*Energy Efficiency in Motor Driven Systems* Francesco Parasiliti, Paolo

Bertoldi, 2012-12-06 This book reports the state of the art of energy-efficient electrical motor driven system technologies, which can be used now and in the near future to achieve significant and cost-effective energy savings. It includes the recent developments in advanced electrical motor end-use devices (pumps, fans and compressors) by some of the largest manufacturers. Policies and programs to promote the large scale penetration of energy-efficient technologies and the market transformation are featured in the book, describing the experiences carried out in different parts of the world. This extensive coverage includes contributions from relevant institutions in the Europe, North America, Latin America, Africa, Asia, Australia and New Zealand.

**Microbial Ecology of Wastewater Treatment Plants** Maulin P Shah, Susana Rodriguez-Couto, 2021-05-15 Microbial Ecology of Wastewater Treatment Plants presents different methods and techniques used in microbial ecology to study the interactions and evolution of microbial populations in WWTPs, particularly the new molecular tools developed in the last decades. These molecular biology-based methods (e.g. studies of DNA, RNA and proteins) provide a high resolution of information compared to traditional ways of studying microbial wastewater populations, such as microscopic examination and culture-based methods. In addition, this book addresses the ability of microorganisms to degrade environmental pollutants. Describes application of different Omics tools in

The Oxford Handbook of Phenomenological Psychopathology Giovanni Stanghellini,Matthew Broome,Anthony Vincent Fernandez,Paolo Fusar-Poli,Andrea Raballo,René Rosfort,2019-07-04 The field of phenomenological psychopathology (PP) is concerned with exploring and describing the individual experience of those suffering from mental disorders. Whilst there is often an understandable emphasis within psychiatry on diagnosis and treatment, the subjective experience of the individual is frequently overlooked. Yet a patient's own account of how their illness affects their thoughts, values, consciousness, and sense of self, can provide important insights into their condition - insights that can complement the more empirical findings from studies of brain function or behaviour. The Oxford Handbook of Phenomenological Psychopathology is the first ever comprehensive review of the field. It considers the history of PP, its methodology, key concepts, and includes a section exploring individual experiences within schizophrenia, depression, borderline personality disorder, OCD, and phobia. In addition it includes chapters on some of the leading figures throughout the history of this field. Bringing together chapters from a global team of leading academics, researchers and practitioners, the book will be valuable for those within the fields of psychiatry, clinical psychology, and philosophy.

Forever Young Marcel Danesi, Director of the Program in Semiotics and Communication Theory Marcel Danesi, PH.D., 2003-01-01 The excessive worship of adolescence and its social empowerment by adult institutions is the deeply rooted cause of a serious cultural malaise. So argues semiotician Marcel Danesi in *Forever Young*, an unforgiving and controversial look at modern culture's incessant drive to create a 'teen-aging' of adult life. Written for the general reader and based on five year's worth of interviews with over 200 adolescents and their parents, Danesi begins by asserting that one of the early causes of this crystallization of adolescence as an age category can be traced back to theories of psychology at the turn of the twentieth century. Since then, the psychological view of adolescence as a stressful period of adjustment has become a self-fulfilling prophecy. This, in tandem with the devaluation of the family by the media and society at large, has led to a maturity gap - a fissure in family dynamics that is eagerly and ably exploited by the mass media. Unlike many academic digressions into the malaise of modern culture, *Forever Young* provides concrete answers on how the 'forever young syndrome' can be addressed. One solution is to dispel the myth that experts and professionals are the people best equipped to give advice on raising children. The second is to recognize the value of family, in all its different combinations, as the primary institution of child-rearing. The third is to challenge the pervasive notion that teen culture is a sophisticated endeavour - that, for example, pop music can claim to have produced some of the best musical art in the world, surpassing Mozart or Bach. By laying bare the misguided tenets that have brought about, and continue to promote, a 'forever young' mentality, Marcel Danesi demonstrates that the 'teen-aging' of culture has come about because it is, simply put, good for business. Teen

tastes have achieved cultural supremacy because the western economic system requires a conformist and easily manipulated market, and has thus joined forces with the media-entertainment oligarchy to promote a deterministic 'forever young' market.

