**Chemical Ecology** Anne-Geneviève Bagnères, Martine Hossaert-McKey, 2016-08-29 The book features comparative perspectives on the field of chemical ecology, present and future, offered by scientists from a wide variety of disciplines. The scientists contributing to this book –biologists, ecologists, biochemists, chemists, biostatisticians – are interested in marine, freshwater and terrestrial ecosystems and work on life forms ranging from micro-organisms to mammals, including humans, living in areas from the tropics to polar regions. Here, they cross their analyses of the present state of chemical ecology and its perspectives for the future. Those presented here include complex, multispecies communities and cover a wide range both of organisms and of the types of molecules that mediate the interactions between them. Up to now, no book has presented a solid scientific treatment of a wide range of examples. This book illustrates a diverse panel of the most advanced aspects of this rapidly expanding field.

**The Dutch Navy of the Seventeenth and Eighteenth Centuries** Jaap R. Bruijn, 2017-10-18 This book is a reprint of Jaap R. Bruijn's 1993 book, *The Dutch Navy*, which offers an English-language overview of the history of the Dutch Navy in the seventeenth and eighteenth centuries. It is divided into three chronological periods: the 'old', 'new', and 'second-rate' navy. Rather than presenting a history of naval conflict, this volume approaches Dutch naval history from the following four angles: operations, administration, officer duties, and sailor duties. It consists of a series foreword, a new introduction detailing recent developments in naval historiography, the original introduction providing a history of Dutch maritime history from the middle ages to the beginning of the seventeenth

century, a conclusion, and a bibliography and index. It explores the astounding amount of naval power belonging to such a sparsely populated nation, plus the rapid rates of success and decline. It confirms that the Dutch navy - with its logic, innovation, and missteps alike - provides an excellent case study of both the development of European bureaucracy and armed forces in the Early Modern period.
