Troubled Asset Relief Program U.s. Government Accountability Office,2017-08-15 The Department of the Treasury's(Treasury) authority to purchase,commit to purchase, or commit to guarantee troubled assets was set to expire on December 31, 2009.This important authority has allowed Treasury to undertake a number of programs to help stabilize the financial system. In December 2009, the Secretary of the Treasury extended the authority to October 3, 2010. In our October 2009 report on the Troubled Asset Relief Program(TARP), GAO suggested as part of a framework for decision making that Treasury should coordinate with relevant federal agencies, communicate with Congress and the public, and link the decisions related to the next phase of the TARP program to quantitative analysis. This report discusses (1) the process Treasury used to decide to extend TARP and the extent of coordination with relevant agencies and (2) the analytical framework and quantitative indicators Treasury used to decide to extend TARP. To meet the report objectives, GAO reviewed key documents related to the decision to extend TARP, interviewed agency officials and analyzed financial data.

Borrowing Through the U.S. Treasury's "Fast Money Tree" Dr. Michael William Sunner,2012-07-27 The continuing U.S. Government's debt ceiling crisis is an anomaly characterized by a dysfunctional Congress that previously approved the budgetary expenditures for a multitude of government programs that now requires that same body to approve raising the ceiling to pay for those same program expenditures. The U.S. Treasury then dutifully raises the necessary cash to pay these bills and maturing debt through selling (auctioning) an ample supply of various marketable debt securities (bills, notes, bonds and TIPS) through Treasury's Fast Money Tree. Treasury's goal is to sell or auction its securities at the lowest possible cost to the taxpayer in order to finance the U.S. government's operations and make up the difference between government revenues (taxes, fees, etc.), and the actual program costs. To accomplish this essential mission, Treasury sells (through approximately 280-300 auctions each year) approximately \$7 to \$8 trillion in marketable debt in the global financial markets to 21 Primary Dealers and over 200 other entities that include foreign central banks and hundreds of thousands of retail investors through a remarkably fast, efficient, and robust electronic system - the Treasury Automated Auction System (TAAPS), which I refer to as the Fast Money Tree. Simply put, Republicans want to decrease government borrowing and spending without raising taxes to stimulate economic growth, and Democrats want to also decrease government borrowing and spending, while increasing revenues (e.g., taxes on the very wealthy and ensuring that everyone pay their fair share of taxes. This book also argues for a sensible balance between spending cuts and increased revenues in order to promote economic growth. In any case, the Fast Money Tree must persist in carrying out its essential mission to raise the cash needed so the U.S. Government's essential government operations can continue unabated.

Treasury's War Juan Zarate,2013-09-10 For more than a decade, America has been waging a new kind of war against the financial networks of rogue regimes, proliferators, terrorist groups, and criminal syndicates. Juan Zarate, a chief architect of modern financial warfare and a former senior Treasury and White House official, pulls back the curtain on this shadowy world. In this gripping story, he explains in unprecedented detail how a small, dedicated group of officials redefined the Treasury's role and used its unique powers, relationships, and reputation to apply financial pressure against America's enemies. This group unleashed a new brand of financial power -- one that leveraged the private sector and banks directly to isolate rogues from the international financial system. By harnessing the forces of globalization and the centrality of the American market and dollar, Treasury developed a new way of undermining America's foes. Treasury and its tools soon became, and remain, critical in the most vital geopolitical challenges facing the United States, including terrorism,

nuclear proliferation, and the regimes in Iran, North Korea, and Syria. This book is the definitive account, by an unparalleled expert, of how financial warfare has taken pride of place in American foreign policy and how America's competitors and enemies are now learning to use this type of power themselves. This is the unique story of the United States' financial war campaigns and the contours and uses of financial power, and of the warfare to come.

Troubled Asset Relief Program Government Accountability Office,2017-08-08 As part of its Auto Industry Financing Program (AIFP), funded through the Troubled Asset Relief Program (TARP), Treasury committed \$67.3 billion to automaker GM and to Ally Financial, a large bank holding company whose primary business is auto lending. TARP's authorizing legislation mandates that GAO report every 60 days on TARP activities. This report examines (1) the current financial condition of the two companies and (2) the status of Treasury's investments in the companies and its plans to sell those investments. To examine the financial condition of GM and Ally Financial, GAO reviewed industry, financial, and regulatory data for the time period from the beginning of 2008 through the second quarter of 2013. GAO also reviewed Treasury reports and documentation detailing Treasury's investments in GM and Ally Financial and its proposed strategies for divesting itself of the investments, as well as both companies' financial filings and reports. In addition, GAO interviewed officials from Treasury, the Board of Governors of the Federal Reserve (Federal Reserve), GM, Ally Financial, and financial analysts who study GM and Ally Financial. In its written comments on a draft of this report, Treasury describes the auto industry's recovery and the progress Treasury has made in unwinding its investments in GM and Ally Financial. Treasury, the Federal Reserve, GM, and Ally Financial also provided

The Rest of the World's Dollar-Weighted Return on U.S. Treasuries Zhengyang Jiang,2022 Since 1980, foreign investors have timed their purchases and sales of U.S. Treasuries to yield particularly low returns. Their annual dollar-weighted returns, measured by IRRs, are around 3% lower than a buy-and-hold strategy over the same horizon. In comparison, the IRRs achieved by domestic investors are at least 1% higher, while the IRRs achieved by the Federal Reserve are similarly low. Our results are consistent with theories where foreign investors are price-inelastic buyers of safe dollar assets, which provide them with convenience services.

