Mind, Money & Markets Dave Harder, Janice Dorn, 2014-10 After losing much of his money when the South Sea Bubble burst in 1720, English physicist and mathematician Isaac Newton stated, I can calculate the motion of heavenly bodies, but not the madness of people. Even though Isaac Newton was a brilliant man, he did not realize that markets function in a way that is opposite to almost everything else we do. For example, if people are lining up around the block to purchase an iPad, it is a sign that it is a good product. If people are lining up around the block to buy a condominium, it is a bad sign for real estate. Markets do not always act in a rational or logical manner. Mind, Money & Markets explains why they act the way they do. It is critical for every person to understand this in order to make wise decisions ranging from buying a home to operating a business. Expert advice is much less reliable than we expect it to be because no one can accurately predict the future on a consistent basis. Gigantic losses like the \$6.2 billion trading loss at JP Morgan in 2012 show that investors are not giving momentum (following the trend) the respect it deserves. Mind, Money & Markets offers a momentum filter—specifically, a screening tool from which every individual and professional investor should benefit. The book also provides a circuit breaker that enables investors to limit losses in case of an unexpected event in financial markets. Using powerful and poignant analogies from their life experiences, including Dave Harder's twelve years as a Search and Rescue volunteer, we provide readers with a simple discipline to preserve precious hard-earned capital during severe downturns and to outperform benchmarks when markets are in an uptrend. It is easier to know what to do than to actually do it. Psychiatrist Dr. Janice Dorn specializes in helping traders and investors deal with emotions and aspects of human nature that hinder them from making astute investment decisions for stocks, bonds, real estate, currencies, or commodities. We have passed on many words of wisdom collected from market sages and great thinkers. We also highlight some major misconceptions about investing, and show the reader how to overcome them and prosper. With a compelling mixture of fascinating stories and more than 100 colored charts and photographs, this is truly a unique work about how human beings react to markets. The book helps individual

as well as professional investors to be efficient with their time and energy by teaching them to focus only on a few factors which have the most significant impact on financial markets. The personalized strategies provided in these pages will enable readers to maximize gains, minimize losses, and have more time to spend on things that matter the most in their lives.

How to Day Trade Ross Cameron, 2015-10-29 Success as a day trader will only come to 10 percent of those who try. It's important to understand why most traders fail so that you can avoid those mistakes. The day traders who lose money in the market are losing because of a failure to either choose the right stocks, manage risk, and find proper entries or follow the rules of a proven strategy. We turn the tables by putting the odds for success in your favor. By picking up this book, you show dedication to improve your trading. How to Day Trade for a Living Andrew Aziz, 2016-07-28 Very few careers can offer you the freedom, flexibility and income that day trading does. As a day trader, you can live and work anywhere in the world. You can decide when to work and when not to work. You only answer to yourself. That is the life of the successful day trader. Many people aspire to it, but very few succeed. Day trading is not gambling or an online poker game. To be successful at day trading you need the right tools and you need to be motivated, to work hard, and to persevere. At the beginning of my trading career, a pharmaceutical company announced some positive results for one of its drugs and its stock jumped from \$1 to over \$55 in just two days. Two days! I was a beginner at the time. I was the amateur. I purchased 1,000 shares at \$4 and sold them at over \$10. On my very first beginner trade, I made \$6,000 in a matter of minutes. It was pure luck. I honestly had no idea what I was doing. Within a few weeks I had lost that entire \$6,000 by making mistakes in other trades. I was lucky. My first stupid trade was my lucky one. Other people are not so lucky. For many, their first mistake is their last trade because in just a few minutes, in one simple trade, they lose all of the money they had worked so hard for. With their account at zero, they walk away from day trading. As a new day trader you should never lose sight of the fact that you are competing with professional traders on Wall Street and other experienced traders around the world who are very serious, highly equipped with advanced education and tools, and most importantly, committed to making money. Day trading is not gambling. It is not a hobby. You must approach day trading very, very seriously. As such, I wake up early, go for a run, take a shower, get dressed, eat breakfast, and fire up my trading station before the markets open in New York. I am awake. I am alert. I am motivated when I sit down and start working on the list of stocks I will watch that day. This morning routine has tremendously helped my mental preparation for coming into the market. Whatever your routine is, starting the morning in a similar fashion will

pay invaluable dividends. Rolling out of bed and throwing water on your face 15 minutes before the opening bell just does not give you sufficient time to be prepared for the market's opening. Sitting at your computer in your pajamas or underwear does not put you in the right mindset to attack the market. I know. I've experienced all of these scenarios. In *How to Day Trade for a Living*, I will show you how you too can take control over your life and have success in day trading on the stock market. I love teaching. It's my passion. In this book, I use simple and easy to understand words to explain the strategies and concepts you need to know to launch yourself into day trading on the stock market. This book is definitely NOT a difficult, technical, hard to understand, complicated and complex guide to the stock market. It's concise. It's practical. It's written for everyone. You can learn how to beat Wall Street at its own game. And, as a purchaser of my book, you will also receive a membership in my community of day traders at www.vancouver-traders.com. You can monitor my screen in real time, watch me trade the strategies explained in his book, and ask questions of me and other traders in our private chat room. I invite you to join me in the world of day trading. I'm a real person who you can connect with. I'm not just a photograph here on the Amazon site. I love what I do. You can follow my blog post under Author Updates on my Author page on Amazon. It's honest. You'll see I lose some days. You can read the reviews of my book. I know you will learn much about day trading and the stock market from studying my book. You can join at no cost and with no obligation my community of day traders at www.vancouver-traders.com.
