The Trend Management Toolkit A. Kjaer,2014-10-07 In a fast moving world, businesses need to keep up with data analysis and pattern spotting to identify future opportunities. Anne Lise Kjaer presents a unique methodology for global trend spotting along with practical tools and approaches to help companies and organizations analyse market changes and determine the way ahead.

Private Banking and Wealth Management Futures 2030 Jörn H Bühring,2021-06-18 This book engages the reader around different perspectives between forecasting and foresight in strategic design, drawing insights derived from a futures study that can be applied in form of a design-inspired foresight approach for designers and interdisciplinary innovation teams increasingly called upon to help envisage preferable futures. Demonstrating this process in applied research, the book describes a 2016 Financial Services industry futures study to the year 2030. An industry increasingly at risk in dealing with uncertainty, the Financial Services sector, is a core pillar of economic activity in most markets, such as greater China, and inherent within are major drivers of change linked to consumer behaviors, new technology and disruptive business models. While the financial services industry exemplifies an ideal case for design-inspired foresight, the aims of this book are primarily to establish the peculiarities between traditional forecasting applications and a design-inspired foresight visioning approach as strategic design activities for selecting preferable futures. Underlining the contribution of this book is the value of design futures thinking as a creative and divergent thought process, which has the potential to respond to the much broader organizational reforms needed to sustain in today's rapidly evolving business environment.

Global Trends Compendium Edoardo Monaco,2023-02-03 This Compendium was conceived as a “pocket compass”, a practical guide that may help readers to orientate themselves while they explore global affairs and attempt to make sense of the highly interconnected, multidimensional challenges of contemporary human development. The book is intended to be an accessible, concise, yet comprehensive reference for anyone who hopes to better understand today's world and its dramatic complexity. The aim is to highlight a relevant selection of the demographic, socio-economic, geo-political, and environmental macro-dynamics that define our time, and to explore in a practical way the indicators that can be used to monitor their evolution over time. In general, this project stems from the need to apply “systemic thinking” to the study of the world and to develop a holistic perspective that can bridge the gap that for too long has existed across academic disciplines and their respective focuses. The macro-trends featured in the book shed light, in particular, on the change that has been occurring over time in the vast Global South – a portion of the globe that accounts for over 80% of the world's total population. The book's ultimate – although not exclusive – target audience is undoubtedly composed of undergraduate students of subjects such as political science, international affairs, international development, human geography and the like. In addition, the Compendium may benefit professionals in both public and private organisations as well as members of the general public seeking to acquire global development literacy in manners that are academically sound, but also accessible and concise.

The Internet of Things Ulrich Sendler,2017-11-16 Industrie 4.0 and the Internet of Things have been positioned on the international stage as important initiatives of a promising future: Who is dealing in data from the digital factory? Germany has its “Plattform Industrie 4.0”, China “Made in China 2025” and the USA the “Industrial Internet Consortium”. Who is leading the fourth industrial revolution? The digitalization of industry is changing the global economy and society. Technology is supplying the opportunities to do so. Humans must decide just how far artificial intelligence should go, and what machines should learn – to create new and improved work instead of fewer jobs. In addition to Ulrich Sendler and eight German industry and research experts, the CEO of Xinhuanet in Beijing has also contributed to this book.

Global Intelligence Oversight Zachary K. Goldman,Samuel J. Rascoff,2016-04-26 In a world that is increasingly unstable, intelligence services like the American CIA and the United Kingdom's MI6 exist to deliver security. Whether the challenge involves terrorism, cyber-security, or the renewed specter of great power conflict, intelligence agencies mitigate threats and provide decisional advantage to national leaders. But empowered intelligence services require adequate supervision and oversight, which must be about more than the narrow (if still precarious) task of ensuring the legality of covert operations and surveillance activities. Global Intelligence Oversight is a comparative investigation of how democratic countries can govern their intelligence services so that they are effective, but operate within frameworks that are acceptable to their people in an interconnected world. The book demonstrates how the institutions that oversee intelligence agencies participate in the protection of national security while safeguarding civil liberties, balancing among competing national interests, and building public trust in inherently secret activities. It does so by analyzing the role of courts and independent oversight bodies as they operate in countries with robust constitutional frameworks and powerful intelligence services. The book also illuminates a new transnational oversight dynamic that is shaping and constraining security services in new ways. It describes how global technology companies and litigation in transnational forums constitute a new form of oversight whose contours are still undefined. As rapid changes in technology bring the world closer together, these forces will complement their more traditional counterparts in ensuring that intelligence activities remain effective, legitimate, and sustainable.

