Alex Sayf Cummings

Triangle Business Journal ,2009-12-18

Triangle David Von Drehle,2003 Describes the 1911 fire that destroyed the Triangle Shirtwaist factory in New York's Greenwich Village, the deaths of 146 workers in the fire, and the implications of the catastrophe for twentieth-century politics and labor relations.

Brain Magnet Alex Sayf Cummings,2020-04-28 Beginning in the 1950s, a group of academics, businesspeople, and politicians set out on an ambitious project to remake North Carolina's low-wage economy. They pitched the universities of Raleigh, Durham, and Chapel Hill as the kernel of a tech hub, Research Triangle Park, which would lure a new class of highly educated workers. In the process, they created a blueprint for what would become known as the knowledge economy: a future built on intellectual labor and the production of intellectual property. In Brain Magnet, Alex Sayf Cummings reveals the significance of Research Triangle Park to the emergence of the high-tech economy in a postindustrial United States. She analyzes the use of ideas of culture and creativity to fuel economic development, how workers experienced life in the Triangle, and the role of the federal government in bringing the modern technology industry into being. As Raleigh, Durham, and Chapel Hill were transformed by high-tech development, the old South gave way to a distinctly new one, which welded the intellectual power of universities to a vision of the suburban good life. Cummings pinpoints how the story of the Research Triangle sheds new light on the origins of today's urban landscape, in which innovation, as exemplified by the tech industry, is lauded as the engine of economic growth against a backdrop of gentrification and inequality. Placing the knowledge economy in a broader cultural and intellectual context, Brain Magnet offers vital insight into how tech-driven development occurs and the people and places left in its wake.

Best Practices in State and Regional Innovation Initiatives National Research Council,Policy and Global Affairs,Board on Science, Technology, and Economic Policy,Committee on Competing in the 21st Century: Best Practice in State and Regional Innovation Initiatives,2013-06-04 Most of the policy discussion about stimulating innovation has focused on the federal level. This study focuses on the significant activity at the state level, with the goal of improving the public's understanding of key policy strategies and exemplary practices. Based on a series of workshops and conferences that brought together policymakers along with leaders of industry and academia in a select number of states, the study highlights a rich variety of policy initiatives underway at the state and regional level to foster knowledge based growth and employment. Perhaps what distinguishes this effort at the state level is most of all the high degree of pragmatism. Operating out of necessity, innovation policies at the state level often involve taking advantage of existing resources and recombining them in new ways, forging innovative partnerships among universities, industry and government organizations, growing the skill base, and investing in the infrastructure to develop new technologies and new industries. Many of these initiatives are being guided by leaders from the private sector and universities. The objective of Best Practices in State and Regional Innovation Initiatives: Competing in the 21st Century is not to do an empirical review of the inputs and outputs of various

state programs. Nor is it to evaluate which programs are superior. Indeed, some of the notable successes, such as the Albany nanotechnology cluster, represent a leap of leadership, investment, and sustained commitment that has had remarkable results in an industry that is actively pursued by many countries. The study's goal is to illustrate the approaches taken by a variety of highly diverse states as they confront the increasing challenges of global competition for the industries and jobs of today and tomorrow.

The Research Triangle William M. Rohe, 2012-04-17 Over the past three decades, the economy of North Carolina's Research Triangle—defined by the cities of Raleigh, Durham, and Chapel Hill—has been transformed from one dependent on agriculture and textiles to one driven by knowledge-based jobs in technology, telecommunications, and pharmaceuticals. Now home to roughly 1.7 million people, the Research Triangle has attracted an influx of new residents from across the country and around the world while continuing to win praise for its high quality of life. At the region's center is the 7,000-acre Research Triangle Park, one of the nation's largest and most prominent research and development campuses. Founded in 1959 through a partnership of local governments, universities, and business leaders, Research Triangle Park has catalyzed the region's rapid growth and hastened its coalescence into a single metropolitan area. *The Research Triangle: From Tobacco Road to Global Prominence* describes the history, current challenges, and future prospects of this fascinating metropolitan area. Focusing on the personalities and perspectives of key actors in the development of the region, William M. Rohe traces the emergence of the Research Triangle Park and its role in the region's economic transformation. He also addresses some of the downsides of development, illustrating the strains that explosive population growth has placed on the region's school systems, natural resources, transportation infrastructure, and social cohesion. As Rohe shows, the Research Triangle is not a city in the traditional sense but a sprawling conurbation whose rapid, low-density growth and attendant problems are indicative of metropolitan life in much of America today. Although the Triangle's short-term prospects are bright, Rohe warns that troubling issues loom—the region is expected to add nearly a million residents over the next two decades—and will need to be addressed through improvements in governmental cooperation, regional planning, and civic leadership. Finally, the author outlines key lessons that other metropolitan areas can learn from the Research Triangle's dramatic rise to prominence.