Green Book U.s. Department of the Treasury,2015-12-28 Welcome to the Green Book a comprehensive guide for financial institutions that receive ACH payments from the Federal government. Today, the vast majority of Federal payments are made via the ACH. With very few exceptions, Federal government ACH transactions continue to be subject to the same rules as private industry ACH payments. As a result, the Green Book continues to get smaller in size and is designed to deal primarily with exceptions or issues unique to Federal government operations.

When Genius Failed Roger Lowenstein,2001-10-09 “A riveting account that reaches beyond the market landscape to say something universal about risk and triumph, about hubris and failure.”—The New York Times **NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BUSINESSWEEK** In this business classic—now with a new Afterword in which the author draws parallels to the recent financial crisis—Roger Lowenstein captures the gripping roller-coaster ride of Long-Term Capital Management. Drawing on confidential internal memos and interviews with dozens of key players, Lowenstein explains not just how the fund made and lost its money but also how the personalities of Long-Term's partners, the arrogance of their mathematical certainties, and the culture of Wall Street itself contributed to both their rise and their fall. When it was founded in 1993, Long-Term was hailed as the most impressive hedge fund in history. But after four years in which the firm dazzled Wall Street as a \$100 billion moneymaking juggernaut, it suddenly suffered catastrophic losses that jeopardized not only the biggest banks on Wall Street but the stability of the financial system itself. The dramatic story of Long-Term's fall is now a chilling harbinger of the crisis that would strike all of Wall Street, from Lehman Brothers to AIG, a decade later. In his new Afterword, Lowenstein shows that LTCM's implosion should be seen not as a one-off drama but as a template for market meltdowns in an age of instability—and as a wake-up call that Wall Street and government alike tragically ignored. Praise for *When Genius Failed* “[Roger] Lowenstein has written a squalid and fascinating tale of world-class greed and, above all, hubris.”—BusinessWeek “Compelling . . . The fund was long cloaked in secrecy, making the story of its rise . . . and its ultimate destruction that much more fascinating.”—The Washington Post “Story-telling journalism at its best.”—The Economist

Trading at the Speed of Light Donald MacKenzie,2023-01-31 A remarkable look at how the growth, technology, and politics of high-frequency trading have altered global financial markets In today's financial markets, trading floors on which brokers buy and sell shares face-to-face have increasingly been

replaced by lightning-fast electronic systems that use algorithms to execute astounding volumes of transactions. Trading at the Speed of Light tells the story of this epic transformation. Donald MacKenzie shows how in the 1990s, in what were then the disreputable margins of the US financial system, a new approach to trading—automated high-frequency trading or HFT—began and then spread throughout the world. HFT has brought new efficiency to global trading, but has also created an unrelenting race for speed, leading to a systematic, subterranean battle among HFT algorithms. In HFT, time is measured in nanoseconds (billionths of a second), and in a nanosecond the fastest possible signal—light in a vacuum—can travel only thirty centimeters, or roughly a foot. That makes HFT exquisitely sensitive to the length and transmission capacity of the cables connecting computer servers to the exchanges' systems and to the location of the microwave towers that carry signals between computer datacenters. Drawing from more than 300 interviews with high-frequency traders, the people who supply them with technological and communication capabilities, exchange staff, regulators, and many others, MacKenzie reveals the extraordinary efforts expended to speed up every aspect of trading. He looks at how in some markets big banks have fought off the challenge from HFT firms, and how exchanges sometimes engineer technical systems to favor certain types of algorithms over others. Focusing on the material, political, and economic characteristics of high-frequency trading, Trading at the Speed of Light offers a unique glimpse into its influence on global finance and where it could lead us in the future.

Small Business Lending Fund U.S. Government Accountability Office, 2017-08-10 The Small Business Jobs Act of 2010 aimed to stimulate job growth by establishing the Small Business Lending Fund program (SBLF) within the U.S. Department of the Treasury (Treasury), among other activities. The SBLF program was designed to encourage community banks and community development loan funds with assets of less than \$10 billion to increase their lending to small businesses. The act also requires GAO to audit SBLF annually. This initial report examines (1) Treasury's procedures for evaluating applications for SBLF funds, (2) characteristics of institutions that applied for and received funds from SBLF and factors that influenced banks' decision to participate, and (3) Treasury's plans to monitor participants and measure SBLF's progress in increasing small business lending. GAO reviewed documents on Treasury's procedures and controls; analyzed data on applicants; compared SBLF banks with a peer group of nonparticipating banks; surveyed a representative sample of banks (for a weighted response rate of 66 percent); and interviewed Treasury, federal banking regulators, and representatives from industry associations.

State Small Business Credit Initiative U.s. Government Accountability Office,2017-08-11 Congress enacted the Small Business Jobs Act of 2010 in September 2010 in response to concerns that small businesses have been unable to access capital that would allow them to create jobs. Among other things, the act aims to stimulate job growth by establishing the \$1.5 billion State Small Business Credit Initiative (SSBCI) within the Department of the Treasury (Treasury) to strengthen state and territory (state) programs that support lending to small businesses and small manufacturers. Participating states are expected to leverage the SSBCI funds to generate an amount of private financing and investment at least 10 times the amount of their SSBCI funds (that is, a leverage ratio of 10:1). The act also requires GAO to audit SSBCI annually. Accordingly, this report examines (1) which states applied for SSBCI funds and the planned uses of those funds; (2) Treasury's implementation of SSBCI; and (3) Treasury's efforts to measure whether SSBCI achieves its goals. GAO surveyed state SSBCI applicants (for a 100 percent response rate), analyzed data from Treasury case files, and interviewed officials from Treasury and eight participating states.
