[2] PLACES, TOWNS AND TOWNSHIPS 2016 DEIRDRE A. GAQUIN,MARY MEGHAN RYAN,2016-08-30 Places, Towns and Townships is an excellent resource for anyone in need of data for all of the nation’s cities, towns, townships, villages, and census-designated places in one convenient source. It compiles essential information about places in the United States and the people who live in them such as: • population • housing • income • education • employment • crime • and much more! In addition to the tables, Places, Towns and Townships includes text that describes key findings, figures that call attention to noteworthy trends in data, and rankings of the largest cities by various demographics. Compiled from multiple government sources, the data in this unique reference volume represents the most current and accurate information available. This data will not be updated for several years, making Places, Towns and Townships an invaluable resource in the years to come. Some interesting facts found in the 2016 edition of Places, Towns and Townships include: • While about 18 percent of the population lived in the nation’s 75 largest cities, 37 percent lived in places that were not incorporated as cities in 2014. • There were 34 incorporated cities and one town with more than 500,000 people in 2014. These 34 cities and towns represented only 23 states. • Among the 75 largest cities, Seattle, Boston, and San Francisco all have more than 72 percent of their residents in the 18-to-64 age group. • During the years 2010 through 2014, 13.1 percent of the residents of the United States were born in foreign countries. In 43 cities—mostly medium-sized cities and CDPs—more than half of the people are foreign-born. Many of these cities are in Florida. • In the five-year period from 2010 through 2014, 63.9 percent of Americans age 16 and older were in the civilian labor force, and 9.2 percent of the labor force participants were unemployed. • Nationally, health care and social assistance is the industrial sector with the most employees—16.6 percent of the total—followed by retail trade with 13.2 percent. Places, Towns and Townships makes a valuable addition to the County and City Extra Series.

[2] WATER BANKRUPTCY IN THE LAND OF PLENTY FRANCK POUPEAU,HOSHIN GUPTA,ALEIX SERRAT-CAPDEVILA,MARIA A. SANS-FUENTES,SUSAN HARRIS,L[?] SZL[?] G. HAYDE,2017-12-21 As the American Southwest faces its deepest drought in history, this book explores the provocative notion of “water bankruptcy” with a view towards emphasizing the diversity and complexity of water issues in this region. It bridges between the narratives of growth and the strategies or policies adopted to pursue competing agendas and circumvent the inevitable. A window of opportunity provided by this current long-term drought may be used to induce change by dealing with threats that derive from imbalances between growth patterns and available resources, the primary cause of scarcity. A first of its kind, this book was developed through close collaboration of a broad range of natural scientists, social scientists, and resource managers from Europe and United States. It constitutes a collective elaboration of a transdisciplinary approach to unveiling the inner workings of how water was fought for, allocated and used in the American Southwest, with a focus on Arizona. Specifically, it offers an innovative scientific perspective that produces a critical diagnostic evaluation of water management, with a particular view to identifying risks for the Tucson region that is facing continuous urban sprawl and economic growth. The book offers a diversity of complementary perspectives, including a statement of natural resources, biodiversity and their management, an analysis of water policy and its history, and a statement of ecosystem services in the context of both local biodiversity and also the economic activities that sustain economic growth. Finally, it presents a concerted effort to explore the interplay between a variety of related scientific disciplines and frameworks including climatology, hydrology, water management, ecosystem services, societal metabolism, political economy and social science.