**Energy Efficiency in Domestic Appliances and Lighting** Paolo Bertoldi,2022-05-18

This book contains peer-reviewed papers presented at the 10th International Conference on Energy Efficiency in Domestic Appliances and Lighting (EEDAL'19), held in Jinan, China from 6-8 November 2019. Energy efficiency helps to mitigate CO2 emissions and at the same time increases the security of energy supply. Energy efficiency is recognized as the cleanest, quickest and cheapest energy source. Not only this, but energy efficiency brings several additional benefits for society and end-users, such as lower energy costs, reduced local pollution, better outdoor and indoor air quality, etc. However, in some sectors, such as the residential sector, barriers to investments in energy efficiency remain. Legislation adopted in several jurisdictions (EU, Japan, USA, China, India, Australia, Brazil, etc.) helps in removing barriers and fosters investments in energy efficiency. These initiatives complement innovative financing schemes for energy efficiency, the provision of energy services by energy service companies and different types of information programs. At the same time, progress in appliance technologies and in solid state lighting offer high levels of efficiency. LED lighting is an example. As with previous conferences in this series, EEDAL'19 provided a unique forum to discuss and debate the latest developments in energy and environmental impact of households, including appliances, lighting, heating and cooling equipment, electronics, smart meters, consumer behavior, and policies and programs.

EEDAL addressed non-technical issues such as consumer behavior, energy access in developing countries, and demand response.

**Highlighting the Importance of Big Data Management and Analysis for Various Applications** Mohammad Moshirpour, Behrouz Far, Reda Alhajj, 2017-08-22 This book addresses the impacts of various types of services such as infrastructure, platforms, software, and business processes that cloud computing and Big Data have introduced into business. Featuring chapters which discuss effective and efficient approaches in dealing with the inherent complexity and increasing demands in data science, a variety of application domains are covered. Various case studies by data management and analysis experts are presented in these chapters. Covered applications include banking, social networks, bioinformatics, healthcare, transportation and criminology. Highlighting the Importance of Big Data Management and Analysis for Various Applications will provide the reader with an understanding of how data management and analysis are adapted to these applications. This book will appeal to researchers and professionals in the field.

These books provide prompt access to the latest innovations in research and technology in their respective fields. Proceedings of SPIE are among the most cited references in patent literature.

**Education and the Commercial Mindset** Samuel E. Abrams, 2016-04-25 The movement to privatize K-12 education is stronger than ever. Samuel Abrams examines the

rise of market forces in public education and reveals how a commercial mindset that sidesteps fundamental challenges has taken over. Nevertheless, public schools should adopt lessons from the business world, such as raising teacher salaries to attract talent.

Chemopreventive Activities of Phytochemicals Toshio Morikawa,2020 Inflammation is caused by a variety of stimuli including physical damage, UV irradiation, microbial invasion, and immune reactions. The classical key features of inflammation are redness, warmth, swelling, and pain, and their cascades can lead to the inflammatory bowel disease and psoriasis. Many inflammatory diseases are becoming common among the elderly worldwide. Clinically used anti-inflammatory drugs suffer from the disadvantages of side effects and high treatment costs in the case of biologics. Therefore, research on new anti-inflammatory molecules and the elucidation of their molecular mechanisms are being actively conducted. This Special Issue on Chemopreventive Activities of Phytochemicals is intended to offer anti-inflammatory active natural products as candidates and/or leads for pharmaceuticals. The research fields of this Special Issue include natural products, chemistry, phytochemistry, pharmacognosy, food chemistry, bioorganic synthetic chemistry, chemical biology, molecular biology, molecular pharmacology, and other related research fields.

