*Unqualified* Anna Faris, 2018-10-02 A hilarious, honest memoir—combined with just the right amount of relationship advice—from the popular actress and host of the hit podcast Anna Faris is Unqualified. Anna Faris has advice for you. And it's great advice, because she's been through it all, and she wants to tell you what she's learned. After surviving an awkward childhood (when she bribed the fastest boy in the third grade with ice cream), navigating dating and marriage in Hollywood, and building a podcast around romantic advice, Anna has plenty of lessons to share: Advocate for yourself. Know that there are wonderful people out there and that a great relationship is possible. And, finally, don't date magicians. Her comic memoir, Unqualified, shares Anna's candid, sympathetic, and entertaining stories of love lost and won. Part memoir—including stories about being “the short girl” in elementary school, finding and keeping female friends, and dealing with the pressures of the entertainment industry and parenthood—part humorous, unflinching advice from her hit podcast, Anna Faris Is Unqualified, the book will reveal Anna's unique take on how to master the bizarre, chaotic, and ultimately rewarding world of love. Hilarious, honest, and useful, Unqualified is the book Anna's fans have been waiting for.

The Friendly Orange Glow Brian Dear, 2018-10-02 At a time when Steve Jobs was only a teenager and Mark Zuckerberg wasn't even born, a group of visionary engineers and designers—some of them only high school students—in the late 1960s and 1970s created a computer system called PLATO, which was light-years ahead in experimenting with how people would learn, engage, communicate, and play through connected computers. Not only did PLATO engineers make significant hardware breakthroughs with plasma displays and touch screens but PLATO programmers also

came up with a long list of software innovations: chat rooms, instant messaging, message boards, screen savers, multiplayer games, online newspapers, interactive fiction, and emoticons. Together, the PLATO community pioneered what we now collectively engage in as cyberculture. They were among the first to identify and also realize the potential and scope of the social interconnectivity of computers, well before the creation of the internet. PLATO was the foundational model for every online community that was to follow in its footsteps. The Friendly Orange Glow is the first history to recount in fascinating detail the remarkable accomplishments and inspiring personal stories of the PLATO community. The addictive nature of PLATO both ruined many a college career and launched pathbreaking multimillion-dollar software products. Its development, impact, and eventual disappearance provides an instructive case study of technological innovation and disruption, project management, and missed opportunities. Above all, The Friendly Orange Glow at last reveals new perspectives on the origins of social computing and our internet-infatuated world.

**Arithmetic Complexity of Computations** Shmuel Winograd,1980-01-01 Focuses on finding the minimum number of arithmetic operations needed to perform the computation and on finding a better algorithm when improvement is possible. The author concentrates on that class of problems concerned with computing a system of bilinear forms. Results that lead to applications in the area of signal processing are emphasized, since (1) even a modest reduction in the execution time of signal processing problems could have practical significance; (2) results in this area are relatively new and are scattered in journal articles; and (3) this emphasis indicates the flavor of complexity of computation.

**Stacking the Deck** Bryan Berg,2009-12-15 Written by the holder of several Guinness World Records for cardstacking, this is the first complete, fully illustrated guide to the art of building mind-boggling, multilevel structures with ordinary playing cards. In Stacking the Deck, Bryan Berg reveals the secret to successful cardstacking with his simple four-card-cell structure and expanded grid techniques. He covers a wide range of architectural styles, from classic to whimsical, and various types of structures, including pyramids, shrines, stadiums, churches, an oil derrick, and even the Empire State Building. Since first setting the height record in 1992, Bryan's built awe-inspiring card models of a Japanese shrine, the Iowa State Capitol building, Ebbets Field, and his latest tower, which is more than twenty-five feet tall! This book includes photographs of some of these amazing pieces, illustrating just how appealing and enduring a house of cards can be. Stacking the Deck will inspire everyone from youngsters experimenting with their first deck of cards to adults, who can create their own private skyscrapers. Once you've read Stacking the Deck, you'll never look at a deck of cards the same way again.