The Global Supply Chain Wolfgang Lehmacher,2017-01-28 This book provides readers an in-depth understanding of the inner mechanisms and principles of the global supply chain. Authored by the Head of Supply Chain and Transport Industries at the World Economic Forum, it draws on a wealth of operational and managerial expertise in the global supply chain industry that drive the world's economies. The book analyzes the importance and impact of globally networked sourcing, production and distribution, and presents detailed information on the opportunities, limitations and challenges of linear value and supply chain systems. Building on a series of recent industry cases and with a focus on the latest developments in actual business processes and models, it reveals how the transformation toward circular supply chains and regenerative resource management forms the basis for success and sustainability in business. “The book brings together technical, social, political, and geographical trends, suggesting how supply chain management can lead the quest for many of the world's most pressing challenges.” Yossi Sheffi, Professor of Engineering, MIT, Head, MIT Center for Transportation and Logistics “This book provides an essential roadmap, guiding the reader easily through complex developments and concepts.” John Manners-Bell, CEO Transport Intelligence and Honorary Visiting Professor, Guildhall Business School, London “With strategic foresight, Lehmacher develops a vision of a circular economy within which consumer, manufacturer and logistics companies assume collective responsibility for sustainable value creation.” Alfred Talke, Group Managing Director ALFRED TALKE Logistic Services “Those who are active in logistics and supply chain management, in practice or academia, will discover a fresh view on the whole field of activity beyond the day-to-day-business.” Prof. Dr.-Ing. Thomas Wimmer, Chairman of the Executive Board, BVL International

The Sustainable City IX N. Marchettini,C.A. Brebbia,R. Pulselli,S. Bastianoni,2014-09-23 Containing the proceedings of the 9th International Conference on Urban Regeneration and Sustainability this book addresses the multi-disciplinary aspects of urban planning; a result of the increasing size of cities; the amount of resources and services required and the complexity of modern society. Most of earth's population now lives in cities and the process of urbanisation still continues generating many problems deriving from the drift of the population towards them. These problems can be resolved by cities becoming efficient habitats, saving resources in a way that improves the quality and standard of living. The process however, faces a number of major challenges, related to reducing pollution, improving main transportation and infrastructure systems. New urban solutions are required to optimise the use of space and energy resources leading to improvements in the environment, i.e. reduction in air, water and soil pollution as well as efficient ways to deal with waste generation. These challenges contribute to the development of social and economic imbalances and require the development of new solutions. Large cities are probably the most complex mechanisms to manage. However, despite such complexity they represent a fertile ground for architects, engineers, city planners, social and political scientists, and other professionals able to conceive new ideas and time them according to technological advances and human requirements. The challenge of planning sustainable cities lies in considering their dynamics, the exchange of energy and matter, and the function and maintenance of ordered structures directly or indirectly, supplied and maintained by natural systems. Topics covered include: Urban strategies; Planning, development and management; Urban conservation and regeneration; The community and the city; Eco-town planning; Landscape planning and design; Environmental management; Sustainable energy and the city; Transportation; Quality of life; Waterfront development; Case studies; Architectural issues; Cultural heritage issues; Intelligent

environment and emerging technologies; Planning for risk; Disaster and emergency response; Safety and security; Waste management; Infrastructure and society; Urban metabolism.

Leadership 2030 Georg Vielmetter,Yvonne Sell,2014-02-06 The tumultuous changes in the business world during the last decade have forced too many to focus on the short term, rushing to figure out how to produce quarterly profits in chaotic conditions. As a result, the longer view is often obscured, leaving businesses so busy fighting today's battles that they are completely unprepared for tomorrow's war. The next cataclysmic wave is surging relentlessly ahead, demanding leaders who can steer their companies through complexity and change. In Leadership 2030, six megatrends are uncovered for the forward-thinking leader that will dramatically impact organizations' markets, cultures, systems, and processes: 1. Globalization 2.0: Asia dominates the global economy. 2. Climate change: Sustainability becomes imperative. 3. Individualism: Freedom of choice erodes loyalty. 4. Digitization: Boundaries blur between private and working lives. 5. Demographic changes: Aging populations intensify the talent war. 6. Converging technologies: The sharpest tech shift in history is around the corner. Research findings and case studies, drawn from original research conducted jointly with foresight company Z-Punkt and further analyzed by Hay Group, provide compelling evidence of each megatrend and highlight the skills, capabilities, and attitudes leaders must cultivate in order to maneuver through it all. Tomorrow's changes are coming. With Leadership 2030, you can prepare for them today!

