Redefining Public Space in Hanoi Sandra Kurfürst,2012 Hanoi, the capital of Vietnam, is known for its bustling street life. Public spaces, such as streets and sidewalks, are appropriated by citizens mostly for small-scale economic activities. Green parks are privatized in order to cater to the growing demand for leisure space. At the same time, official spaces like Ba Dinh Square or Ly Thai To Square are occupied by Hanoi's residents for sports and gatherings. This dissertation takes a close look at the practices and the meaning of public spaces and the development of public spheres in Hanoi. Dissertation. (Series: Southeast Asian Modernities - Vol. 13)

Quests of the Dragon and Bird Clan Paul Kekai Manansala,2006-10-01 Quests of the Dragon and Bird Clan examines how the seafaring trading people known as the Nusantara from Insular Southeast Asia influenced world history. This is a blook, a book based on a weblog (blog). The decision to publish the book came after requests to make the information in the blog available in an easier-to-read and more portable format. The advantage of the printed work is that the blog entries are arranged in easy-to-manage chronological order with out the need for the clicking through the blog archives. The glossary entries are also in alphabetical order for easy look-up, and a word index and table of contents further increase the readblity of the blog/book. Important supplementary articles have also been included in the appendices. A must-read for those who think there is more to history than what we find in mainstream publications.

Rural Energy Management* M.A.Masillamani & S. Ramaswamy,2005 The book is the first attempt in studyng the energy consumption patterns of different economics sectors that present in the rural areas. Infact, data relating to the production and consumption of both commercial and non-commercial sources of energy in rural areas are quite scanty. This book aims to generate database, based on micro level study, carried out by the authors in six villages of Dindigul District, Tamil Nadu. A total of 534 samples from the entire sectors (200 from household, 22 from industry, 161 from transport, 86 from commerce and 65 from social and service) have been interviewed for gathering information on energy use in the economic sectors of the rural economy. This book is arranged into seven chapters. The first chapter provides a brief introduction, stating the objectives, the methodology, and the scope and limitations of the study. The second chapter examines the profile of rural energy and its development programmes in India. The third chapter describes the review and appraisal of literature. A background of the study area profile and its socioeconomic milieu is given in the fourth chapter. The fifth chapter brings out a detailed analysis on energy consumption in the selected six sectors of the rural economy. Major findings and integrated energy system (appropriate, viable and feasible) are presented in the sixth chapter.

U.S. Marine Close Combat Fighting Handbook United States Marine Corps.,2011-01-26 There are currently more than 200,000 active-duty U.S. Marines and another 40,000 in the reserves. These Marines depend on the skills and techniques taught in this concise manual—and now you can too! Today's Marines operate in conflict situations that change from low intensity to high intensity over a matter of hours. This fully-illustrated guide features both the lethal and nonlethal techniques needed to responsibly handle any situation without unnecessarily escalating the violence. The U.S. Marine Close Combat Fighting Handbook explains the methods to quickly neutralize any attacker in close quarters and teaches you how to use any part of the human body as a weapon. It covers breaking a fall, defending against headlocks and chokes, protecting against punches and kicks, surviving armed attackers and more.

The Third International Conference on the Development of Biomedical Engineering in Vietnam Vo Van Toi,Truong Quang Dang Khoa,2010-04-03 Vietnam is a rapidly developing, socially dynamic country, where interest in biomedical engineering activities has grown considerably in recent years. The leadership of the Vietnamese government, and of research and educational institutions, are well aware of the importance of this field for the development of the country and have instituted policies to promote its development. The political, economic and social environment within the country offers unique opportunities for the international community and this conference was intended to provide a vehicle for the sharing of experiences; development of support and collaboration networks for research; and exchange of ideas on how to improve the educational and entrepreneurial environment to better address the urgent needs of Vietnam. In January 2004, under the sponsorship of the U.S. National Science Foundation, a U.S. delegation that consisted of Biomedical Engineering professors from different universities in the United States, visited several universities and research institutions in Vietnam to assess the state of development of this field. This delegation proposed a five year plan that was enthusiastically embraced by the international scientific communities to actively develop collaborations with Vietnam. Within this framework, in July 2005, the First International Conference on the Development of Biomedical Engineering in Vietnam was held in Ho Chi Minh City. From that conference a Consortium of Vietnam-International Universities was created to advise and assist the development of Biomedical Engineering in Vietnamese universities.

Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book

argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

The Story of a Red-deer Sir John William Fortescue,1900

Hidden in Plain Sight Ellis Amdur,2018-04-27 Ellis Amdur's writing on martial arts has been groundbreaking. In *Dueling with O-sensei*, he challenged practitioners that the moral dimension of martial arts is expressed in acts of integrity, not spiritual platitudes and the deification of fantasized warrior-sages. In *Old School*, he applied both academic rigor and keen observation towards some of the classical martial arts of Japan, leavening his writing with vivid descriptions of many of the actual practitioners of these wonderful traditions. His first edition of *Hidden in Plain Sight* was a discussion of esoteric training methods once common, but now all but lost within Japanese martial arts. These methodologies encompassed mental imagery, breath-work, and a variety of physical techniques, offering the potential to develop skills and power sometimes viewed as nearly superhuman. Usually believed to be the provenance of Chinese martial arts, Amdur asserted that elements of such training still remain within a few martial traditions: literally, 'hidden in plain sight.' Two-thirds larger, this second edition is so much more. Amdur digs deep into the past, showing the complexity of human strength, its adaptation to varying lifestyles, and the nature of physical culture pursued for martial ends. Amdur goes into detail concerning varieties of esoteric power training within martial arts, culminating in a specific methodology known as 'six connections' or 'internal strength.' With this discussion as a baseline, he then discusses the transfer of esoteric power training from China to various Japanese jujutsu systems as well as Japanese swordsman-ship emanating from the Kurama traditions. Finally, he delves into the innovative martial tradition of Daito-ryu and its most important offshoot, aikido, showing how the mercurial, complicated figures of Takeda Sokaku and Morihei Ueshiba were less the embodiment of something new, than a re-imagining of their past.

Speak it Louder Deborah Wong,2004-07-19 *Speak It Louder: Asian Americans Making Music* documents the variety of musics-from traditional Asian through jazz, classical, and pop-that have been created by Asian Americans. This book is not about Asian American music but rather about Asian Americans making music. This key distinction allows the author to track a wide range of musical genres. Wong covers an astonishing variety of music, ethnically as well as stylistically: Laotian song, Cambodian music drama, karaoke, Vietnamese pop, Japanese American taiko, Asian American hip hop, and panethnic Asian American improvisational music (encompassing jazz and avant-garde classical styles). In Wong's hands these diverse styles coalesce brilliantly around a coherent and consistent set of questions about what it means for Asian Americans to make music in environments of inter-ethnic contact, about the role of performativity in shaping social identities, and about the ways in which commercially and technologically mediated cultural production and reception transform individual perceptions of time, space, and society. *Speak It Louder: Asian Americans Making Music* encompasses ethnomusicology, oral history, Asian American studies, and cultural performance studies. It promises to set a new standard for writing in these fields, and will raise new questions for scholars to tackle for many years to come.
