Coordination Dynamics: Issues and Trends Viktor K. Jirsa,Scott Kelso,2004-01-22 This book brings together scientists from all over the world who have defined and developed the field of Coordination Dynamics. Grounded in the concepts of self-organization and the tools of nonlinear dynamics, appropriately extended to handle informational aspects of living things, Coordination Dynamics aims to understand the coordinated functioning of a variety of different systems at multiple levels of description. The book addresses the themes of Coordination Dynamics and Dynamic Patterns in the context of the following topics: Coordination of Brain and Behavior, Perception-Action Coupling, Control, Posture, Learning, Intention, Attention, and Cognition.

Texts and Textiles Diana Mary Eva Thomas,2017-03-07 This study shows how fiction that makes use of textiles as an essential element utilizes synaesthetic writing and synaesthetic metaphor to create an affective link to, and response in, the reader. These links and responses are examined using affect theory from Silvan Tomkins and Brian Massumi and work on synaesthesia by Richard Cytowic, Lawrence Marks, and V.S. Ramachandran, among others. Synaesthetic writing, including synaesthetic metaphors, has been explored in poetry since the 1920s and, more recently, in fiction, but these studies have been general in nature. By narrowing the field of investigation to those novels that specifically employ three types of hand-crafted textiles (quilt-making, knitting and embroidery), the book isolates how these textiles are used in fiction. The combination of synaesthesia, memory, metaphor and, particularly, synaesthetic metaphor in fiction with textiles in the text of the case studies selected, shows how these are used to create affect in readers, enhancing their engagement in the story. The work is framed within the context of the history of textile production and the use of textiles in fiction internationally, but concentrates on Australian authors who have used textiles in their writing. The decision to focus on Australian authors was taken in light of the quality and depth of the writing of textile fiction produced in Australia between 1980 and 2005 in the three categories of hand-crafted textiles – quilt-making, knitting and embroidery. The texts chosen for intensive study are: Kate Grenville's The Idea of Perfection (1999, quilting); Marele Day's Lambs of God (1997, knitting) and Anne Bartlett's Knitting (2005, knitting); Jessica Anderson's Tirra Lirra by the River (1978, embroidery) and Marion Halligan's Spider Cup (1990, embroidery).

How the Brain Processes Multimodal Technical Instructions Dirk Remley,2016-12-05 While Aristotle acknowledges the connection between rhetoric, biology, and cognitive abilities, scholarship continues to struggle to integrate the fields of rhetoric and neurobiology. Drawing on recent work in neurorhetoric, this book offers a model that integrates multimodal rhetorical theory and multisensory neural processing theory pertaining to cognition and learning. Using existing theories from multimodal rhetoric and specific findings from neurobiological studies, the author develops a model that integrates concepts from both fields, bridging, if not uniting, them. He also discusses possible applications of the new model, with specific case studies related to training and instruction. These applications include various media used in instructional and training contexts, such as print, slide shows, videos, simulations, and hands-on training. The book thus introduces concepts of cognitive neuroscience to multimodal rhetorical theory and facilitates theorization combining multimodal rhetoric and multisensory cognition, and serves as a vehicle by which readers can better understand the links between multimodal rhetoric and cognitive neuroscience associated with technical communication. Integrating case studies from industry and practice, the text makes explicit connections between academic scholarship and workplace preparation. It also describes how interdisciplinary research can contribute to pharmaceutical research, as well as the development of productive instructional materials. Rhetoric is affected by how the brain of any member of a given audience can process information. This book can promote further research-qualitative and quantitative-to develop a better understanding of the relationship between multimodal messages and how the brain processes such information.

The Handbook of Multisensory Processes Gemma Calvert,Charles Spence,Barry E. Stein,2004 Research is suggesting that rather than our senses being independent, perception is fundamentally a multisensory experience. This handbook reviews the evidence and explores the theory of broad underlying principles that govern sensory interactions, regardless of the specific senses involved.

Digital Synesthesia Katharina Gsöllpointner,Ruth Schnell,Romana Karla Schuler,2016-05-10 Die Publikation versammelt die Ergebnisse des künstlerischen Forschungsprojekts DIGITAL SYNESTHESIA (2013-2016) und stellt erstmals ein umfassendes Kompendium zum Begriff der Digitalen Synästhesie dar. Digitale Synästhesie umfasst ein völlig neues Konzept der digitalen Künste im 21. Jahrhundert, das die multimediale, auf dem binären Code basierende Ästhetik der digitalen Kunst mit der Multimodalität von Synästhesie als Wahrnehmungsform verbindet. Unter dem Begriff Digital Synesthesia geben die Herausgeberinnen diesem neuen Phänomen nicht nur einen Namen. Texte renommierter Medien- und Kunsttheoretiker, Medienkünstler und Neurowissenschaftler vermitteln spannende Einsichten in die Erforschung der synästhetischen Wahrnehmungsmöglichkeiten von multimedialen digitalen Kunstwerken.
