The Archaeology of Death in Roman Syria Lidewijde de Jong, 2017-07-20 In the first centuries of the Common Era, an eclectic collection of plain and embellished underground and aboveground tombs filled the cemeteries of the Roman province of Syria. Its inhabitants used rituals of commemoration to express messages about their local identity, family, and social position, while simultaneously ensuring that the deceased was given proper burial rites. In this book, Lidewijde de Jong investigates these customs and the belief systems that governed the choices made in the commemoration of Syrian men, women and children. Presenting the first all-inclusive overview of the archaeology of death in Roman Syria, this book combines spatial analysis of cemeteries with the study of funerary architecture, decoration, and grave goods, as well as information about the deceased provided by sculptural, epigraphic, and osteological sources. It sheds a new light on life and death in Syria and offers a novel way of understanding provincial culture in the Roman Empire.

Phoenicia J. Brian Peckham, 2014-10-23 Phoenicia has long been known as the homeland of the Mediterranean seafarers who gave the Greeks their alphabet. But along with this fairly well-known reality, many mysteries remain, in part because the record of the coastal cities and regions that the people of Phoenicia inhabited is fragmentary and episodic. In this magnum opus, the late Brian Peckham examines all of the evidence currently available to paint as complete a portrait as is possible of the land, its history, its people, and its culture. In fact, it was not the Phoenicians but the Canaanites who invented the alphabet; what distinguished the Phoenicians in their turn was the transmission of the alphabet, which was a revolutionary invention, to everyone they met. The Phoenicians were traders and merchants, the Tyrians especially, thriving in the back-and-forth of barter in copper for Levantine produce. They were artists, especially the Sidonians, known for gold and silver masterpieces engraved with scenes from the stories they told and which they exchanged for iron and eventually steel; and they were builders, like the Byblians, who taught the alphabet and numbers as elements of their trade. When the Greeks

went west, the Phoenicians went with them. Italy was the first destination; settlements in Spain eventually followed; but Carthage in North Africa was a uniquely Phoenician foundation. The Atlantic Spanish settlements retained their Phoenician character, but the Mediterranean settlements in Spain, Sicily, Sardinia, and Malta were quickly converted into resource centers for the North African colony of Carthage, a colony that came to eclipse the influence of the Levantine coastal city-states. An emerging independent Western Phoenicia left Tyre free to consolidate its hegemony in the East. It became the sole west-Asiatic agent of the Assyrian Empire. But then the Babylonians let it all slip away; and the Persians, intent on war and world domination, wasted their own and everyone's time trying to dominate the irascible and indomitable Greeks. The Punic West (Carthage) made the same mistake until it was handed off to the Romans. But Phoenicia had been born in a Greek matrix and in time had the sense and good grace to slip quietly into the dominant and sustaining Occidental culture. This complicated history shows up in episodes and anecdotes along a frangible and fractured timeline. Individual men and women come forward in their artifacts, amulets, or seals. There are king lists and alliances, companies, and city assemblies. Years or centuries are skipped in the twinkling of any eye and only occasionally recovered. Phoenicia, like all history, is a construct, a product of historiography, an answer to questions. The history of Phoenicia is the history of its cities in relationship to each other and to the peoples, cities, and kingdoms who nourished their curiosity and their ambition. It is written by deduction and extrapolation, by shaping hard data into malleable evidence, by working from the peripheries of their worlds to the centers where they lived, by trying to uncover their mentalities, plans, beliefs, suppositions, and dreams in the residue of their products and accomplishments. For this reason, the subtitle, Episodes and Anecdotes from the Ancient Mediterranean, is a particularly appropriate description of Peckham's masterful (posthumous) volume, the fruit of a lifetime of research into the history and culture of the Phoenicians.

Saladin David Nicolle, 2011-12-20 This Osprey Command book looks closely at the early life, military experiences and key battlefield exploits of Al-Malik al-Nasir Yusuf Ibn Najm al-Din Ayyub Ibn Shahdi Abu'l-Muzaffar Salah al-Din – or Saladin as he is more commonly known outside the Islamic world – who is broadly regarded as the greatest hero of the Crusades, even in Europe. Most chroniclers present him as a man of outstanding virtue, courage and political skill. More recently, however, efforts have been made to portray Saladin as an ambitious, ruthless and even devious politician, and as a less brilliant commander than is normally thought. This book sets out to reveal that the truth is, as usual, somewhere in between.

The Oxford Handbook of the Archaeology of the Levant Margreet L. Steiner,Ann E. Killebrew,2014-01-16 This Handbook aims to serve as a research guide to the archaeology of the Levant, an area situated at the crossroads of the ancient world that linked the eastern Mediterranean, Anatolia, Mesopotamia, and Egypt. The Levant as used here is a historical geographical term referring to a large area which today comprises the modern states of Israel, Jordan, Lebanon, western Syria, and Cyprus, as well as the West Bank, Gaza Strip, and the Sinai Peninsula. Unique in its treatment of the entire region, it offers a comprehensive overview and analysis of the current state of the archaeology of the Levant within its larger cultural, historical, and socio-economic contexts. The Handbook also attempts to bridge the modern scholarly and political divide between archaeologists working in this highly contested region. Written by leading international scholars in the field, it focuses chronologically on the Neolithic through Persian periods - a time span during which the Levant was often in close contact with the imperial powers of Egypt, Anatolia, Assyria, Babylon, and Persia. This volume will serve as an invaluable reference work for those interested in a contextualised archaeological account of this region, beginning with the 'agricultural revolution' until the conquest of Alexander the Great that marked the end of the Persian period.

Wace and Blegen C W Zerner,2024-02-19 This international conference, sponsored jointly by the American School of Classical Studies and the British School of Archaeology at Athens, was dedicated to the memories of Alan John Bayard Wace and Carl William Blegen and to their long archaeological collaboration. The main theme of the conference was taken from their pioneering article, Pottery as Evidence for Trade and Colonisation in the Aegean Bronze Age, *Klio* 32 (1939). The papers presented reflect the current state of scholarly opinion about prehistoric pottery from Mainland Greece and the extensive trade in that pottery, 50 years after Wace and Blegen's article. With 39 papers by archaeologists from 13 countries, the volume presents comprehensive surveys by period and area, as well as detailed discussions of new finds and problems, ranging from the Early, Middle, and Late Bronze Ages on the Mainland and islands of Greece, as well as Cyprus, the Levant, Egypt, Anatolia and Italy.

Excavations by K.M. Kenyon in Jerusalem, 1961-1967 Joan Crowfoot Payne,1995 Kathleen Kenyon died in 1978 without having published final reports on her excavations in Jerusalem. These are being now published in five volumes. This volume concentrates on finds outside the walls of the Iron Age city, and particularly on the enigmatic, pottery-rich deposit in Caves I and II to the south east of the city. Eshel's analysis of the pottery leads him to suggest a 7th-century BC date. Although fragmentary figurines and other cult objects were found, the general character of the pottery is utilitarian and Eshel suggests that the caves probably were either merchant or administration store-rooms.