*Kidney Inflammation, Injury and Regeneration* Patrick C. Baer,Benjamin Koch,Helmut Geiger,2020-04-03 Acute kidney injury (AKI) is still associated with high morbidity and mortality incidence rates, and also bears an elevated risk of subsequent chronic kidney

disease. Although the kidney has a remarkable capacity for regeneration after injury and may recover completely depending on the type of renal lesions, the options for clinical intervention are restricted to fluid management and extracorporeal kidney support. The development of novel therapies to prevent AKI, to improve renal regeneration capacity after AKI, and to preserve renal function is urgently needed. The Special Issue covers research articles that investigated the molecular mechanisms of inflammation and injury during different renal pathologies, renal regeneration, diagnostics using new biomarkers, and the effects of different stimuli like medication or bacterial components on isolated renal cells or in vivo models. The Special Issue contains important reviews that consider the current knowledge of cell death and regeneration, inflammation, and the molecular mechanisms of kidney diseases. In addition, the potential of cell-based therapy approaches that use mesenchymal stromal/stem cells or their derivatives is summarized. This edition is complemented by reviews that deal with the current data situation on other specific topics like diabetes and diabetic nephropathy or new therapeutic targets.

**Writing for the Mass Media** James Glen Stovall, 2013-11-01 Now in its eighth edition, *Writing for the Mass Media* remains one of the clearest and most effective introductions to media writing on the market. This text, which has been used at more than 450 colleges and universities during its life, offers clear writing, simple organization, abundant exercises, and precise examples that give students information about media writing and opportunities to develop their skills as professional writers. With a focus on a converged style of media writing, and converting that style into real work, this eighth edition maintains its classic and effective text-workbook format while staying ahead of the curve and preparing students for

their future careers.

**Instead of Medicating and Punishing** Laurie A. Couture, 2008-10 Parents in our culture today are bombarded by experts offering tools, programs, diagnoses, treatments and medications. Why doesn't any of it seem to help our children act and feel better? With this book parents will learn: . Children's brains are wired from conception through adolescence to need certain parenting and educational conditions that are different from almost everything that we have grown up with or have learned from our culture. . What people in peaceful tribal cultures have known about parenting and education for millennia . How to heal their children's mental health, behavioral and learning problems at the root causes, resulting in genuine improvements in family happiness. **Instead of Medicating and Punishing** is for parents of children of all ages, from pregnancy through late adolescence. It is for parents of children who have mild, moderate or severe mental health, learning or behavioral problems and also addresses the special needs of adoptive children.

**The Numinous Legacy** Adair Butchins, 2002 Where is God in the universe if anywhere? Why did God make germs? Why should we be so special? Could the universe have been different? This is a book that brings home, in no uncertain fashion, the discrepancy between the universe envisaged by the ancient sages and prophets and that of modern scientific cosmology, where the possibility of divine intervention looks less and less likely. Butchins demonstrates with clarity how the scientific method may be used, despite certain drawbacks, in an attempt to verify objective truth. It describes how the effect of the Copernican Revolution in the seventeenth century has steadily undermined the basic structure of the three great monotheistic religions of our day, Judaism, Christianity, and

Islam, especially with respect to their eschatological concepts. The Eastern religions, being less anthropomorphic, are less affected. The theistic argument from design is shown to be powerful enough to have caused disagreement among present-day scientists, in spite of the strictures of Professor Dawkins. In general, the book attempts to make some sense of the structure of the universe in terms of our own consciousness; it behoves the reader to consider tha

**The Poetry of Religious Sorrow in Early Modern England** Gary Kuchar,2011-03-03

In early modern England, religious sorrow was seen as a form of spiritual dialogue between the soul and God, expressing how divine grace operates at the level of human emotion. Through close readings of both Protestant and Catholic poetry, Kuchar explains how the discourses of 'devout melancholy' helped generate some of the most engaging religious verse of the period. From Robert Southwell to John Milton, from Aemilia Lanyer to John Donne, the language of 'holy mourning' informed how poets represented the most intimate and enigmatic aspects of faith as lived experience. In turn, 'holy mourning' served as a way of registering some of the most pressing theological issues of the day. By tracing poetic representations of religious sorrow from Crashaw's devotional verse to Shakespeare's weeping kings, Kuchar expands our understanding of the interconnections between poetry, theology and emotion in post-Reformation England.
