Translation Excellence Marilyn Gaddis Rose, 1987-01-01 This inaugural volume transcends its archival value. Indeed, taken as a whole, the essays pose a provocation for both translation practice and theory. The criteria proposed and the issues examined remain the same. Absolute excellence, however, continues to move beyond the horizon, and changes in technology and taste inevitably change both the implementation of the criteria and the evaluation of the issues. The attendant ambiguities may stem from a parenthesis in the volume: does excellence lie in the X-factor that elusive quality which renders one translation clearly superior to others?

Code of Federal Regulations, 2001 Special edition of the Federal Register, containing a codification of documents of general applicability and future effect ... with ancillaries.

International Reflections on the Netherlands Didactics of Mathematics Marja van den Heuvel-Panhuizen, 2019-08-13 This open access book, inspired by the ICME 13 Thematic Afternoon on "European Didactic Traditions", takes readers on a journey with mathematics education researchers, developers and educators in eighteen countries, who reflect on their experiences with Realistic Mathematics Education (RME), the domain-specific instruction theory for mathematics education developed in the Netherlands since the late 1960s. Authors from outside the Netherlands discuss what aspects of RME appeal to them, their criticisms of RME and their past and current RME-based projects. It is clear that a particular approach to mathematics education cannot simply be transplanted to another country. As such, in eighteen chapters the authors describe how they have adapted RME to their individual circumstances and view on mathematics education, and tell their personal stories about how RME has influenced their thinking on mathematics education.
