TPA for Stroke Justin A. Zivin, John Galbraith

Simmons, 2010-12-03 Each year, nearly 700,000 people in the United States will have a stroke. A drug known as tPA can drastically reduce the long-term disability associated with stroke if it is administered within the first three hours after the event occurs. Many of those who are lucky enough to be treated with tPA have made full recoveries--to the extent that one can hardly believe they suffered a real stroke. Others still do not receive the drug; many suffer permanent disabilities, and many die. Authors Zivin and Simmons argue that most Americans have never heard of tPA. Why would such an effective pharmaceutical, one that has a remarkable rate of success with the third leading killer of Americans, be so disregarded? *tPA for Stroke: The Story of a Controversial Drug* explains the drug's beginnings within pharmaceutical giant Genentech, and its eventual marginalization due to a convergence of unfortunate political, fiscal, and medical circumstances. Readers will learn about an extraordinary treatment for acute stroke that they may then seek if a stroke occurs and anyone interested in the unique process of drug development, marketing, and promotion, told from an insider's perspective, will

have an interest in tPA for Stroke.

tPA for Stroke Justin A. Zivin M.D., Ph.D., John Galbraith

Simmons, 2010-12-01 Without warning stroke can paralyze, blind, or kill. Some victims recover, but many do not and may even suffer another disabling or fatal attack. The drug known as tPA can drastically reduce the long-term disability associated with stroke, but despite its near-miraculous capabilities and the growing support of most neurologists, it has been slow to win acceptance as the standard of care in emergency departments nationwide. tPA for Stroke chronicles how this remarkable drug came to be tested in stroke victims, its early years in development by the pharmaceutical giant Genentech, and its eventual marginalization due to a convergence of unfavorable political, fiscal, and medical circumstances. For instance, initially many stroke specialists were unconvinced that the drug's benefits outweigh its risks (tPA was originally developed and is still used for cardiac patients). Moreover, neurologists called upon to assess stroke patients have not typically been trained to make decisions in emergency settings--and tPA must be given within a scant few hours after stroke. These and other factors have continued to delay the drug's

universal acceptance as the most effective treatment available, and to hamper the general public's awareness that such a treatment exists--a troubling state of affairs that Zivin and Simmons argue must be rectified. Instilling the knowledge that anyone, at any time, is susceptible to stroke, from the old and infirm to the young and healthy, tPA for Stroke is a clarion call to awareness in a rapidly changing healthcare environment in which stroke, long a disease in thrall to resignation and pessimism, must be neglected no longer.

Acute Ischemic Stroke R. Gilberto González,Joshua A. Hirsch,Michael H. Lev,Pamela W. Schaefer,Lee H. Schwamm,2010-10-05 This updated second edition of Acute Ischemic Stroke: Imaging and Intervention provides a comprehensive account of the state of the art in the diagnosis and treatment of acute ischemic stroke. The basic format of the first edition has been retained, with sections on fundamentals such as

pathophysiology and causes, imaging techniques and interventions. However, each chapter has been revised to reflect the important recent progress in advanced neuroimaging and the use of interventional tools. In addition, a new chapter is included on the classification instruments for ischemic stroke and their use in predicting outcomes and therapeutic triage. All of the authors are internationally recognized experts and members of the interdisciplinary stroke team at the Massachusetts General Hospital and Harvard Medical School. The text is supported by numerous informative illustrations, and ease of reference is ensured through the inclusion of suitable tables. This book will serve as a unique source of up-to-date information for neurologists, emergency physicians, radiologists and other health care providers who care for the patient with acute ischemic stroke.

Thrombolytic Therapy for Acute Stroke Patrick D Lyden,2016-08-23 Thrombolytic therapy is finally starting to reach

patients in a variety of settings all over the world. Formerly in the domain of sub-specialists, thrombolytic therapy now rests in the realm of Emergency Medicine, Intensive Care, Vascular, and Neuro hospital Medicine physicians. Increasingly, non-neurologists use thrombolytic therapy. This is a significant advancement since the 2nd edition to Thrombolytic Therapy for Acute Stroke published, creating a significant need for a 3rd edition. Thrombolytic Therapy for Acute Stroke, 3rd edition will be a practical and thorough reference to all those caring for acute stroke patients. Extensively updated from previous editions, new data and cases will provide guidance to this most effective stroke treatment. This text will be of great interest to physicians, residents and advanced practice nurses who treat acute stroke patients.

