**Expert Systems for Scanner Data Environments** John M. McCann,John P. Gallagher,2012-12-06 This book is about the role of expert systems in marketing, particularly in the consumer goods industry. Section I describes the changing nature of consumer marketing and presents the rationale and need for expert systems. The remainder of the book combines a tutorial on expert systems with a series of expert system prototypes. The tutorial material is presented in three places. First, section II is devoted to introducing expert systems in general. Chapter 3 provides a general introduction to the topic, which is continued in chapter 4 where a small expert system (the Promotion Advisor) is used to illustrate the important features of a backward-chaining, rule-based system. The promotion theme is extended in chapter 5 where a larger system is presented. The material in all three of these chapters was designed as an introduction and tutorial on the most common technology for building applied expert systems: the backward-chaining, rule-based inference engine. Tutorial material is also contained in the body of the chapters that describe the prototypes. This material is usually in the form of sample rules and a description of the process for applying the rules. The third location of the expert system material is in chapters that follow discussions of the prototypes. Chapter 7 is a technical chapter on the coupling of expert systems to traditional systems.

**Islam Rising** Orlean Koehle,2022-11-03 Hard Questions This Book Answers What is causing the backward transformation that Europeans are experiencing, bringing parts of Europe back to almost the same state of terrorism and loss of freedom when they were once shackled under NAZI and Communist occupations? What has happened to Christianity in Europe? How many churches are now standing empty, being turned into museums or concert halls, or being sold as mosques? What has happened to the demographics of Europeans now in such decline? How soon will original Europeans no longer exist, replaced by the souring populations of Muslims? What is the true history of Islam and the ideology driving their acts of terrorism? Why is this being whitewashed in the media and in European and American public schools as the schools are promoting pure Islam propaganda? How is the USA following the same pattern set for us in Europe with their massive influx of immigrants and refugees? Who are the various secular and non-secular groups driving the refugee program, and how much money is being made by them? What are the huge numbers of immigrants and refugees doing to our own country? How are small town and communities and their schools suffering with such a huge influx of migrants who do not share a common culture, language, traditions, or religion? What can we learn from this book before it is too late?
