Vuelta Andrés Reséndez,2021 The story of an uncovered voyage as colorful and momentous as any on record for the Age of Discovery--and of the Black mariner whose stunning accomplishment has been until now lost to history It began with a secret mission, no expenses spared. Spain, plotting to break Portugal's monopoly trade with the fabled Orient, set sail from a hidden Mexican port to cross the Pacific--and then, critically, to attempt the never-before-accomplished return, the vuelta. Four ships set out from Navidad, each one carrying a dream team of navigators. The smallest ship, guided by seaman Lope Martín, a mulatto who had risen through the ranks to become one of the most qualified pilots of the era, soon pulled far ahead and became mysteriously lost from the fleet. It was the beginning of a voyage of epic scope, featuring mutiny, murderous encounters with Pacific islanders, astonishing physical hardships--and at last a triumphant return to the New World. But the pilot of the fleet's flagship, the Augustine friar mariner Andrés de Urdaneta, later caught up with Martín to achieve the vuelta as well. It was he who now basked in glory, while Lope Martín was secretly sentenced to be hanged by the Spanish crown as repayment for his services. Acclaimed historian Andrés Reséndez, through brilliant scholarship and riveting storytelling--including an astonishing outcome for the resilient Lope Martín--sets the record straight.

The Mobile Course Design Journey Alex Rockey, 2023-10-11 *The Mobile Course Design Journey* provides practical strategies to college and university educators and faculty support professionals looking to develop accessible mobile learning experiences. Original, ready-to-use features such as a rubric for evaluating the mobile-friendliness of course content and assignments as well as a toolkit for leading workshops on mobile design will further help to demystify mobile learning in higher education.

Zebra Stripes Tim Caro, 2016-12-05 Why do zebras have stripes? Popular explanations range from camouflage to confusion of predators, social facilitation, and even temperature regulation. It is a challenge to test these proposals on large animals living in the wild, but using a combination of careful observations, simple field experiments, comparative information, and logic, Caro concludes that black-and-white stripes are an adaptation to thwart biting fly attack.

After Eunuchs Howard Chiang, 2018-08-07 For much of Chinese history, the eunuch stood out as an exceptional figure at the margins of gender categories. Amid the disintegration of the Qing Empire, men and women in China began to understand their differences in the language of modern science. In *After Eunuchs*, Howard Chiang traces the genealogy of sexual knowledge from the demise of eunuchism to the emergence of transsexuality, showing the centrality of new epistemic structures to the formation of Chinese modernity. From anticastration discourses in the late Qing

era to sex-reassignment surgeries in Taiwan in the 1950s and queer movements in the 1980s and 1990s, *After Eunuchs* explores the ways the introduction of Western biomedical sciences transformed normative meanings of gender, sexuality, and the body in China. Chiang investigates how competing definitions of sex circulated in science, medicine, vernacular culture, and the periodical press, bringing to light a rich and vibrant discourse of sex change in the first half of the twentieth century. He focuses on the stories of gender and sexual minorities as well as a large supporting cast of doctors, scientists, philosophers, educators, reformers, journalists, and tabloid writers, as they debated the questions of political sovereignty, national belonging, cultural authenticity, scientific modernity, human difference, and the power and authority of truths about sex. Theoretically sophisticated and far-reaching, *After Eunuchs* is an innovative contribution to the history and philosophy of science and queer and Sinophone studies.

Alpha Masculinity Eric Louis Russell, 2021-04-15 This book examines the linguistic and discursive mechanisms that realize the mythological American Alpha Male. Providing an in-depth dissection of corpora from an online socio-commercial community, a pop-psychology guru, and fictional gay erotica, it unravels the ways language, gender, and hegemony play out in this ideological figure of neopositive, essentialist masculinity. Through a detailed, multi-level analysis, Russell shows how the Alpha figure combines elements of dominance, normativity, and androcentrism and how these forces intersect with neoliberal and pseudoscientific discourses to establish a uniquely hybridized male hegemony, one that is familiar to most, but whose internal mechanisms remain largely unquestioned and unexamined. This book will be of interest to academic scholars in sociolinguistics, discourse analysis, cultural studies, and gender and sexualities studies.

