The Twilight's Last Gleaming Nathan L. Combs,2011-05 If a national catastrophe occurs in the United States, those unprepared to survive should be prepared to die If you've been considering preparations to ensure your family survives what could be coming our way, the Twilight's Last Gleaming is a must have survival book. In the Twilight's Last Gleaming, Combs tells it like it is, exposing aspects of survival (most) people would never have considered. At times disturbing, but always laugh-out-loud funny, The Twilight's Last Gleaming reads like a novel and is a gold-mine of serious, sensible, useful, and economical survival information. Whether or not you think a disaster is possible, and regardless of your survival knowledge or expertise, if you read only one book this year, read The Twilight's Last Gleaming. Destined to become a classic, It's also the book that will help ensure the survival of your family. Nathan L. Combs, a U.S. Navy veteran, has over ten years experience as a police officer and has earned several top-shooter awards. He has also operated a law enforcement auxiliary and a private ambulance service. An avid outdoorsman, he has hunted, fished, camped, and backpacked throughout the United States for over fifty years and has studied and practiced survival applications for over forty years. He owned and operated a successful distribution company for twenty years and recently retired to Cape Coral, Florida where he operates a website and assists people with survival preparations.

Ecological and Environmental Science: A Research Perspective Prof. Dr. Nirmal Kumar, J.I.,Dr. Rita N. Kumar,Dr. Hiren B. Soni, The book "Ecological and Environmental Science: A Research Perspective" is a compilation of authors' original research papers, scientific articles, review articles, popular articles, general articles, and short notes on forest ecology, wetland ecology,

plant ecology, bird ecology, and animal ecology. The book is a perfect amalgamation of burgeoning and thrust topics spanning biodiversity, and conservation and management of floral and faunal elements including ecology and biodiversity of phytoplankton, zooplankton, aquatic macrophytes, mangroves, terrestrial plants, animals (butterflies, reptiles, mammals) and birds. It covers ecological and environmental factors affecting abiotic and biotic components prevailed in forest, desert, grassland and wetland habitats and ecosystems. The present book highlights field studies and laboratory investigations carried out by the authors during their research journey of 22 years (1998-2020). It discusses phenology, ethnobotanical, ethnomedicinal and aesthetic values of plants, resource use patterns by local inhabitants, socio-cultural aspects, livelihood dependency, rare and endangered plants, animals and birds, anthropogenic pressures, conservation and management strategies of endemic, exotic, and invasive species, and so on. The book covers unique and promising research topics e.g. hydrochemistry, geochemistry, biomonitoring of heavy metals in aquatic and terrestrial plants, metal remediation, environmental modeling, environmental archaeology, environmental bioindicators, environmental forensics, etc. The authors believes that this book is a perfect blend of their research work on two integral branches of biology i.e. ecology and environmental science, which will undoubtedly enrich and enhance the knowledge and awareness of laymen and scientific community world over especially in the field of ecology and biodiversity of plants, animals, and birds, associated with physical, chemical, biological, ecological and environmental factors. The present book would certainly be useful and handy as a ready-reference material for students, academicians, researchers, scientists, ecological and environmental consultants, restoration specialists, practitioners, conservationists, and biodiversity managers at regional, national and global platform.
