Music Apps for Musicians and Music Teachers Elizabeth C. Axford, 2015-02-19 In today's digital age, learning and creating music has never been so easy and affordable. Anyone can enhance their musical knowledge, skills, and creativity with the multitude of music

apps available. However, sifting through thousands of music apps in the Apple App Store and Google Play can be a daunting task for any musician or music instructor. But not anymore! Having spent countless hours researching the most interesting useful, educational, fun, and easy-to-use music apps, Elizabeth C. Axford in *Music Apps for Musicians and Music Teachers* surveys the landscape of music-related apps for both iOS and Android mobile devices, including tablets and smartphones. *Music Apps for Musicians and Music Teachers* lists hundreds of music-related apps organized by category, including singing, musical instruments, music theory and composition, songwriting, improvisation, recording, evaluating music performances, listening to music, music history and literature, music appreciation, and more. App developers are listed with each app, including links to their websites for updates and support. The book sections and chapters align with the newly revised National Standards for Music Education released in 2014 by the National Association for Music Education. Suggested activities for educators are provided, as well as key terms and a bibliography. *Music Apps for Musicians and Music Teachers* is for anyone interested in music, whether hobbyist or professional. It enhances the ability to learn on the go by offering musicians, music students, and music instructors a list of the most useful music apps available.

Switched On Pop Nate Sloan, Charlie Harding, 2019-11-15 Pop music surrounds us - in our cars, over supermarket speakers, even when we are laid out at the dentist - but how often do we really hear what's playing? *Switched on Pop* is the book based on the eponymous podcast that has been hailed by NPR, Rolling Stone, The Guardian, and Entertainment Weekly for its witty and accessible analysis of Top 40 hits. Through close studies of sixteen modern classics, musicologist Nate Sloan and songwriter Charlie Harding shift pop from the background to the foreground, illuminating the essential musical concepts behind two decades of chart-topping songs. In 1939, Aaron Copland published *What to Listen for in Music*, the bestseller that made classical music approachable for generations of listeners. Eighty years later, Nate and Charlie update Copland's idea for a new audience and repertoire: 21st century pop, from Britney to Beyoncé, Outkast to Kendrick Lamar. Despite the importance of pop music in contemporary culture, most discourse only revolves around lyrics and celebrity. *Switched on Pop* gives readers the tools they need to interpret our modern soundtrack. Each chapter investigates a different song and artist, revealing musical insights such as how a single melodic motif follows Taylor Swift through every genre that she samples, André 3000 uses metric manipulation to get listeners to shake it like a Polaroid picture, or Luis Fonsi and Daddy Yankee create harmonic ambiguity in *Despacito* that mirrors the patterns of global migration. Replete with engaging discussions and eye-catching illustrations, *Switched on Pop* brings to life the musical qualities that catapult songs into the pop pantheon. Readers will find themselves listening to familiar tracks in new ways and not just those from the Top 40. The timeless concepts that Nate and Charlie define can be applied to any musical style. From fanatics to skeptics, teenagers to octogenarians, non-musicians to professional composers, every music lover will discover something ear-opening in *Switched on Pop*.

Popular Music in a Digital Music Economy Tim J. Anderson, 2013-12-17 In the late 1990s, the MP3 became the de facto standard for digital audio files and the networked computer began to claim a significant place in the lives of more and more listeners. The dovetailing of these two circumstances is the basis of a new mode of musical production and distribution where new practices emerge. This book is not a definitive statement about what the new music industry is. Rather, it is devoted to what this new industry is becoming by examining these practices as experiments, dedicated to negotiating what is replacing an object based industry oriented around the production and exchange of physical recordings. In this new economy, constant attention is paid to the production and licensing of intellectual property and the rise of the social musician who has been encouraged to become more entrepreneurial. Finally, every element of the industry now must consider a new type of audience, the end user, and their productive and distributive capacities around which services and musicians must orient their practices and investments.

Hand to Hold JJ Heller, 2021-07-20 This heartwarming picture book reassures children that a parent’s love never lets go—based on the poignant lyrics of JJ Heller’s beloved lullaby “Hand to Hold.” “May the living light inside you be the compass as you go / May you always know you have my hand to hold.” With delightful illustrations and an engaging rhyme scheme, this book offers the promise of security and love every child’s heart longs to know. From skipping stones and counting stars to climbing trees and telling stories, every moment is wrapped snugly in the certain warmth of a parent’s presence and God’s blessing. With poignancy and joy, this bedtime read captures the unconditional love parents want their children to know but so often fail to express amid the chaos of daily life.

Social Internet of Things Alessandro Soro, Margot Brereton, Paul Roe, 2018-07-20 The aim of this book is to stimulate research on the topic of the Social Internet of Things, and explore how Internet of Things architectures, tools, and services can be conceptualized and developed so as to reveal, amplify and inspire the capacities of people, including the socialization or collaborations that happen through or around smart objects and smart environments. From new ways of negotiating privacy, to the consequences of increased automation, the Internet of Things poses new challenges and opens up new questions that often go beyond the technology itself, and rather focus on how the technology will become embedded in our future communities, families, practices, and environment, and how these will change in turn.

World Music Pedagogy, Volume V: Choral Music Education Sarah J. Bartolome, 2019-03-08 *World Music Pedagogy, Volume V:*

Choral Music Education explores specific applications of the World Music Pedagogy process to choral music education in elementary, middle, and high school contexts, as well as within community settings. The text provides clear and accessible information to help choral music educators select, rehearse, and perform a diverse global repertoire. It also guides directors in creating a rich cultural context for learners, emphasizing listening, moving, and playing activities as meaningful music-making experiences. Commentary on quality, commercially available world music repertoire bridges the gap between the philosophy of World Music Pedagogy and the realities of the performance-based choral classroom. All chapters open with a series of vignettes that illuminate the variety of possibilities within multiple K-12 contexts, providing the reader with a sense of how the ideas presented might look on the ground. Ready-to-integrate activities serve as concrete and pedagogically sound examples to guide directors as they develop their own instructional materials according to the needs of their choir. Content features choral and vocal music-making traditions from South and West Africa; Latin America; Southeast, East, and South Asia; the Pacific Islands; Australia; New Zealand; Scandinavia; and the Baltics.

Infostructure Nicole Gardner, M. Hank Haeusler, Martin Tomitsch, 2010 INFOSTRUCTURE presents the vision of interactive and responsive urban public transport environments where new forms of communication and information access are enabled through an overlay of urban digital media technologies. Featuring research and projects undertaken by master students in architecture at the University of Technology, Sydney and Bachelor students in design computing at the University of Sydney, the book explores the augmentation of existing public transport environments with urban digital media technologies, to set in motion a transformation from infrastructure to 'infostructure(s).' Precedent based research and technology investigations underpin the twenty featured student projects, that address a nexus of space, urban media, sensor, and mobile phone technology. The research presented in this book is a foundation for a series of future infostructure projects.
