The Spoken Language Translator Manny Rayner,2000-08-28 This book describes the Spoken Language Translator (SLT), one of the first major projects in the area of automatic speech translation.

Translation and Technology Chiew Kin Quah,2006-04-12 Chiew Kin Quah draws on years of academic and professional experience to provide an account of translation technology, its applications and capabilities.

Major developments from North America, Europe and Asia are described, including developments in uses and users of the technology.

A Voyage Round the World, 2 vols. George Forster,2000-01-01 George Forster's A Voyage Round the World presents a wealth of geographic, scientific, and ethnographic knowledge uncovered by Cook's second journey of exploration in the Pacific (1772-1775). Accompanying his father, the ship's naturalist Johann Reinhold Forster, on the voyage, George proved a knowledgeable and adept observer. The lively, elegant prose and critical detail of his account, based loosely on his father's journal, make it one of the finest works of eighteenth-century travel literature and an account of prime importance in the history of European contact with Pacific peoples. The Forsters' publications reveal the sophistication and enthusiasm they brought to their observation of Polynesian peoples as well as a sensitivity to the moral ambiguities of contact. The two volumes of George Forster's work include substantially richer descriptions of encounters with island inhabitants than either his father's classic work (Observations Made during a Voyage round the World, UH Press, 1996) or Cook's official narrative, and its confident, even visionary, style incorporates a good deal of polemic, particularly in its criticism of the treatment of islanders by Cook's crew. In addition to the range and depth of its anthropological considerations, it provides a thrilling account of life aboard one of Cook's vessels. In its author's German translation, this work becomes a classic of natural history writing, but its original English version has long been neglected by anglophone scholars. This new scholarly edition makes this important book readily available for the first time since its initial publication more than two centuries ago. But it also presents the work in fresh terms, making it more accessible and relevant to a contemporary audience. The valuable introduction and annotations draw on the wide range of anthropological and ethnohistorical scholarship published since the 1960s and contextualize the book in relation to both the cultures of Oceania documented by the Forsters and the history of European voyaging in the Pacific. Appendixes include a translation of the introduction to the German edition and the polemical pamphlets by George Forster and the ship's astronomer William Wales, in which some of the book's more controversial claims were debated. A Voyage Round the World brings the disciplines of history and anthropology to bear on Cook's voyages in an illuminating and readable fashion. This edition will help complete the corpus of basic documents on Cook's voyages--a crucial resource for researchers in cultural, Pacific, and maritime history; archaeologists, anthropologists, and art historians; and most recently for scholars engaged in revisionist interpretations of eighteenth-century exploration and colonization.

Speech-to-Speech Translation Yutaka Kidawara,Eiichiro Sumita,Hisashi Kawai,2019-11-22 This book provides the readers with retrospective and prospective views with detailed explanations of component technologies, speech recognition, language translation and speech synthesis. Speech-to-speech translation system (S2S) enables to break language barriers, i.e., communicate each other between any pair of person on the globe, which is one of extreme dreams of humankind. People, society, and economy connected by S2S will demonstrate explosive growth without exception. In 1986, Japan initiated basic research of S2S, then the idea spread world-wide and were explored deeply by researchers during three decades. Now, we see S2S application on smartphone/tablet around the world. Computational resources such as processors, memories, wireless communication accelerate this computation-intensive systems and accumulation of digital data of speech and language encourage recent approaches based on machine learning. Through field experiments after long research in laboratories, S2S systems are being well-developed and now ready to utilized in daily life. Unique chapter of this book is end-2-end evaluation by comparing system's performance and human competence. The effectiveness of the system would be understood by the score of this evaluation. The book will end with one of the next focus of S2S will be technology of simultaneous interpretation for lecture, broadcast news and so on.

Translation and History Theo Hermans,2022-07-07 This concise and accessible textbook is a comprehensive introduction to the key historical aspects of translation. Six chapters cover essential concepts in researching and writing the history of translation and translation as history. Theo Hermans presents and explains fundamental issues and questions in a clear and lively style. He includes numerous examples and case studies and offers suggestions for further reading. Four of the six chapters take their cue from ideas about historiography that are alive among professional historians. They pay attention to the role of narrative, to the emergence of transnational, transcultural, global and entangled history, and to particular fields such as the history of concepts and memory studies. Other topics include microhistory, actor-network theory and book history. With an emphasis on methodology, how to do research in translation history and how to write it up, this is an essential text for all courses on translation history and will be of interest to anyone working in translation theory and methodology.

Introduction to Google Translate Gilad James, PhD, Google Translate is a multilingual translation service provided by Google. It allows users to translate words, phrases, and entire documents between multiple languages. The service was launched in April 2006 and has since been constantly updated to provide more accurate translations. Initially offering translations in only two languages, Google Translate now supports over 100 languages. The translation process works by analyzing the text or document input by the user, breaking it up into smaller segments, and then using statistical algorithms to match these segments with translations from its database. Google Translate has been a helpful tool for people to communicate across different languages, whether it be for business or personal use. However, it must be noted that automated translations often carry a high risk of inaccuracies due to the complexities inherent in language and the nuances of different cultures and contexts. It is always recommended to use translations as a starting point, and then have a native speaker review and refine the language to ensure accuracy.

LinkedIn facilitates both, allowing you to broaden your reach without leaving your desk. Teach Yourself VISUALLY LinkedIn helps you get on board today.

Cross-Language Information Retrieval and Evaluation Carol Peters,2003-06-29 The first evaluation campaign of the Cross-Language Evaluation Forum (CLEF) for European languages was held from January to September 2000. The campaign cul- nated in a two-day workshop in Lisbon, Portugal, 21 22 September, immediately following the fourth European Conference on Digital Libraries (ECDL 2000). The first day of the workshop was open to anyone interested in the area of Cross-Language Information Retrieval (CLIR) and addressed the topic of CLIR system evaluation. The goal was to identify the actual contribution of evaluation to system development and to determine what could be done in the future to stimulate progress. The second day was restricted to participants in the CLEF 2000 evaluation campaign and to their - periments. This volume constitutes the proceedings of the workshop and provides a record of the campaign. CLEF is currently an activity of the DELOS Network of Excellence for Digital - braries, funded by the EC Information Society Technologies to further research in digital library technologies. The activity is organized in collaboration with the US National Institute of Standards and Technology (NIST). The support of DELOS and NIST in the running of the evaluation campaign is gratefully acknowledged. I should also like to thank the other members of the Workshop Steering Committee for their assistance in the organization of this event.

Audiovisual Translation Frederic Chaume,2020-11-28 Audiovisual Translation: Dubbing is an introductory textbook that provides a solid overview of the world of dubbing and is fundamentally interactive in approach. A companion to Audiovisual Translation: Subtitling, it follows a similar structure and is accompanied by downloadable resources. Based on first-hand experience in the field, the book combines translation practice with other related tasks – usually commissioned to dialogue writers and dubbing assistants – thus offering a complete introduction to the field of dubbing. It develops diversified skills, presents a broad picture of the industry, engages with the various controversies in the field, and challenges prevailing stereotypes. The individual chapters cover the map of dubbing in the world, the dubbing market and professional environment, text segmentation into takes or loops, lip-syncing, the challenge of emulating oral discourse, the semiotic nature of audiovisual texts, and specific audiovisual translation issues. The book further raises a number of research questions and looks at some of the unresolved challenges of this very specific form of translation. It includes graded exercises covering core skills that can be practised in class or at home, individually or collectively. The accompanying downloadable resources contain sample film material in Dutch, English, French, Italian and Spanish, as well as a range of useful material related to professional practice.
