thirtieth anniversary of Apollo 11--the first landing on the Moon--this remarkable and mesmerizing volume is, like the voyages it commemorates and re-creates, an experience both intimate and monumental.
