Turkish Guest Workers in Germany Jennifer A. Miller,2018-04-13 Turkish Guest Workers in Germany tells the post-war story of Turkish guest workers, whom West German employers recruited to fill their depleted ranks. Jennifer A. Miller's unique approach starts in the country of departure rather than the country of arrival and is heavily informed by Turkish-language sources and perspectives. Miller argues that the guest worker program, far from creating a parallel society, involved constant interaction between foreign nationals and Germans. These categories were as fluid as the Cold War borders they crossed. Miller's extensive use of archival research in Germany, Turkey and the Netherlands examines the recruitment of workers, their travel, initial housing and work engagements, social lives, and involvement in labour and religious movements. She reveals how contrary to popular misconceptions, the West German government attempted to maintain a humane, foreign labour system and the workers themselves made crucial, often defiant, decisions. Turkish Guest Workers in Germany identifies the Turkish guest worker program as a postwar phenomenon that has much to tell us about the development of Muslim minorities in Europe and Turkey's ever-evolving relationship with the European Union.

TURKEY ENERGY OUTLOOK 2020 Prof. Carmine Difiglio, Bora Şekip Güray, Ersin Merdan, 2020-11-11 The Turkey Energy Outlook (TEO) proposes energy policies to further improve energy security, increase use of domestic energy resources, advance energy efficiency, build clean energy infrastructure, develop a more competitive energy market with cost-reflective energy pricing and also to support all necessary steps towards achieving a sustainable energy system in Turkey. The main themes include increased energy efficiency, higher use of renewable energy, improving electricity and natural gas markets, building Turkey's first nuclear power plants, increased energy technology R&D and continuing and expanding the recent efforts to discover and produce more natural gas and oil. Turkey's per capita energy and electricity consumption are less than half of the OECD average. As a country that is still developing, compared to Turkey's OECD peers, the growth of energy services per capita will be much higher. This is necessary to accommodate increasing incomes, population growth, industrialization, urbanization, increased mobility and wider access to modern energy services. The Turkey Energy Outlook (TEO) provides an independent assessment of changing technological opportunities and policy priorities to secure an efficient, competitive and sustainable energy future. Two TEO Scenarios quantify the consequences of two different policy pathways out to 2040.
