1847, Grosse île André Charbonneau,André Sévigny,Parks Canada,1997 This book is a day-to-day account of the sad events that took place in 1847, a year in which nearly 100,000 emigrants, mostly Irish, disembarked at Grosse Ile or the Port of Quebec. Written as a diary, the book gives a detailed description of the administrative measures taken by the authorities to deal with the influx of such a large number of emigrants in deplorable conditions of disease and misery. It records the arrivals and departures of ships and gives a weekly account of the sick and the dead. The reader will also get an idea of the reactions expressed by the newspapers at the time and read first hand accounts by the emigrants themselves, priests, doctors, sailors and other contemporaries.

Biology and Ecology of Venomous Marine Cnidarians Ramasamy Santhanam,2020-01-31 Seas and oceans cover 71 % of the earth's surface and they are home to 80% of all life found on the planet . Among the different components of marine life, the phylum Cnidaria (formerly Coelenterata) has been reported to be responsible for more envenomations than any other marine phylum. It is believed that 2% of its known 11000 species are venomous to

humans. Incidents caused by jellyfish are common all around the globe, with serious manifestations and occasional deaths reported in some countries. The Australian box jellyfish, *Chironex fleckeri*, has been reported to be very dangerous to humans, as contact with its tentacles can provoke immediate cardiovascular collapse and death within minutes. Though other volumes on venomous marine fauna are available, this is the first comprehensive book focusing on venomous marine cnidarians. It is a valuable text-cum-reference resource for researchers, teachers and students of various disciplines, including fisheries science, marine biotechnology and marine biology and for university and college libraries. It is also a useful guide for beachgoers, divers, physicians and environmentalists.

Chemical Ecology Anne-Geneviève Bagnères, Martine Hossaert-McKey, 2016-08-29 The book features comparative perspectives on the field of chemical ecology, present and future, offered by scientists from a wide variety of disciplines. The scientists contributing to this book -biologists, ecologists, biochemists, chemists, biostatisticians - are interested in marine, freshwater and terrestrial ecosystems and work on life forms ranging from micro-organisms to mammals, including humans, living in areas from the tropics to polar regions. Here, they cross their analyses of the present state of chemical ecology and its perspectives for the future. Those presented here include complex, multispecies communities and cover a wide range both of organisms and of the types of molecules that mediate the interactions between them. Up to now, no book has presented a solid scientific treatment of a wide range of examples. This book illustrates a diverse panel of the most advanced aspects of this rapidly expanding field.

Sustainable Modernity Nina Witoszek, Atle Midttun, 2018-04-17 The Open Access version of this book, available at <https://www.taylorfrancis.com/books/e/9781351765633>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license. In the 21st century, Norway, Denmark and Sweden remain the icons of fair societies, with high economic productivity and quality of life. But they are also an enigma in a cultural-evolutionary sense: though by no means following the same socio-economic formula, they are all cases of a non-hubristic, socially sustainable modernity that puzzles outside observers. Using Nordic welfare states as its laboratory, Sustainable Modernity combines evolutionary and socio-cultural perspectives to illuminate the mainsprings of what the authors call the well-being society. The main contention is that the Nordic uniqueness is not merely the outcome of one particular set of historical institutional or political arrangements, or sheer historical luck; rather, the high welfare creation inherent in the Nordic model has been predicated on a long and durable tradition of social cooperation, which has interacted with global competitive forces. Hence the socially sustainable Nordic modernity should be approached as an integrated and tightly orchestrated ecosystem based on a

complex interplay of cooperative and competitive strategies within and across several domains: normative-cultural, socio-political and redistributive. The key question is: Can the Nordic countries uphold the balance of competition and cooperation and reproduce their resilience in the age of globalization, cultural collisions, the digital economy, the fragmentation of the work/life division, and often intrusive EU regulation? With contributors providing insights from the humanities, the social sciences and evolutionary science, this book will be of great interest to students and scholars of political science, sociology, history, institutional economics, Nordic studies and human evolution studies.

Digesting Difference Kelly McKowen, John Borneman, 2020-09-05 Migration across Europe's external and internal borders has introduced unprecedented sociocultural diversity, and with it, new questions about belonging, identity, and the incorporation of others into extant and emergent groups and communities. Bringing together leading cultural anthropologists, *Digesting Difference* offers a series of ethnographic studies that show incorporation to be a process rooted in the everyday encounters and exchanges between strangers, friends, lovers, neighbors, parents, workers, and others. Rich in ethnographic detail and ambitious in its theorizing, the volume tells the stories of Europe's transformative engagement with sociocultural difference in the wake of migration associated with EU expansion, the Eurozone meltdown, and the 2015-2016 refugee crisis. It promises to be essential reading for scholars and students of cultural anthropology, migration, integration, and European studies.
