**Flood Recovery, Innovation and Response II** D. De Wrachien,2010 One-third of the annual natural disasters and economic losses, and more than half of the associated victims are flood related. A burgeoning global population and growing wealth, particularly in the last two or three decades, have increased the risk and the demand for flood protection. These features, together with climate change predictions and urban development, are affecting the way flood risk is managed. Knowledge and scientific tools play a role of paramount importance in the strain of coping with flooding problems, along with capacity building in the context of political and administrative frameworks. Therefore, governments need to establish clear institutional, financial and social mechanisms and processes for flood risk management in order to ensure the safety of people and property and, thereby, contribute to flood defence, prevention and recovery. This volume contains papers presented at the second

International Conference on Flood Recovery, Innovation and Response. The conference provides a forum for researchers, academics and practitioners actively involved in improving and interchanging knowledge and expertise in a wide range of technical and management issues related to flooding and its devastating effects. The scientific topics presented at the conference on Flood Recovery Innovation and Response 2010 included: Flood Risk Analysis; Flood Risk Management; Urban Flood Management; Flood Forecasting; Risk Assessment and Decision Making; Flood Case Studies; Community Resilience to Flooding.

The Mythology of Crime and Criminal Justice Victor E. Kappeler,Gary W. Potter,2017-07-18 The social construction of crime is often out of proportion to the threat posed. The media and advocacy groups shine a spotlight on some crimes and ignore others. Street crime is highlighted as putting everyone at risk of victimization, while the greater social harms from corporate malfeasance receive far less attention. Social arrangements dictate what is defined as crime and the punishments for those who engage in the proscribed behavior. Interest groups promote their agendas by appealing to public fears. Justifications often have no basis in fact, but the public accepts the exaggerations and blames the targeted offenders. The net-widening effect of more laws and more punishment catches those least able to defend themselves. This innovative alternative to traditional textbooks provides insightful

observations of myths and trends in criminal justice. Fourteen chapters challenge misconceptions about specific crimes or aspects of the criminal justice system. Kappeler and Potter dissect popular images of crimes and criminals in a cogent, compelling, and engaging manner. They trace the social construction of each issue and identify the misleading statistics and fears that form the basis of myths—and the collateral damage of basing policies on mythical beliefs. The authors encourage skepticism about commonly accepted beliefs, offer readers a fresh perspective, and urge them to analyze important issues from novel vantage points.
