## **Learn How To Type Faster** Theresa Wrobliski,2021-08-11

Touch typing is typing without looking at the keyboard. The fundamental idea is that each finger is given its section of the keyboard and your fingers learn the location of the keyboard through practicing regularly and gaining muscle memory to eventually build up speed whilst typing. Learning to touch-type with this method takes only 10 hours. You will reap the benefits for a lifetime, whether you are using a keyboard at work or home. The easy-to-use lessons are provided into manageable one-hour blocks and there are plenty of exercises to consolidate what you have learned. And touch-typing is a skill that can make you money as well as saving you time.

*How to Type Fast* Brandon Nankivell,2015-07-23 Do you want to learn how to type fast? Do you want to learn how to write faster and complete your book, essay, or script in half the time? Wait no longer! It's time to save time, boost productivity, and double your typing speed. This book is neatly organized and will introduce you to the 7 keystones to success. The keystones are the key to learning how to type like a pro. No longer will you have to use the inconvenient 'hunt-and-peck' approach. Here is what you'll learn: - How to set goals - How to choose the right keyboard - How to apply good ergonomics - How to touch type - How to identify and fix bad habits - How to write books 2x faster - Typing for beginners and experts - 35 typing tips and techniques - Enhance your touch typing skills for a lifetime - And much more... Unlike the other guides out there, this book is full of quality material that is often left out in other guides. As an author with 10 years of typing experience, an average typing speed of 128 words per minute, and a volunteer at Typeracer.com, you can be assured you are learning from a reliable source. Additionally, many tips and techniques have been gathered from some of the top typists in the world and various typing forums, all compiled and presented in an easy-to-read chapter. It doesn't matter if you

can type 10 words per minute or 100, there will be value in this book for you. Think about this: If you are currently 30 years of age and type at 80 wpm for 2 hours a day 5 days a week until you are 60 years of age, and assuming you type at 40 wpm, you will have saved 325 days of your life. 325 days of your life. If you are younger than 30 or continue typing past the age of 60, even better. Imagine what you could do with all that extra time. Spend more time building your business, bonding with your family and friends and traveling the world. The list is endless. The earlier you learn, the better, but it's never too late. Finally, 3 bonus chapters have been included: 10 answers to questions I'm asked most frequently, how to make money by typing, and a case study on how I went from typing 0 - 125 words per minute and you can too. **Zoom-Type** Renee R Ellison,2004-02-03 Teach yourself how to type in 5 days instead of wasting all year on it. Zoom-Type is a

revolutionary breakthrough in teaching touch-typing FAST by using the right brain. 100s of quick snapshots and a musical finger march get you seeing, saying, and tapping the correct keys with the correct fingers in just 5 days (each session lasts 5 minutes). For ages 4 to 94. Totally portable-no computer necessary. This is the only right-brain typing course on the market. You'll be speed-typing while students trying other programs are still just getting started. Most computer-based programs designed to teach typing are still in the dark ages, pedagogically. The brain learns best by pictures. This typing course is unique in 3 ways: (1) Spaced repetition-five-minute lessons, several times a day! Away with hour-long drudgery! Rapid-fire quick imprints of the autonomic nervous system gets the job done. (2) Right brain-uses the picture side of the brain, not just the left side as other typing methods do. With Zoom-Type, you subconsciously learn where the letters LIVE, not just what they ARE. (3) Splintered skills-you learn each skill separately, in small increments, and then when you put them together all the brain has to do is jump the synapses between the already acquired mini-skills. The brain is tricked into thinking the whole task is super EASY. THIS VERSION IS ONLY THE PAPERBACK BOOK. IT IS POSSIBLE TO LEARN THIS PROGRAM WITH ONLY THIS BOOK, BUT USING THE AUDIO FILES IS HIGHLY RECOMMENDED.
