Small Business in a Global Economy [2 volumes] Scott L. Newbert, 2015-05-05 This informative set analyzes the dynamics involved with creating, growing, and managing small businesses amid different geographic, institutional, and political environments. This two-volume work explores the behavior and decision making of small companies; their business strategies for launch, growth, and survival; and their contribution to the larger global economy. Utilizing information and data gleaned from proven entrepreneurs and small business operations, this reference provides insight into the political, environmental, and competitive forces that support and impede small business ownership, and offers strategies for navigating them. Written by leading researchers from around the world, the set presents a broad view of the small business sector, focusing on conception, ownership, financing, and growth strategies. A look at external factors features the impact of political and environmental influences; extant regulations affecting small firms; and programs for promoting this sector. The first volume takes a micro view of the small business phenomenon, profiling the owner and the skills necessary to be successful. The second volume utilizes a macro approach, focusing on the operational concerns of and the environment factors bearing upon small businesses.

In Search of Business Models in Social Entrepreneurship Samapti Guha, Satyajit Majumdar, 2021-05-28 This book discusses different innovative business models adopted by social enterprises to bring about social change in terms of creating capabilities among the marginalised section of people. These models also bring the sustainability of the enterprises to serve the people continuously. Establishing a theoretical base for further research in the area of business models in social entrepreneurship, the book consists of research work from various disciplines from scholars with experience and insights on social entrepreneurship, and who discuss one or more aspect(s) of business model, presenting their work with sound research methodologies. The book takes a broader view of the concept – a) social entrepreneurs are driven by social value and justice, b) social entrepreneur may or may not have a market orientation, c) social entrepreneurs solve variety of social problems such as poverty, health, illiteracy, environmental degradation using the principles of business and with the help of social innovation, and d) social enterprise focus on bringing social change by creating social impact. Chapters of this book are divided into three core themes. The first one – Concepts, Patterns and Values – includes contributions related to sustainable development, business model and value creation in the context of social entrepreneurship, innovation and cross-cultural influence on business models aspects. The chapter of second theme – Enablers and Influencers – discuss role of corporate in promoting social entrepreneurship as a social responsibility, social entrepreneurship and value creation, BoP market, supply chain, structural and infrastructural choices, family as a stakeholder of indigenous enterprise, and women entrepreneurship. The third and final theme – Innovation – addresses social, open innovation and business model innovations, IPR, firm performance, collaboration and alliance, software and biotechnology industries, decision logic behind social enterprise creation, and strategy and strategic philanthropy concepts. Containing contributions from academia, industry professionals, investors, policy-makers, and other professionals, all from multiple disciplines, the book would interest the same vast audience.

The Start-up PUSH Terri Friel, George Vukotich, 2018-07-01 This book explores, documents and establishes how to help founders start businesses with the collaboration of local and international resources. An incubator, accelerator or science park all have this goal but provide a variety of foci and support. At a minimum, it's important to not only attract entrepreneurs but to have support services that can include mentoring, financial support and other services that make the incubator really filled with energy and potential. It's becoming insufficient to just have office space and WiFi. It is also important to develop good interactions between directors, the start-up community and residents. Managing the community to help

residents to launch successfully is the main goal of the director. It's also important to stay abreast of the innovations happening in start-up support. Today there are many ways to incubate from bare bones office space to Incubator 1.0 space with some support to Incubator 2.0 with a great deal of support including a fund. For that reason, it's important to develop a clear strategy for the type, style, clientele and support that will be built. This book provides guidance in three main areas: 1) What are the different options for incubators, accelerators and science parks, 2) How to assist the start-up founders (residents) and 3) How to manage the space.

Sustainable Logistics and Supply Chains Meng Lu, Joost De Bock, 2015-09-04 This book addresses the main challenges affecting modern logistics and supply chains and is organized according to five main themes: supply chain strategy and management, information and communication technology (ICT) for logistics and related business models, vertical and horizontal collaboration, intelligent hubs (e.g. ports and cities) and policy for sustainable logistics. The key findings presented are based on both extensive research and on business cases. The book examines logistics from a comprehensive viewpoint embracing the entire supply chain. The overarching advanced logistics and supply chain concept at the heart of this book endeavors to contribute to a sustainable intelligent transport system by making it more efficient, cost-effective, safe, reliable and competitive. Specifically, the book focuses on the need for a variety of supply chain, logistics and transport options, on the potential offered by technological developments, infrastructural and organizational aspects, information flows, the financial and legal domain, harmonization and the complexity of implementation. In closing, the book presents new approaches to the coordination of sound business and governance models.

