

Trancit Lite Edition 13

Mark Ovenden

Central Link Light Rail Transit Project, Seattle, Tukwila and Seatac ,1999

Transit Maps of the World Mark Ovenden,2015-11-03 A completely updated and expanded edition of the cult bestseller, featuring subway, light rail, and streetcar maps from New York to Nizhny Novgorod. Transit Maps of the World is the first and only comprehensive collection of historical and current maps of every rapid-transit system on earth. In glorious, colorful graphics, Mark Ovenden traces the cartographic history of mass transit—including rare and historic maps, diagrams, and photographs, some available for the first time since their original publication. Now expanded with thirty-six more pages, 250 city maps revised from previous editions, and listings given from almost a thousand systems in total, this is the graphic designer's new bible, the transport enthusiast's dream collection, and a coffee-table essential for everyone who's ever traveled in a city.

Light Transit Systems B. H. North,1990 Light transit systems are becoming popular and likely to be a major factor in reducing traffic congestion and pollution in cities. This title provides commentary on funding, engineering feasibility, public consultation, environmental impact, safety legal aspects and operation, drawing on experience in Europe Tyne and Wear, and London's Docklands.

Exploring the Architecture of Transiting Exoplanetary Systems with High-Precision Photometry Kento Masuda,2018-03-06 This thesis develops and establishes several methods to determine the detailed geometric architecture of transiting exoplanetary systems (planets orbiting around, and periodically passing in front of, stars other than the sun) using high-precision photometric data collected by the Kepler space telescope. It highlights the measurement of stellar obliquity – the tilt of the stellar equator with respect to the planetary orbital plane(s) – and presents methods for more precise obliquity measurements in individual systems of particular interest, as well as for measurements in systems that have been out of reach of previous

methods. Such information is useful for investigating the dynamical evolution of the planetary orbit, which is the key to understanding the diverse architecture of exoplanetary systems. The thesis also demonstrates a wide range of unique applications of high-precision photometric data, which expand the capability of future space-based photometry.

The Exoplanet Handbook Michael Perryman, 2018-08-31 With the discovery of planets beyond our solar system 25 years ago, exoplanet research has expanded dramatically, with new state-of-the-art ground-based and space-based missions dedicated to their discovery and characterisation. With more than 3,500 exoplanets now known, the complexity of the discovery techniques, observations and physical characterisation have grown exponentially. This Handbook ties all these avenues of research together across a broad range of exoplanet science. Planet formation, exoplanet interiors and atmospheres, and habitability are discussed, providing in-depth coverage of our knowledge to date. Comprehensively updated from the first edition, it includes instrumental and observational developments, in-depth treatment of the new Kepler mission results and hot Jupiter atmospheric studies, and major updates on models of exoplanet formation. With extensive references to the research literature and appendices covering all individual exoplanet discoveries, it is a valuable reference to this exciting field for both incoming and established researchers.

Industrial Engineering and Operations Management I João Reis,Sandra Pinelas,Nuno Melão,2019-04-13 Based on the 2018 International Joint Conference on Industrial Engineering and Operations Management (IJCIEOM) conference that took place in Lisbon, Portugal, this proceedings volume is the first of two focusing on mathematical applications in digital transformation. The different contributions in this volume explore topics such as modelling, simulation, logistics, innovation, sustainability, health care, supply chain, lean manufacturing, operations management, quality and digital. Written by renowned scientists from around the world, this multidisciplinary volume serves as a reference on industrial engineering and operations management and as a source on current findings for researchers and students aiming to work on industrial-related problems.

Densifying the City? Margot Rubin,Alison Todes,Philip Harrison,Alexandra Appelbaum,2020-11-27 Providing an in-depth exploration of the complexities of densification policy and processes, this book brings the important experiences of densification in Johannesburg into conversation with a range of cities in Africa, the BRICS countries and the Global North. It moves beyond the divisive debate over whether densification is good or bad, adding nuance and complexity to the calls from multilateral organisations for densification as a key urban strategy.