The Dirty Dozen Robert A. Levy, William Mellor, 2009-08-01

Alexander Hamilton wrote that “the judiciary, from the nature of its functions, will always be the least dangerous to the political rights of the Constitution.” If only that were true. The Founding Fathers wanted the judicial branch to serve as a check on the power of the legislative and executive, and gave the Supreme Court the responsibility of interpreting the Constitution in a way that would safeguard individual freedoms. In some cases, like *Brown V. Board*

of Education and United States V. Lopez, the Court fulfilled its role, protecting us from racial discrimination and the heavy hand of the federal government. But sadly, the Supreme Court has also handed down many destructive decisions on cases you probably never learned about in school. In *The Dirty Dozen*, two distinguished legal scholars shed light on the twelve worst cases, which allowed government to interfere in your private contractual agreements; curtail your rights to criticize or support political candidates; arrest and imprison you indefinitely, without filing charges; and seize your private property, without compensation, when someone uses the property for criminal activity—even if you don’t know about it! This is not a book just for lawyers. It’s for all Americans who want to understand how the Supreme Court can affect our right to life, liberty, and the pursuit of happiness. This paperback edition includes a new preface, “Guns, Bailouts, and Empathetic Judges,” which highlights new and critical issues that have arisen since the book’s initial edition was published in 2008.

Regulatory Theory Peter Drahoš, 2017-02-23 This volume

introduces readers to regulatory theory. Aimed at practitioners, postgraduate students and those interested in regulation as a cross-cutting theme in the social sciences, Regulatory Theory includes chapters on the social-psychological foundations of regulation as well as theories of regulation such as responsive regulation, smart regulation and nodal governance. It explores the key themes of compliance, legal pluralism, meta-regulation, the rule of law, risk, accountability, globalisation and regulatory capitalism. The environment, crime, health, human rights, investment, migration and tax are among the fields of regulation considered in this ground-breaking book. Each chapter introduces the reader to key concepts and ideas and contains suggestions for further reading. The contributors, who either are or have been connected to the Regulatory Institutions Network (RegNet) at The Australian National University, include John Braithwaite, Valerie Braithwaite, Peter Grabosky, Neil Gunningham, Fiona Haines, Terry Halliday, David Levi-Faur, Christine Parker, Colin Scott and Clifford Shearing.

Blood, Sweat, and Fear Lance A. Compa, 2004 Workers in American beef, pork, and poultry slaughtering and processing

plants perform dangerous jobs in difficult conditions. But workers in this industry face more than hard work in tough settings. They contend with conditions and abuses that violate human rights. The report includes specific recommendations for reform addressed to employers, to federal and state legislators, and to federal and state labor law enforcement agencies.

Désiré Collen - Biotech Pioneer Paul Huybrechts, Frieda Van Wijck, 2020-08-27 Désiré Collen, Biotech Pioneer relates the fascinating story of scientific discovery in a time when biotechnology was not yet a science. Although the cultivation and cross fertilization of plants were, strictly speaking, biotechnological techniques, modern biotechnology dates from the early 1970s, when pioneers such as biochemist Herbert Boyer from the university of California managed to transfer genetic material into a bacterium. Together with venture capitalist Robert Swanson, Boyer set up Genentech, one of the first genetic engineering companies. Just a few years later, on the other side of the Atlantic, in Leuven, Désiré Collen discovered t-PA, the enzyme responsible for fibrinolysis, or the dissolving of blood clots. Clogged arteries were then still one of the major causes of death. The ensuing cooperation between Collen and Genentech was the beginning of a

long-lasting success story, from which not only Collen but also scientific research and the University of Leuven benefitted greatly for many years. According to a Reuters ranking, KU Leuven has been, from 2016 onwards, the most innovative university in Europe. Flanders and Belgium served as the cradle of several highly successful biotech companies. t-PA was a relatively expensive medicine, and Collen went on to develop a much cheaper clot-dissolving remedy to benefit patients in less affluent countries. He failed, however, to find the necessary finances for Phase 3 trials. Meanwhile, he had set up ThromboGenics, a company which later specialized in ophthalmology. Collen continued to stimulate and finance research in other fields, such as the cardiovascular research of Peter Carmeliet. In 2013 he left ThromboGenics, following a difference in views on the company's focus, and in 2015 he set up Fund+, a biotech-oriented investment firm. Fund+ has meanwhile acquired a prominent place among European biotech investment funds and has scored some astonishing early successes. In June 2020, Fund+ had 13 companies in its portfolio, with several more waiting to come on board.
