Free The Children Craig Kielburger,2010-07-01 This is the story that launched a movement. At only 12 years old, Craig Kielburger was shocked to discover the realities of child labour faced by kids his own age throughout the developing world. Driven to take action and witness these conditions first-hand, he and his trusted mentor Alam embarked on a journey that would take him to places he'd never imagined. Free the Children recounts Craig's remarkable odyssey across South Asia, meeting some of the world's most disadvantaged children and learning the truth behind the headlines. Be there with him as he explores slums and sweatshops, fighting to rescue children from the chains of inhumane conditions. Along the way, he makes lasting friendships, enjoys wild adventures and launches the movement that would explode into an international sensation. Winner of the prestigious Christopher Award, presented to books which affirm the highest values of the human spirit, Free the Children has been translated into eight languages and served as inspiration for thousands of young people around the world.

Social Isolation in Modern Society Roelof Hortulanus,Anja Machielse,Ludwien Meeuwesen,2006-06-28 Social isolation has serious repercussions for people and communities across the globe, yet knowledge about this phenomenon has remained rather limited – until now. The first multidisciplinary study to explore this issue, Social Isolation in Modern Society integrates relevant research traditions in the social sciences and brings together sociological theories of social networks and psychological theories of feelings of loneliness. Both traditions are embedded in research, with the results of a large-scale international study being used to describe the extent, nature and divergent manifestations of social isolation. With a new approach to social inequality, this empirically based study includes concrete policy recommendations, and presents a clear insight into personal, social and socio-economic causes and the consequences of social isolation.

All Roads Lead to Congress Costas Panagopoulos,Joshua Schank,2008 This text drives students through one piece of legislation--the surface transportation bill--showing the maneuvering and negotiating that go on among members of Congress and their staffers as they haggle over a huge pot of money. The bill provides an example of both sides of the domestic legislative coin, as members of Congress formulating the bill fight over both policy issues (mostly along party lines) and money (mostly along regional lines). While working on the Hill, the authors were able to follow the path of this legislation from inception to law, observing firsthand the twists and turns of its journey. In recounting that journey, this book also explains the various rules that structure legislation, the leadership styles and strategies at play, the tensions among levels of government, and the impact of the executive.

Disrupting Logistics Christian Wurst, Luca Graf, 2021-01-29 This book presents trends, developments, and examples of how digital disruption is currently reshaping the logistics industry. Logistics is the invisible force behind the global economy, influencing and providing a lens into all economic activities. Chapters written by respected experts in the field describe how new technologies such as autonomous vehicles, blockchain, Internet of things (IoT), and state-of-the-art freight management solutions are fundamentally changing supply chain solutions. Special emphasis is placed on promising start-ups and venture capital firms around the world that are now investing in the future of logistics. Supply chains hold significant room for optimization to the benefit of customers, industry participants, authorities and the environment. This book provides a unique set of perspectives from industry leaders covering a wide range of topics. It is a ‘must read’ for anyone seeking to understand and contribute to a better tomorrow in supply chains logistics. – Thomas Bagge, Chief Executive Officer and Statutory Director DCSA “The need for standardisation and digitalisation in logistics is no longer an option. This book gives insights from industry experts, shows trends and innovations in platforms, underlines the need for transparency and how big data and analytics can make a world of difference. It’s an incredible resource if you wish to better understand the new normal of logistics.” – Global Chief Digital & Information Officer, MSC Mediterranean Shipping Company This book presents readers with a straightforward and comprehensive assessment of supply chain innovation and trends and their impact on the industry. With contributions from several industry leaders, it provides critical knowledge and insight that supply chain and logistics managers need to implement disruptive technologies strategically.” – Rene Jacquat, Founder / Advisor, LogiChain Solutions

American Secret Projects 1 Tony Buttler, Alan Griffith (Military aircraft researcher), 2016-04-07 Featuring the obscure, the unusual, the unbuilt and the unseen. The secret is out - Secret Projects is back. This is a new title in this highly acclaimed series, this time looking at concepts developed by the US aircraft industry in the years immediately prior to and during World War 2. This book includes and describes the major fighter and bomber proposals from the American aircraft industry which embrace various fighter and interceptor concepts, medium, heavy and intercontinental bombers, attack aircraft and anti-submarine aircraft, both for the USAF and US Navy. Particular emphasis is placed on 'Circular Proposals' - a system of submitting designs against requirements circulated around the industry by the Army Air Force in the 1930s and early 1940s. The illustrations show drawings and photographs of unbuilt designs merged with the history and photographs of real aeroplanes. Very little has been published previously about American projects from this time period and much of the material will not have been seen widely before. It will therefore be fascinating reading for all lovers of the previously highly successful 'Secret Projects' series and aviation historians.
