Mediocre Saviors is Book 1 of The Tower and the Tree. Some seek to be the savior of the enslaved, while the power that enslaves the world seeks a way past the Stone Tower's magic. The drunken outlaw and the gimp. The slave and the cantankerous old bastard. The hooded assassin and the prince's ghost. The witch and the red-eyed madman. Four hundred years after the fall of the kingdoms, the world needs a savior.

**Innovative and Creative Industries in Hong Kong** Grace L K Leung, 2018-10-29 The experience of Hong Kong's innovative and creative industries and the challenges they face

serves as an important case study for other Chinese and Asian cities that are actively developing their innovative and creative industries in the era of globalization. The return of sovereignty over Hong Kong back to China in 1997 has led to both collaboration and competition between the two places in innovative and creative sectors for the Greater China and Asian Regions. Hong Kong has remained unique in spite of the integration, but she has to strike a delicate balance between being simultaneously a Chinese and an international city. This book looks at different innovative and creative industries, such as international art and culture exhibition, innovative technology, digital entertainment, TV and movies, as well as government policy for innovative and creative industries, particularly the changing competitive landscape brought about by the latest Great Bay Area development. Drawing insights from cultural history, innovation economics, cultural policy studies, and cultural geography, this book explores the opportunities and challenges of Hong Kong's innovative and creative industries, in particular after the change of sovereignty in 1997. It demonstrates that the city's legacy, and heavy government input in capital, do not guarantee their sustainable development. This is a book not only for policymakers or academics interested in innovative and creative industries but also to students contemplating a career in these areas in Hong Kong, the Greater China and the Asian Region.

**Saviors and Survivors** Mahmood Mamdani, 2010-05-25 From the author of Good Muslim, Bad Muslim comes an important book, unlike any other, that looks at the crisis in Darfur within the context of the history of Sudan and examines the world's response to that crisis. In Saviors and Survivors, Mahmood Mamdani explains how the conflict in Darfur began as a civil war (1987–89) between nomadic and peasant tribes over fertile land in the south, triggered by a severe drought that had expanded the Sahara Desert by more than sixty miles in forty years; how British colonial officials had artificially tribalized Darfur, dividing its population into “native” and “settler” tribes and creating homelands for the former at the expense of the latter; how the war intensified in the 1990s when the Sudanese government tried unsuccessfully to address the problem by creating homelands for tribes without any. The involvement of opposition parties gave rise in 2003 to two rebel movements, leading to a brutal insurgency and a horrific counterinsurgency—but not to genocide, as the West has declared. Mamdani also explains how the Cold War exacerbated the twenty-year civil war in neighboring Chad, creating a confrontation between Libya's Muammar al-Qaddafi (with Soviet support) and the Reagan administration (allied with France and Israel) that spilled over into Darfur and militarized the fighting. By 2003, the war involved national, regional, and global forces, including the powerful Western lobby, who now saw it as part of the War on Terror and called for a military invasion dressed up as “humanitarian intervention.” Incisive and authoritative, Saviors and Survivors will radically alter our understanding of the crisis in Darfur.

**The Tower** Shereen Malherbe, 2019-04-17 Reem is a Syrian refugee who has arrived in London, trying to discover the whereabouts of her 10-year old brother, Adar. Obsessed with history and consumed by her fragmented memories of home, Reem is also hiding secrets she hopes will never be revealed. After being placed in a tower block, she befriends Leah; a single mother who has been forced to leave her expensive South Kensington townhouse. Their unlikely friendship supports them as they attempt to find their place in a relentless, heaving city, and come to terms with the homes they left behind. Both bold and timely, *The Tower* shows how Reem and Leah's lives change and intersect in the wake of individual and communal tragedy, as well as in their struggle to adapt to a rapidly shifting society.

**The Chaldean Account of Genesis** George Smith, 2014-09-15 This revised 1880 second edition of Smith's book draws extraordinary parallels between cuneiform documents and the biblical book of Genesis.

**The Charisma Machine** Morgan G. Ames, 2019-11-19 A fascinating examination of technological utopianism and its complicated consequences. In *The Charisma Machine*, Morgan Ames chronicles the life and legacy of the One Laptop per Child project and explains why—despite its failures—the same utopian visions that inspired OLPC still motivate other projects trying to use technology to “disrupt” education and development. Announced in 2005 by MIT Media Lab cofounder Nicholas Negroponte, One Laptop per Child promised to transform the lives of children across the Global South with a small, sturdy, and cheap laptop computer, powered by a hand crank. In reality, the project fell short in many ways—starting with the hand crank, which never materialized. Yet the project remained charismatic to many who were captivated by its claims of access to educational opportunities previously out of reach. Behind its promises, OLPC, like many technology projects that make similarly grand claims, had a fundamentally flawed vision of who the computer was made for and what role technology should play in learning. Drawing on fifty years of history and a seven-month study of a model OLPC project in Paraguay, Ames reveals that the laptops were not only frustrating to use, easy to break, and hard to repair, they were designed for “technically precocious boys”—idealized younger versions of the developers themselves—rather than the children who were actually using them. *The Charisma Machine* offers a cautionary tale about the allure of technology hype and the problems that result when utopian dreams drive technology development.

**Light Transit Systems** B. H. North, 1990 Light transit systems are becoming popular and likely to be a major factor in reducing traffic congestion and pollution in cities. This title provides commentary on funding, engineering feasibility, public consultation, environmental impact, safety legal aspects and operation, drawing on experience in Europe

Tyne and Wear, and London's Docklands.

*Independence Bells of Philadelphia* Thomas Kaufmann,2022-11-07 The bells rung all day, and almost all night... John Adams wrote this timeless observation when the Declaration of Independence was signed and publicly proclaimed in early July of 1776 to a jubilant crowd in Philadelphia. This is the story of those bells - a search to discover which bells did indeed ring, or are believed to have rung, when America was born. It is the story of the most famous bell in the world, the Liberty Bell, and the other historic bells of Philadelphia, during the era of the American Revolution. Author Thomas Kaufmann traces the joyous history of sound and instrument as the nation is forged among uplifting tolls of Philadelphia's historic independence bells.

**In the Shadow of the Ivory Tower** Davarian L Baldwin,2021-03-30 Across America, universities have become big businesses—and our cities their company towns. But there is a cost to those who live in their shadow. Urban universities play an outsized role in America's cities. They bring diverse ideas and people together and they generate new innovations. But they also gentrify neighborhoods and exacerbate housing inequality in an effort to enrich their campuses and attract students. They maintain private police forces that target the Black and Latinx neighborhoods nearby. They become the primary employers, dictating labor practices and suppressing wages. In the Shadow of the Ivory Tower takes readers from Hartford to Chicago and from Phoenix to Manhattan, revealing the increasingly parasitic relationship between universities and our cities. Through eye-opening conversations with city leaders, low-wage workers tending to students' needs, and local activists fighting encroachment, scholar Davarian L. Baldwin makes clear who benefits from unchecked university power—and who is made vulnerable. In the Shadow of the Ivory Tower is a wake-up call to the reality that higher education is no longer the ubiquitous public good it was once thought to be. But as Baldwin shows, there is an alternative vision for urban life, one that necessitates a more equitable relationship between our cities and our universities.
