**Style Eruptions** Henrik Vejlgaard,2012-12 The full story of how changes in style and taste take place Why do millions of people end up wearing the same style of clothing? Or have the same style in electronics, cars, and furniture? It's because of trends-the powerful process of change that takes place in the same way again and again across the globe. Drawing on his own and other sociologists' groundbreaking research, trend sociologist Henrik Vejlgaard unearths what happens when a new style emerge and go mainstream and examines the influential individuals who make trends happen. He documents that 6 very different groups of individuals play a huge role in the trend process. *Style Eruptions* is a follow-up to *Anatomy of a Trend*, his first book on the trend process which presented trends from a business perspective. With *Style Eruptions* he completes the story of one of the most puzzling mysteries of modern culture: how do changes in style and taste come about?

Chicago's Industrial Decline Robert Lewis,2020-12-15 In *Chicago's Industrial Decline* Robert Lewis charts the city's decline since the 1920s and describes the early development of Chicago's famed (and reviled) growth machine. Beginning in the 1940s and led by local politicians, downtown business interest, financial institutions, and real estate groups, place-dependent organizations in Chicago implemented several industrial renewal initiatives with the dual purpose of stopping factory closings and attracting new firms in order to turn blighted property into modern industrial sites. At the same time, a more powerful coalition sought to adapt the urban fabric to appeal to middle-class consumption and residential living. As Lewis shows, the two aims were never well integrated, and the result was on-going disinvestment and the inexorable decline of Chicago's industrial space. By the 1950s, Lewis argues, it was evident that the early incarnation of the growth machine had failed to maintain Chicago's economic center in industry. Although larger economic and social forces—specifically, competition for business and for residential development from the suburbs in the Chicagoland region and across the whole United States—played a role in the city's industrial decline, Lewis stresses the deep incoherence of post-WWII economic policy and urban planning that hoped to square the circle by supporting both heavy industry and middle- to upper-class amenities in downtown Chicago.

*Anatomy of a Trend* Henrik Vejlgaard,2008 How did Harley Davidson innovate their motorcycle's design after observing the Hell's Angels? How did Burberry revive their stuffy brand to create phenomenal success? And how could beer companies have prevented huge losses in the 90s? All by understanding the inner workings of trends. *Anatomy of a Trend* draws on 20 years of the author's consumer research to reveal the people, the places, and the motives behind the buying behavior that creates trends. Using the ingenious metaphor of a detective novel, global trend expert Henrik Vejlgaard reveals the essential clues for capitalizing on every stage of the trend process.

**On Trend** Devon Powers,2019-10-16 Trends have become a commodity—an element of culture in their own right and the very currency of our cultural life. Consumer culture relies on a new class of professionals who explain trends, predict trends, and in profound ways even manufacture trends. *On Trend* delves into one of the most powerful forces in global consumer culture. From forecasting to cool hunting to design thinking, the work done by trend professionals influences how we live, work, play, shop, and learn. Devon Powers' provocative insights open up how the business of the future kindles exciting opportunity even as its practices raise questions about an economy increasingly built on nonstop disruption and innovation. Merging industry history with vivid portraits of today's trend visionaries, Powers reveals how trends took over, what it means for cultural change, and the price all of us pay to see—and live—the future.