Internationalization of Business Stefan Schmid, 2018-12-30 This book illustrates the various facets of internationalization in managerial practice, starting with a strategic outline of the many options firms have when formulating internationalization strategies. Designed as a textbook for Bachelor, Master and MBA classrooms, the core of the book consists of six case studies on firms from diverse industries, such as sporting goods, aviation, grocery discount, motorcycle, computer and IT, and fast-food. The cases present a variety of ways of entering and operating in foreign markets, such as export, franchising, joint ventures, strategic alliances, greenfield-investments, acquisitions and mergers. In addition to market entry strategies, the cases provide readers, educators and students with insights into target market strategies, timing strategies, allocation strategies and coordination strategies of well-known companies.

Caraleigh Steven A. Hill, 2022-05-03 The Caraleigh neighborhood in south Raleigh was founded in 1892 with the opening of a cotton mill, fertilizer plant and workers' town. The old textile complex, with its immense brick structures continue to evoke a strong impression of a bygone period. The old mill remains the community's focal point as of 2022, leading some to worry that Caraleigh's modernized structure may conceal dark secrets. After the Civil War, cotton mills were at the heart of the South's frenzied pursuit of economic and psychological regeneration between 1880 and 1915. As Raleigh's greatest textile venture, Caraleigh itself was founded

by a group of cotton investors. The origins of Raleigh's north-south divide can be seen in the many economic, psychological, social and political perils. While the Downtown South project promises a bright future for Raleigh in 2022, a close examination of the city's economic and social stratification in the past reveals the city's inequality, resulting in an affluent north Raleigh and a pauperized south Raleigh ghetto. This work illuminates previously unrecognized aspects of Raleigh's history, such as how an outskirts neighborhood shaped the city's development during the twentieth century.

The Politics of Global Regulation Walter Mattli, Ngaire Woods, 2009-04-27 Regulation by public and private organizations can be hijacked by special interests or small groups of powerful firms, and nowhere is this easier than at the global level. In whose interest is the global economy being regulated? Under what conditions can global regulation be made to serve broader interests? This is the first book to examine systematically how and why such hijacking or regulatory capture happens, and how it can be averted. Walter Mattli and Ngaire Woods bring together leading experts to present an analytical framework to explain regulatory outcomes at the global level and offer a series of case studies that illustrate the challenges of a global economy in which many institutions are less transparent and are held much less accountable by the media and public officials than are domestic institutions. They explain when and how global regulation falls prey to regulatory capture, yet also shed light on the positive regulatory changes that have occurred in areas including human rights, shipping safety, and global finance. This book is a wake-up call to proponents of network governance, self-regulation, and the view that technocrats should be left to regulate with as little oversight as possible. In addition to the editors, the contributors are Kenneth W. Abbott, Samuel Barrows, Judith L. Goldstein, Eric Helleiner, Miles Kahler, David A. Lake, Kathryn Sikkink, Duncan Snidal, Richard H. Steinberg, and David Vogel.

The Pandemic Divide Gwendolyn L. Wright, Lucas Hubbard, William A. Darity Jr., 2022-08-22 As COVID-19 made inroads in the United States in spring 2020, a common refrain rose above the din: “We’re all in this together.” However, the full picture was far more complicated—and far less equitable. Black and Latinx populations suffered illnesses, outbreaks, and deaths at much higher rates than the general populace. Those working in low-paid jobs and those living in confined housing or communities already disproportionately beset by health problems were particularly vulnerable. The contributors to *The Pandemic Divide* explain how these and other racial disparities came to the forefront in 2020. They explore COVID-19’s impact on multiple arenas of daily life—including wealth, health, housing, employment, and education—while highlighting what steps could have been taken to mitigate the full force of the pandemic. Most crucially, the contributors offer concrete public policy solutions that would allow the nation to respond effectively to future crises and improve the long-term well-being of all Americans.
