Little Allies: A Children's Story about Inclusion, Diversity, and Becoming an Ally Julie Kratz, 2021-03-08 Little Allies is a beautifully illustrated children's story that inspires kids to be their best with everyone, especially for those who may need an ally from time to time. As Ally navigates through her school day, she watches her classmates face bullying and discrimination. Ally realizes that they all want the same thing - to be accepted as they are. Ally learns an important lesson, brought to light by her teacher, that our differences make each of us unique and special, and that we can be an ally to others to help them navigate through life. Little Allies is a touching tale that reminds us of the importance of accepting each other, celebrating our differences, and working to become an ally. The colorful pictures show Ally's willingness to stand by her friends, even when she doesn't know how else to help. Adults in the story are also important allies, helping kids navigate challenges, learn ways to support, and cherish their uniqueness. The bonus material at the end of the book will spark discussion at home or in the classroom. 100% of online book sale proceeds will be donated to a nonprofit or organization focused on children's diversity and inclusion development or providing equitable access to opportunities for all children.

The Whiteboard Daily Book of Cues Karl Eagleman, 2022-07-26 There is no such thing as a "golden cue" that works for everyone 100% of the time. Therefore, the more cues a coach has in their toolbox, the more likely they will be able to effectively communicate with their athletes. Coaches use cues—short, easy-to-remember phrases—to help athletes perform movements correctly as well as to convey useful sports psychology perspectives. Athletes commonly

hear movement cues like “Crush the Can” and “Grip the Ground” along with motivational cues like “Consistency is King.” A passionate coach, lifelong athlete, and advanced degree holder in kinesiology, Karl Eagleman, creator of the popular Whiteboard Daily Instagram, has put together a valuable resource for coaches, athletes, and anyone who wants to improve their own movement. The Whiteboard Daily Book of Cues contains a comprehensive collection of illustrations drawn on a whiteboard—a medium that virtually all coaches are familiar with. It boasts the largest list of cues ever compiled, covering Olympic weightlifting, powerlifting, gymnastics, kettlebell exercises, and monostructural movements (running, rowing, jumping rope, etc.). Each illustration is hand drawn in a simple, stylized way to make the cues easy to retain and to utilize during training. No two athletes are the same; we all learn in our own unique ways. By providing hundreds of cues, this book will help coaches and athletes learn a new way to understand movement for themselves and/or to communicate safe, effective movement to others.

The Sciences of the Artificial, reissue of the third edition with a new introduction by John Laird Herbert A. Simon, 2019-08-13 Herbert Simon's classic work on artificial intelligence in the expanded and updated third edition from 1996, with a new introduction by John E.

Laird. Herbert Simon's classic and influential *The Sciences of the Artificial* declares definitively that there can be a science not only of natural phenomena but also of what is artificial. Exploring the commonalities of artificial systems, including economic systems, the business firm, artificial intelligence, complex engineering projects, and social plans, Simon argues that designed systems are a valid field of study, and he proposes a science of design. For this third edition, originally published in 1996, Simon added new material that takes into account advances in cognitive psychology and the science of design while confirming and extending the book's basic thesis: that a physical symbol system has the necessary and sufficient means for intelligent action. Simon won the Nobel Prize for Economics in 1978 for his research into the decision-making process within economic organizations and the Turing Award (considered by some the computer science equivalent to the Nobel) with Allen Newell in 1975 for contributions to artificial intelligence, the psychology of human cognition, and list processing. *The Sciences of the Artificial* distills the essence of Simon's thought accessibly and coherently. This reissue of the third edition makes a pioneering work available to a new audience.