Impact of Artificial Intelligence in Business and Society Francesco Paolo Appio, Davide La Torre, Francesca Lazzeri, Hatem Masri, Francesco Schiavone, 2023-07-31 Belonging to the realm of intelligent technologies, it is increasingly accepted that artificial intelligence (AI) has evolved from being merely a development standpoint in computer science. Indeed, recent reports and academic publications show that we are clearly on the path toward pervasive AI in both business and society. Organizations must adopt AI to maintain a competitive advantage and explore opportunities for unprecedented innovation. This book focuses on understanding the wide range of opportunities as well as the spectrum of challenges AI brings in different business contexts and society at large. The book highlights novel and high-quality research in data science and business analytics and examines the current and future impact of AI in business and society. The authors bridge the gap between business and technical perspectives and demonstrate the potential (and actual) impact on society. Embracing applied, qualitative, and quantitative research as well as field experiments and data analysis, the book covers a broad range of topics including but not limited to human-centered AI, product and process innovation, corporate governance, AI and ethics, organizational performance, and entrepreneurship. This comprehensive book will be a valuable resource for researchers, academics, and postgraduate students across AI, technology and innovation management, and a wide range of business disciplines.

and Business Guide - Strategic and Practical Information

Commercializing Micro-Nanotechnology Products David Tolfree, Mark J. Jackson, 2007-11-19 Micro-nanotechnologies (MNT) are already making a profound impact on our daily lives. New applications are well underway in the US, Asia, and Europe. However, their potentially disruptive nature, along with the public's concerns, has produced a number of challenges. *Commercializing Micro-Nanotechnology Products* provides a snapshot of the current market situation and details the need for MNT development. It outlines the problems facing today's businesses and discusses the processes for commercialization, road mapping, technology transfer analysis, and entrepreneurial development. The book begins by detailing the steps required to turn an idea into a marketable product. The editors give examples of previously successful products and relate to their own experiences in development. Next, the text focuses on the importance of entrepreneurship and the required steps to finance and develop a marketing strategy. It contains various definitions of nanotechnology and how each relates to roadmap and production issues. Three detailed case studies from the leading MNT development and manufacturing companies describe how each venture started and progressed to become a market leader. These studies offer valuable insight into overcoming the challenges related to achieving financial backing and specifying the right product for development. This reference provides the only insightful appraisal of the current status of micro-nanotechnology products. It describes a concise process for product commercialization, from market research to end product realization. *Commercializing Micro-Nanotechnologies* provides a clear strategy for choosing the right product to development and overcoming challenges in the growing global market.

Sustainable Business Models Lars Moratis, Frans Melissen, Samuel O. Idowu, 2018-06-28 This book provides a rich overview and takes a closer look at the current state of theory and practice in the field of sustainable business models. The chapters in this book examine and analyze existing and new approaches towards sustainable business models and showcase the implementation of sustainable business through both quantitative and qualitative studies, including several case studies and many practical examples. It approaches these issues from the standpoints of diverse business disciplines to yield new insights and ideas that are relevant from both an academic and professional perspective. In its essence, the book examines how firms' value creation processes can be driven by sustainability and social responsibility and how this impacts business and society. Readers will find a range of sustainable business models that have been employed and are being pioneered in various industries around the globe - which are thoroughly investigated and discussed, and put into a comprehensive conceptual framework.

Responsible Management Education Principles for Responsible Management Education, 2021-12-24 The ebook is fully Open Access. Written by many of the key influencers at the Principles for Responsible Management Education (PRME), the book focuses on advancing sustainable development into education, research and partnerships at higher education institutions and, specifically, at business schools, with the purpose of educating responsible leaders for today and tomorrow. The book serves as a concrete source of inspiration for universities and other stakeholders in higher education on structures, processes and content for how to advance responsible management education and sustainable development. It articulates the importance of key themes connected with climate change, gender equality, anti-corruption, business for peace, anti-poverty and other topics that are related to the Sustainable Development Goals (SDGs). The book emphasizes the significance of local-global interaction, drawing on local action at management schools in combination with global knowledge exchange across the PRME community. In addition, the book clearly demonstrates the background, key milestones and successful achievements of PRME as a global movement by management schools in collaboration with a broader community of higher education professionals. It exemplifies action in various local geographies in PRME Chapters, PRME Working Groups and the PRME Champions work to advance responsible management education. The authors of the book are all globally experienced deans, professors, educators, executives and students with a global outlook, who are united to advance responsible management education locally and

globally. The book will be invaluable reading for university leaders, educators, business school deans and students wanting to understand and embed responsible management education approaches across their institutions and curricula. The Open Access version of this book, available at www.taylorfrancis.com, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

