Touring China Yajun Mo, 2021-12-15 In *Touring China*, Yajun Mo explores how early twentieth century Chinese sightseers described the destinations that they visited, and how their travel accounts gave Chinese readers a means to imagine their vast country. The roots of China's tourism market stretch back over a hundred years, when railroad and steamship networks expanded into the coastal regions. Tourism-related businesses and publications flourished in urban centers while scientific exploration, investigative journalism, and wartime travel propelled many Chinese from the eastern seaboard to its peripheries. Mo considers not only accounts of overseas travel and voyages across borderlands, but also trips within China. On the one hand, via travel and travel writing, the unity of China's coastal regions, inland provinces, and western frontiers was experienced and reinforced. On the other, travel literature revealed a persistent tension between the aspiration for national unity and the anxiety that China might fall apart. *Touring China*

tells a fascinating story about the physical and intellectual routes people took on various journeys, against the backdrop of the transition from Chinese empire to nation-state.

The Practice of Sustainable Tourism Michael Hughes, David Weaver, Christof Pforr, 2015-06-19 Sustainable tourism is a widely used term that has accumulated considerable attention from researchers and policy makers over the past two decades. However, there is still an apparently wide gap between theory and practice in the area. Recent scholarly research has tended to focus on niche areas of alternative tourism rather than address the broader issues and vagaries and paradoxes that appear to plague the broader notion of sustainable tourism. As such, there is a need for a new and pragmatic analysis of sustainable tourism as an overarching idea and how this manifests in practice. The Practice of Sustainable Tourism fulfils this need by offering a fresh perspective on sustainable tourism as an umbrella concept with inherent tensions. It presents a way of thinking about tourism based on the notion of finding common ground using the dialectic tradition of philosophy. Dialectics focusses on resolving opposing viewpoints by recognising they have common elements that can be combined into a rational and practical solution over time. As part of this approach, the book examines the strongly apparent tensions within alternative

tourism as well as the paradox of continuing growth and other mass tourism related issues. It is divided into three parts, Part I includes chapters discussing the general concept of sustainable tourism, its history, current status and possible futures; Part II includes a range of destination case studies exploring how sustainable tourism has been applied and Part III includes perspectives from the tourism operator view. Given the international content and challenging themes, the book will be appealing internationally to students, researchers and academics in the fields of tourism, geography, sustainability and social science.
