☞ **DIGITAL BRITAIN** GREAT BRITAIN: DEPARTMENT FOR CULTURE, MEDIA AND SPORT, GREAT BRITAIN DEPARTMENT FOR BUSINESS, INNOVATION AND SKILLS, 2009-06-16 In this document the Government sets out a programme of action designed to position the UK as a long-term leader in communications, creating an industrial framework that will fully harness digital technology. The UK's digital dividend will transform the way business operates, enhance the delivery of public services, stimulate communications infrastructure ready for next-generation distribution and preserve Britain's status as a global hub for media and entertainment. This approach seeks to maximise the digital opportunities for all citizens. The report contains: (1) an analysis of the levels of digital participation, skills and access needed for the digital future, with a plan for increasing participation, and more coherent public structures to deal with it; (2) an analysis of communications infrastructure capabilities; (3) plans for the future growth of creative industries, proposals for a legal and regulatory framework for intellectual property and proposals on skills and investment support and innovation; (4) a restatement of the need for specific market intervention in the UK content market, with implications and challenges for the BBC and C4 Corporation and other forms of independent and suitably funded news; (5) an analysis of the skills, research and training markets, and what supply side issues need addressing for a fully functioning digital economy; (6) a framework for digital security and digital safety at international and national levels and recognition that a world of high speed connectivity needs a digital framework not an analogue one; (7) a review of what all of this means for the Government and how digital governance in the information age demands new structures, new safeguards, and new data management, access and transparency rules.

☞ **FROM LAB TO MARKET** S.K. KASSICIEH, H.R. RADOSEVICH, 2013-06-29 The topic of this book, the commercialization of public-sector technology, continues to grow in importance in the United States and similar societies. The issues involved are relevant to many roles including those of policy makers, managers, patent attorneys, licensing agents, and technical staff members of public technology sources. Institutions increasingly involved in the process include federal and other government laboratories and their related agencies, public universities and their state governments, public and private transfer agents and, of course, all the private recipients of public technology. Scarcely a day goes by without a significant event related to technology transfer and commercialization. The popular business press is regularly carrying articles addressing the issues, explaining new initiatives and describing events of notable success or failure. [L] As an example of current important events, the Technology Reinvestment Project (TRP) is forrnu lating its initiatives to transfer public technology and promote technology-based public/private partnerships as a collaboration between the Advanced Research Projects Agency (ARPA), the National Institute of Standards and Technology (NIST), the National Science Foundation (NSF) the National Aeronautics and Space Administration (NASA), and the Department of Energy, Defense Programs (DOE/DP).

The Google Story (2018 Updated Edition) David A. Vise, Mark Malseed, 2005-11-15 The definitive, bestselling account of the company that changed the way we work and live, updated for the twentieth anniversary of Google's founding with analysis of its most recent bold moves to redefine the world—and its even more ambitious plans for the future. Moscow-born Sergey Brin and Midwest-born Larry Page dropped out of graduate school at Stanford University to, as they said, “change the world” through a powerful search engine that would organize every bit of information on the Web for free. The Google Story takes you deep inside the company's wild ride from an idea that struggled for funding in 1998 to a firm that today rakes in billions in profits. Based on scrupulous research and extraordinary access to Google, this fast-moving narrative reveals how an unorthodox management style and a culture of innovation enabled a search-engine giant to shake up Madison Avenue, clash with governments that accuse it of being a monopoly, deploy self-driving cars to forever change how we travel, and launch high-flying Internet balloons. Unafraid of controversy, Google is surging ahead with artificial intelligence that could cure diseases but also displace millions of people from their jobs, testing the founders' guiding mantra: DON'T BE EVIL. Praise for The Google Story “[The authors] do a fine job of recounting Google's rapid rise and explaining its search business.”—The New York Times “An intriguing insider view of the Google culture.”—Harvard Business Review “An interesting read on a powerhouse company . . . If you haven't read anything about one of today's most influential companies, you should. If you don't read The Google Story, you're missing a few extra treats.”—USA Today “Fascinating . . . meticulous . . . never bogs down.”—Houston Chronicle

Bibliolepsy Gina Apostol, 2022-01-04 Moving, sexy, and archly funny, Gina Apostol's Philippine National Book Award-winning Bibliolepsy is a love letter to the written word and a brilliantly unorthodox look at the rebellion that brought down a dictatorship Gina Apostol's debut novel, available for the first time in the US, tells of a young woman caught between a lifelong desire to escape into books and a real-world revolution. It is the mid-eighties, two decades into the kleptocratic, brutal rule of Ferdinand Marcos. The Philippine economy is in deep recession, and civil unrest is growing by the day. But Primi Peregrino has her own priorities: tracking down books and pursuing romantic connections with their authors. For Primi, the nascent revolution means that writers are gathering more often, and with greater urgency, so that every poetry reading she attends presents a veritable “Justice League” of authors for her to choose among. As the Marcos dictatorship stands poised to topple, Primi remains true to her fantasy: that she, “a vagabond from history, a runaway from time,” can be saved by sex, love, and books.

An Unlikely Arrangement Patty Wiseman, 2011 Young and rebellious, Ruth Squire defied her parents to live the high life of young people in 1929 Detroit. Handsome and responsible, Peter Kirby worked diligently to make his family's life easier. Rich and powerful, Eric Horton held the fates of many families in his hands. These three lives intertwine through the differing worlds of high society, middle-class life, and organized crime, culminating in an engagement, a kidnapping, a misunderstanding . . . and a murder.

The Numinous Legacy Adair Butchins, 2002 Where is God in the universe if anywhere? Why did God make germs? Why should we be so special? Could the universe have been different? This is a book that brings home, in no uncertain fashion, the discrepancy between the universe envisaged by the ancient sages and prophets and that of modern scientific cosmology, where the possibility of divine intervention looks less and less likely. Butchins demonstrates with clarity how the scientific method may be used, despite certain drawbacks, in an attempt to verify objective truth. It describes how the effect of the Copernican Revolution in the seventeenth century has steadily undermined the basic structure of the three great monotheistic religions of our day, Judaism, Christianity, and Islam, especially with respect to their eschatological concepts. The Eastern religions, being less anthropomorphic, are less affected. The theistic argument from design is shown to be powerful enough to have caused disagreement among present-day scientists, in spite of the strictures of Professor Dawkins. In general, the book attempts to make some sense of the structure of the universe in terms of our own consciousness; it behoves the reader to consider tha