Science Parks and Innovation Centres J. M. Gibb, John Michel Gibb, 1985 This volume describes the contribution made by science parks and innovation centres to the promotion of innovation, local business development and job creation. The basic economic and social problems such parks can help to solve are described. An overview is given of experience lessons learned from science parks in the USA, the Far East, and Europe. Overall policy questions are tackled, i.e. science parks and innovation centres as instruments of regional policy; organization and management; finance for operation and creation of new enterprises; and the contribution of universities and research establishments. Attention is then focused on practical experience. Case studies describe the regional impact of science parks and innovation centres, as well as the development of young technology-based firms. Also discussed is the selection of entrepreneurs, training programmes and advisory services, and how to solve the marketing problems of technology-based enterprises. The book gives a valuable insight into a wide range of problems and will interest a wide readership, e.g.

E-Business and Telecommunications Mohammad S. Obaidat, Enrique Cabello, 2019-01-17 This book constitutes the refereed proceedings of the 14th International Joint Conference on E-Business and Telecommunications, ICETE 2017, held in Madrid, Spain, in July 2017. ICETE is a joint international conference integrating four major areas of knowledge that are divided into six corresponding conferences: International Conference on Data Communication Networking, DCNET; International Conference on E-Business, ICE-B; International Conference on Optical Communication Systems, OPTICS; International Conference on Security and Cryptography, SECRIPT; International Conference on Signal Processing and Multimedia, SIGMAP; International Conference on Wireless Information Systems, WINSYS. The 17 full papers presented were carefully reviewed and selected from 195 submissions. The papers cover the following key areas of information and communication technologies, including data communication and networking, e-business and telecommunications: data communication networking; e-business; optical communication systems; security and cryptography; signal processing and multimedia applications; wireless networks and mobile systems.

Higher Education and Local Economic Development Ernesto Tavoletti, 2009 It is an intellectual necessity for universities to be open to participation by scholars and students all over the world; despite this, their sources of funding are almost entirely domestic and primarily governmental. The downloading of universities from national to regional government means that funding is increasingly even regional or local. Policy makers, firms and students, who are increasingly funding universities, are not interested in the development of academic knowledge: they demand teaching, research and services that are useful for local economic development and employability. As a consequence there is a divergence between the aspirations of universities and their stakeholders' needs. Establishing beneficial relations between universities and their stakeholders is vital for the survival of European districts and clusters of SMEs. The research highlights how critical the dilemma is and suggests a theoretical framework for resolving it, through the introduction of a new model of governance for universities and a new concept of knowledge.

European Business Environment Frans Somers, 2019-11-07 Doing business in Europe is increasingly becoming an everyday reality for many companies, not only large corporations, but also small and medium-sized enterprises. European Business Environment offers students a practical introduction to how to create, manage and develop business opportunities in the European Union. Taking a multidisciplinary approach to doing business in the EU, this textbook focuses on the European dimensions of economics, marketing and law. With case studies presented throughout the

book, the relationship between business and the political institutions, policies and regulations of the European Union are explored. This is an essential introductory textbook for students at both undergraduate and graduate levels in a wide range of degree and professional programmes, including Economics, MBA, Law and Marketing. It is of particular relevance to students interested in the European context of these disciplines and can be used as a core textbook for courses in European Integration or Business and International Environment in Europe and other parts of the world.

The Role of Ecosystems in Developing Startups Rippa, Pierluigi, Ben-Hafaïedh, Cyrine, Kurczewska, Agnieszka, Raffa, Mario, Xheneti, Mirela, 2022-10-18 Presenting cutting-edge research from Europe and beyond, *The Role of Ecosystems in Developing Startups* examines the diverse triggers of the entrepreneurial process and evaluates the richness of different entrepreneurial ecosystems.

Transition Redesigned Wojciech W. Gasparski, 2017-07-28 *Transition Redesigned* deals with the philosophical bases of different types of transition: change in the economy, organizational/institutional change, and change in social and individual relationships. The editors' primary goal is to give further impetus to a much-needed worldwide debate on the issue of transition towards a better future. The volume reviews transitions made in different areas of human activity, assesses their relevancy, and analyzes their contexts. During this century, different organizations and institutions will undergo a level of radical and global change that has rarely been seen. The expected shift must be addressed in terms of a multidimensional transition toward building a sustainable society. Do we have an understanding of transition relevant to the task of meeting at least some of the challenges presented in this volume? Do we need a radical innovation for redesigning the transition that may enforce real social and ethical responsibilities into organizational practice on different levels and bring to life new ideas? *Transition Redesigned* seeks to answer these questions.
