Open Source Geospatial Tools Daniel McInerney,Pieter Kempeneers,2014-11-22
This book focuses on the use of open source software for geospatial analysis. It demonstrates the effectiveness of the command line interface for handling both vector, raster and 3D geospatial data. Appropriate open-source tools for data processing are clearly explained and discusses how they can be used to solve everyday tasks. A series of fully worked case studies are presented including vector spatial analysis, remote sensing data analysis, landcover classification and LiDAR processing. A hands-on introduction to the application programming interface (API) of GDAL/OGR in Python/C++ is provided for readers who want to extend existing tools and/or develop their own software.

IFS Supplement on Monetary and Financial Statistics International Monetary Fund. Statistics Dept.,2014-07-01 This paper presents the special quarterly supplement to the International Financial Statistics (IFS) 2006. The IMF is publishing the monetary statistics for those member countries that have commenced the reporting, on a regular basis, of monetary data that accord with the methodology in the IMF's Monetary and Financial Statistics Manual (MFSM), 2000. Exchange rates are expressed in time series of national currency units per SDR and national currency units per US dollar, or vice versa. An increase in the index reflects an appreciation. Because of certain data-related limitations, particularly where Fund estimates have been used, data users need to exercise considerable caution in interpreting movements in nominal and real effective exchange rates. Statistics on the accounts of financial corporations are given in sections 10 through 50 in the country tables. Data for the depository corporations and other financial corporations are consolidated into a Financial Corporations Survey.
