Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

**The Human Flies** Hans Olav Lahlum, 2014-06-05 Oslo, 1968. Ambitious young detective Inspector Kolbjørn Kristiansen is called to an apartment block, where a man has been found murdered. The victim, Harald Olesen, was a legendary hero of the Resistance during the Nazi occupation and at first it is difficult to imagine who could have wanted him dead. But as Detective Inspector Kolbjørn Kristiansen (known as K2) begins to investigate, it seems clear that the murderer could only be one of Olesen's fellow tenants in the building. Soon, with the help of Patricia - a brilliant young woman confined to a wheelchair following a terrible accident - K2 will begin to untangle the web of lies surrounding Olesen's neighbours; each of whom, it seems, had their own reasons for wanting Olesen dead. Their interviews, together with new and perplexing clues, will lead K2 and Patricia to dark events that took place during the Second World War . . . The Human Flies by Hans Olav Lahlum is a gripping, evocative and ingenious mystery - the first in a series featuring K2 and Patricia - which pays homage to the great Agatha Christie and will plunge readers into Norwegian history, and into a world of deceit and betrayal, revenge and the very darkest murder.

**The Catalyst Killing** Hans Olav Lahlum, 2015-08-27 The third mystery in the hugely compelling, bestselling international crime series from Norway's answer to Agatha Christie, Hans Olav Lahlum. The Catalyst Killing will have you guessing to the final clue... The first murder was only the spark . . . 1970. Inspector Kolbjørn Kristiansen, known as K2, witnesses a young woman desperately trying to board a train only to have the doors close before her face. The next time he sees her, she is dead . . . As K2 investigates, with the help of his precocious young assistant Patricia, he discovers that the story behind Marie Morgenstjerne's murder really began two years ago, when a group of politically active young people set out on a walking tour in the mountains. There, one night, the party's charismatic leader - and Marie's boyfriend - Falko Reinhardt vanished without a trace. But were the relationships between this group of friends and comrades all they appeared to be? What did Marie see, that made her run for her life that day? And could both mysteries be linked to Falko's research into a cell of Norwegian Nazis he suspected may still be active? It soon becomes clear that Marie's death is not only a complex case in its own right, but will act as a catalyst in a dark set of events which will leave K2 and Patricia confronting their most dangerous and explosive investigation yet. And as the pair work hard to unravel the clues before Marie's killer can strike again, the detective fails to notice that his young assistant has her own problems to face . . .

Nordic Seabird Colony Databases Nordisk Ministerråd, 2006 Internationally important seabird resources are found in the Nordic countries (Greenland, Faeroes, Iceland, Jan Mayen, and Svalbard). To fulfill a recommendation of the Arctic Nordic Action Plan 1999, a project was carried out to harmonize databases for seabird colonies. Number of seabird species in these countries is 30, the number of colony sites may be 10,000, often more than one species at same site, and the total breeding pairs is estimated c. 50 million. A harmonized database format for seabird colonies was established, with 3 main tables, colony descriptions, colony survey data, study plot information. Linked are tables with references, observers, and photo documentation. The program can be downloaded free from: <ftp://ftp.npolar.no/Out/Hallvard/>. The manual is in the report appendix. The format harmonization is the first step in work on seabird colony databases. Harmonization enables common analyses over larger regions than hitherto possible, e.g. scientific assessments of species (colony details, geographic location, colony size, trend data, etc.) and conservation status overviews. Seabird colony data need to be incorporated into conservation policies. The databases are only as good as the data stored, many colonies remain unregistered, not censused, and fieldwork needs to be intensified. Each country maintains, updates, and

corrects their databases, adding details lacking (habitat type, colony distribution, conservation status, land ownership, etc.).

**Social Theory and the Urban Question** Peter Saunders, 2013-02-01 Social Theory and the Urban Question offers a guide to, and a critical evaluation of key themes in contemporary urban social theory, as well as a re-examination of more traditional approaches in the light of recent developments and criticism. Dr Saunders discusses current theoretical positions in the context of the work of Marx, Weber and Durkheim. He suggests that later writers have often misunderstood or ignored the arguments of these 'founding fathers' of the urban question. Dr Saunders uses his final chapter to apply the lessons learned from a review of their work in order to develop a new framework for urban social and political analysis. This book was first published in 1981.

*The Making of Citizens* David Buckingham,2002-01-04 Based on research conducted in Britain and the US, *The Making of Citizens* traces the dynamic complexities of young people's interpretations of news, and their judgements about the ways in which key social and political issues are represented. Rather than bemoaning young people's ignorance, he argues that we need to rethink what counts as political understanding in contemporary societies, suggesting that we need forms of factual reporting that will engage more effectively with young people's changing perceptions of themselves as citizens. *The Making of Citizens* provides a significant contribution to the study of media audiences and a timely intervention in contemporary debates about citizenship and political education.