Down the Up Staircase Bruce D. Haynes, Syma Solovitch, 2017-04-11 *Down the Up Staircase* tells

the story of one Harlem family across three generations, connecting its journey to the historical and social forces that transformed Harlem over the past century. Bruce D. Haynes and Syma Solovitch capture the tides of change that pushed blacks forward through the twentieth century—the Great Migration, the Harlem Renaissance, the early civil rights victories, the Black Power and Black Arts movements—as well as the many forces that ravaged black communities, including Haynes's own. As an authority on race and urban communities, Haynes brings unique sociological insights to the American mobility saga and the tenuous nature of status and success among the black middle class. In many ways, Haynes's family defied the odds. All four great-grandparents on his father's side owned land in the South as early as 1880. His grandfather, George Edmund Haynes, was the founder of the National Urban League and a protégé of eminent black sociologist W. E. B. Du Bois; his grandmother, Elizabeth Ross Haynes, was a noted children's author of the Harlem Renaissance and a prominent social scientist. Yet these early advances and gains provided little anchor to the succeeding generations. This story is told against the backdrop of a crumbling three-story brownstone in Sugar Hill that once hosted Harlem Renaissance elites and later became an embodiment of the family's rise and demise. Down the Up Staircase is a stirring portrait of this family, each generation walking a tightrope, one misstep from free fall.

A Story of Us Lesley Newson, Peter Richerson, 2021-02-19 It's time for a story of human evolution that goes beyond describing ape-men and talks about what women and children were doing. In a few decades, a torrent of new evidence and ideas about human evolution has allowed scientists to piece together a more detailed understanding of what went on thousands and even millions of years ago. We now know much more about the problems our ancestors faced, the solutions they found, and the trade-offs they made. The drama of their experiences led to the humans we are today: an animal that relies on a complex culture. We are a species that can and does rapidly evolve cultural solutions as we face new problems, but the intricacies of our cultures mean that this often creates new challenges. Our species' unique capacity for culture began to evolve millions of years ago, but it only really took off in the last few hundred thousand years. This capacity allowed our ancestors to survive and raise their difficult children during times of extreme climate chaos. Understanding how this has evolved can help us understand the cultural change and diversity that we experience today. Lesley Newson and Peter Richerson, a husband-and-wife team based at the University of California, Davis, began their careers with training in biology. The two have spent years together and individually researching and collaborating with scholars from a wide range of disciplines to produce a deep history of humankind. In *A Story of Us*, they present this rich narrative and explain how the evolution of our genes relates to the evolution of our cultures. Newson and Richerson take readers through seven stages of human evolution, beginning seven million years ago with the apes that were the ancestors of humans and today's chimps and bonobos. The story ends in the present day and offers a glimpse into the future.

The Machine Stops. Illustrated E.M. Forster, 2023-12-08 *The Machine Stops* by E.M. Forster,

now presented in a beautifully illustrated edition, is a visionary and thought-provoking novella that explores the perils of technological dependency and the potential consequences of a society overly reliant on machines. Set in a future where humanity lives underground, isolated in individual cells, their every need attended to by an all-encompassing Machine, the story follows Vashti, a lecturer and true believer in the Machine's omnipotence. However, as the Machine begins to show signs of malfunction, Vashti's worldview is challenged, leading to a series of events that question the very foundations of her society. *The Machine Stops* remains a compelling exploration of the dangers of sacrificing human connections for the convenience of technology. This illustrated edition provides a fresh perspective on Forster's timeless work, making it an engaging and visually captivating experience for both new and returning readers.

FDA in the Twenty-First Century Holly Fernandez Lynch, I. Glenn Cohen, 2015-09-08 In its decades-long effort to assure the safety, efficacy, and security of medicines and other products, the Food and Drug Administration has struggled with issues of funding, proper associations with industry, and the balance between consumer choice and consumer protection. Today, these challenges are compounded by the pressures of globalization, the introduction of novel technologies, and fast-evolving threats to public health. With essays by leading scholars and government and private-industry experts, *FDA in the Twenty-First Century* addresses perennial and new problems and the improvements the agency can make to better serve the public good. The collection features

essays on effective regulation in an era of globalization, consumer empowerment, and comparative effectiveness, as well as questions of data transparency, conflicts of interest, industry responsibility, and innovation policy, all with an emphasis on pharmaceuticals. The book also intervenes in the debate over off-label drug marketing and the proper role of the FDA before and after a drug goes on the market. Dealing honestly and thoroughly with the FDA's successes and failures, these essays rethink the structure, function, and future of the agency and the effect policy innovations may have on regulatory institutions abroad.
