Histories on Screen Sam Edwards,Faye Sayer,Michael Dolski,2018-02-08 How, as historians, should we 'read' a film? Histories on Screen answers this and other questions in a crucial volume for any history student keen to master source use. The book begins with a theoretical 'Thinking about Film' section that explores the ways in which films can be analyzed and interrogated as either primary sources, secondary sources or indeed as both. The much larger 'Using Film' segment of the book then offers engaging case studies which put this theory into practice. Topics including gender, class, race, war, propaganda, national identity and memory all receive good coverage in what is an eclectic multi-contributor volume. Documentaries, films and television from Britain and the United States are examined and there is a jargon-free emphasis on the skills and methods needed to analyze films in historical study featuring prominently throughout the text. Histories on Screen is a vital resource for all history students as it enables them to understand film as a source and empowers them with the analytical tools needed to use that knowledge in their own work.

**Reality TV** Annette Hill,2005 Reality TV restores a crucial, and often absent, element to the critical debate about reality television: the voices of people who watch reality programmes. From Animal Hospital to Big Brother, Annette Hill argues that much can be learned from listening to audience discussion about this popular and rapidly changing television genre. Viewers' responses to reality TV can provide invaluable information to enhance our understanding of both the reality genre and contemporary television audiences. Drawing on quantitative and qualitative audience research to understand how viewers categorise the reality genre, and how they judge the performance of ordinary people and the representation of authenticity within different types of reality programmes. \* Do audiences think reality TV is real? \* Can people learn

from watching reality TV? \* How critical are viewers of reality TV? Reality TV argues that audiences are engaged in a critical examination of the development of popular factual television. The book examines how audiences can learn from watching reality programmes, and how viewers think and talk about the ethics of reality TV.

Cuba's 156 radio stations and 27 television stations sought the best talent from around the world. They paid large sums for exclusive rights to broadcast baseball games and boxing matches.