The 21st Century Public Manager Zeger van der Wal,2017-09-15 Truly global in scope and ambition, the 21st Century Public Manager addresses key trends, challenges, and opportunities facing public managers across contexts and regimes. This accessible textbook aims to inspire public managers in rethinking their roles, skills, and values as they enter a VUCA world-one characterized by volatility, uncertainty, complexity, and ambiguity. It is written for aspiring and current public managers in graduate schools and executive education programs.

Globalization and Capitalist Geopolitics Daniel Woodley,2017-11-27 Globalization and Capitalist Geopolitics is concerned with the nature of corporate power against the backdrop of the decline of the West and the struggle by non-western states to challenge and overcome domination of the rest of the world by the West. This book argues that although the US continues to preside over a quasi-imperial system of power based on global military preponderance and financial statecraft, and remains reluctant to recognize the realities global economic convergence, the age of imperial state hegemony is giving way to a new international order characterized by capitalist sovereignty and competition between regional and transnational concentrations of economic power. This title seeks to interrogate the structure of world order by examining leading approaches to globalization and political economy in international relations and international political economy. Breaking with the classical school, Woodley argues that geopolitics should be understood as a transnational strategic practice employed by powerful state actors, which mirrors predatory corporate rivalry for control over global resources and markets, reproducing the structural conditions for corporate power through the transnational state form of capital. In a period of increasing geopolitical insecurity and economic instability this title provides an authoritative yet accessible commentary on debates on capitalism and globalization in the wake of the financial crisis. It is a valuable resource for students and scholars seeking to develop a deeper understanding of the historical determinants of the changing dynamics of neoliberal capitalism and their implications for world order.

Contemporary Digital Forensic Investigations of Cloud and Mobile Applications Kim-Kwang Raymond Choo,Ali Dehghantanha,2016-10-12 Contemporary Digital Forensic Investigations of Cloud and Mobile Applications comprehensively discusses the implications of cloud (storage) services and mobile applications on digital forensic investigations. The book provides both digital forensic practitioners and researchers with an up-to-date and advanced knowledge of collecting and preserving electronic evidence from different types of cloud services, such as digital remnants of cloud applications accessed through mobile devices. This is the first book that covers the investigation of a wide range of cloud services. Dr. Kim-Kwang Raymond Choo and Dr. Ali Dehghantanha are leading researchers in cloud and mobile security and forensics, having organized research, led research, and been published widely in the field. Users will gain a deep overview of seminal research in the field while also identifying prospective future research topics and open challenges. Presents the most current, leading edge research on cloud and mobile application forensics, featuring a panel of top experts in the field Introduces the first book to provide an in-depth overview of the issues surrounding digital forensic investigations in cloud and associated mobile apps Covers key technical topics and provides readers with a complete understanding of the most current research findings Includes discussions on future research directions and challenges

Strategic Innovation in Russia Taco C.R. van Someren,Shuhua van Someren-Wang,2016-09-26 This book presents a radically different approach to innovation aimed at creating new growth cycles for the Russian economy. To better grasp the opportunities hidden behind worldwide megatrends, such as the growing economic prosperity of Asian countries and the importance of the internet-based economy, the authors argue for a reinvention of Russia's innovation strategy. Instead of a purely technology-driven approach, the authors illustrate how the principles of strategic innovation help develop institutional and non-technical innovation, as well as new forms of leadership and entrepreneurship within the Russian business culture. The authors also discuss the impact of strategic innovation on corporate strategies, innovation and economic policy, as well as academic research and development agendas. The book also sheds new light on how cooperation between Russia and the EU, the US and China in the area of innovation can be of mutual benefit.

TURKISH ECONOMIC ASSOCIATION INTERNATIONAL CONFERENCE ON ECONOMICS ICE-TEA 2018 Ercan Uygur,Huseyin Karamelikli,2018-12-31

Given its scope, the book offers a valuable asset for researchers and managers of industrial organizations alike.

Europe's Hidden Potential Burkhard Schwenker,Thomas Clark,2013-01-03 Sandwiched between the US - the sole superpower at the turn of the millennium - and China as the expected next superpower, Europe is rarely discussed as a potential dealer of the 21st century. At best, it is seen as an able follower of trends set by others. At worst, it is regarded as a relic; a kind of vast open-air museum with a rich culture and good food, immersed in a glorious past with limited prospects. Europe's Hidden Potential explores how an 'overlooked and underrated' continent can harness its potential to positively shape the global and economic future. As the world is looking for an alternative leader, this book shows how Europe can - and ought to - lead the way once more.

Impact Assessment in Tourism Economics Álvaro Matias,Peter Nijkamp,João Romão,2016-04-30 This book presents a series of studies on the socio-economic impacts of tourism, with a special focus on the determinants of tourism competitiveness at the destination level. The authors offer a systematic overview of this important issue, presenting relevant empirical studies from different parts of the world, based on modern theoretical approaches and adequate analysis tools, in the context of their policy or managerial implications. The first part of the book discusses the analysis and assessment of quantitative tourism impacts on local economies, while the second part focuses on non-material aspects of tourism development, in particular those related to the role of innovation and human resources. The final section highlights the different dynamics often observed in tourism destinations arising from the interaction between tourists and local communities.

Sustainable Design and Manufacturing 2016 Rossi Setchi,Robert J. Howlett,Ying Liu,Peter Theobald,2016-04-02 This volume consists of 59 peer-reviewed papers, presented at the International Conference on Sustainable Design and Manufacturing (SDM-16) held in Chania, Crete Greece in April 2016. Leading-edge research into sustainable design and manufacturing aims to enable the manufacturing industry to grow by adopting more advanced technologies, and at the same time improve its sustainability by reducing its environmental impact. SDM-16 covers a wide range of topics from sustainable product design and service innovation,

sustainable process and technology for the manufacturing of sustainable products, sustainable manufacturing systems and enterprises, decision support for sustainability, and the study of societal impact of sustainability including research for circular economy. Application areas are wide and varied. The book will provide an excellent overview of the latest research and development in the area of Sustainable Design and Manufacturing.

Global Trends 2030: Alternative Worlds National Intelligence Council (US),2013-08-15 Global megatrends for the next 20 years and how they will affect the United States. This is the fifth installment in the National Intelligence Council’s series aimed at providing a framework for thinking about possible futures and their implications. The report is intended to stimulate strategic thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories during the next 15-20 years by identifying critical trends and potential discontinuities. The authors distinguish between megatrends, those factors that will likely occur under any scenario, and game-changers, critical variables whose trajectories are far less certain. NIC 2012-001. Appropriate for anyone, from business to banks, government to start-ups, technology to teachers and more, this publication helps anticipate where the world will be socially, politically, technically and culturally over the next few decades. Several innovations are included in Global Trends 2030, including: a review of the four previous Global Trends reports, input from academic and other experts around the world, coverage of disruptive technologies, and a chapter on the potential trajectories for the US role in the international system and the possible the impact on future international relations.

The Blue Compendium Jane Lubchenco,Peter M. Haugan,2023-05-24 Home to over 80 percent of all life on Earth, the ocean is the world’s largest carbon sink and a key source of food and economic security for billions of people. The relevance of the ocean for humanity's future is undisputed. However, the ocean’s great potential to drive economic growth and equitable job creation, sustain healthy ecosystems, and mitigate climate change is not yet fully recognised. Lack of awareness of this potential as well as management and governance challenges pose impediments. Until these impediments are removed, ocean ecosystems will continue to be degraded and opportunities for people lost. A transition and a clear path to a thriving and vibrant relationship between humans and the ocean are urgently needed. This open access collection of papers and reports identifies a path that is inspired by science, energised by engaged people, and emboldened by visionary leaders. These assessments of knowledge are commissioned by the High Level Panel for a Sustainable Ocean Economy (Ocean Panel), which was established in September 2018 as a unique initiative led by heads of state and government from around the world, to showcase the latest leading-edge science, knowledge and state-of-the-art thinking on key ocean issues. Altogether, The Blue Compendium offers innovative ocean solutions in technology, policy, governance, and finance realms, that could help accelerate a transition to a more sustainable and prosperous relationship with the ocean. The comprehensive assessments have already informed policy making at the highest levels of government and motivated an impressive array of responsive and ambitious action across a growing network of leaders in business, finance and civil society.
