The Global Smartphone Daniel Miller ,Laila Abed Rabho ,Patrick Awondo , Maya de Vries,Marília Duque,Pauline Garvey, Laura Haapio-Kirk,Charlotte Hawkins,Alfonso Otaegui ,Shireen Walton,Xinyuan Wang,2021-05-06 The smartphone is often literally right in front of our nose, so you would think we would know what it is. But do we? To find out, 11 anthropologists each spent 16 months living in communities in Africa, Asia, Europe and South America, focusing on the take up of smartphones by older people. Their research reveals that smartphones are technology for everyone, not just for the young. *The Global Smartphone* presents a series of original perspectives deriving from this global and comparative research project. Smartphones have become as much a place within which we live as a device we use to

provide ‘perpetual opportunism’, as they are always with us. The authors show how the smartphone is more than an ‘app device’ and explore differences between what people say about smartphones and how they use them. The smartphone is unprecedented in the degree to which we can transform it. As a result, it quickly assimilates personal values. In order to comprehend it, we must take into consideration a range of national and cultural nuances, such as visual communication in China and Japan, mobile money in Cameroon and Uganda, and access to health information in Chile and Ireland – all alongside diverse trajectories of ageing in Al Quds, Brazil and Italy. Only then can we know what a smartphone is and understand its consequences for people’s lives around the world.

Transforming Acquisitions and Collection Services Michelle Flinchbaugh, Chuck Thomas, Rob Tench, 2019-09-15 This book explores ways in which libraries can reach new levels of service, quality, and efficiency while minimizing cost by collaborating in acquisitions. In consortial acquisitions, a number of libraries work together, usually in an existing library consortia, to leverage size to support acquisitions in each individual library. In cross-functional acquisitions, acquisitions collaborates to support other library functions. For the library acquisitions manager, technical services manager, or the library director,

awareness of different options for effective consortial and cross-functional acquisitions allows for the optimization of staff and resources to reach goals. This work presents those options in the form of case studies as well as useful analysis of the benefits and challenges of each. By supporting each other's acquisitions services in a consortium, libraries leverage size to get better prices, and share systems and expertise to maximize resources while minimizing costs. Within libraries, the acquisitions function can be combined with other library functions in a unit with more than one purpose, or acquisitions can develop a close working relationship with another unit to support their work. This book surveys practice at different libraries and at different library consortia, and presents a detailed description and analysis of a variety of practices for how acquisitions units support each other within a consortium, and how they work with other library units, specifically collection management, cataloging, interlibrary loan, and the digital repository, in the form of case studies. A final section of the book covers fundamentals of collaboration.

Global Sceptical Publics Jacob Copeman, Mascha Schulz, 2022-12-08 *Global Sceptical Publics* is the first major study of the significance of different media for the (re)production of non-religious publics and publicity. While much work has documented how religious subjectivities are shaped by media, until now the crucial role of diverse media for producing and participating in religion-sceptical publics and debates has remained under-researched. With some chapters focusing on locations hitherto barely considered by scholarship on non-religion, the book places in comparative perspective how atheists, secularists and humanists engage with media – as means of communication and forming non-religious publics – but also on occasion as something to be resisted. Its conceptually rich interdisciplinary chapters thereby contribute important new insights to the growing field of non-religion studies and to scholarship on media and materiality more generally.

Social Media in Industrial China Xinyuan Wang, 2016-09-13 Life outside the mobile phone is unbearable.' Lily, 19, factory worker. Described as the biggest migration in human history, an estimated 250 million Chinese people have left their villages in recent decades to live and work in urban areas. Xinyuan Wang spent 15 months living among a community of these migrants in a small factory town in southeast China to track their use of social media. It was here she witnessed a second migration taking place: a movement from offline to online. As Wang argues, this is not simply a convenient analogy but represents the convergence of two phenomena as profound and consequential as each other, where the online world

now provides a home for the migrant workers who feel otherwise ‘homeless’. Wang’s fascinating study explores the full range of preconceptions commonly held about Chinese people – their relationship with education, with family, with politics, with ‘home’ – and argues why, for this vast population, it is time to reassess what we think we know about contemporary China and the evolving role of social media.

Data and Goliath: The Hidden Battles to Collect Your Data and Control Your World Bruce Schneier, 2015-03-02 “Bruce Schneier’s amazing book is the best overview of privacy and security ever written.”—Clay Shirky “Bruce Schneier’s amazing book is the best overview of privacy and security ever written.”—Clay Shirky Your cell phone provider tracks your location and knows who’s with you. Your online and in-store purchasing patterns are recorded, and reveal if you’re unemployed, sick, or pregnant. Your e-mails and texts expose your intimate and casual friends. Google knows what you’re thinking because it saves your private searches. Facebook can determine your sexual orientation without you ever mentioning it. The powers that surveil us do more than simply store this information. Corporations use surveillance to manipulate not only the news articles and advertisements we each see, but also the prices we’re offered. Governments use surveillance to discriminate, censor, chill free speech, and put people in danger worldwide. And both sides share this information with each other or, even worse, lose it to cybercriminals in huge data breaches. Much of this is voluntary: we cooperate with corporate surveillance

because it promises us convenience, and we submit to government surveillance because it promises us protection. The result is a mass surveillance society of our own making. But have we given up more than we've gained? In *Data and Goliath*, security expert Bruce Schneier offers another path, one that values both security and privacy. He brings his bestseller up-to-date with a new preface covering the latest developments, and then shows us exactly what we can do to reform government surveillance programs, shake up surveillance-based business models, and protect our individual privacy. You'll never look at your phone, your computer, your credit cards, or even your car in the same way again.

Drawing Futures Bob Sheil, Frédéric Migayrou, Luke Pearson, Laura Allen, 2016-11-11 *Drawing Futures* brings together international designers and artists for speculations in contemporary drawing for art and architecture. Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. *Drawing Futures* will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie. *Drawing Futures* focuses on the discussion of how the field of

drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

Reality Is Broken Jane McGonigal, 2011-01-20 “McGonigal is a clear, methodical writer, and her ideas are well argued. Assertions are backed by countless psychological studies.” —The Boston Globe “Powerful and provocative . . . McGonigal makes a persuasive case that games have a lot to teach us about how to make our lives, and the world, better.” —San Jose Mercury News “Jane McGonigal's insights have the elegant, compact, deadly simplicity of plutonium, and the same explosive force.” —Cory Doctorow, author of *Little Brother* A visionary game designer reveals how we can harness the power of games to boost global happiness. With 174 million gamers in the United States alone, we now live in a world where every generation will be a gamer generation. But why, Jane McGonigal asks, should games be used for escapist entertainment alone? In this groundbreaking book, she shows how we can leverage the power of games to fix what is wrong with the real world—from social problems like depression and obesity to global issues like poverty and climate change—and introduces us to cutting-edge games that are already changing the business, education, and nonprofit worlds. Written for gamers and non-gamers alike, *Reality Is Broken* shows that the future will belong to those who can understand, design, and play games. Jane McGonigal is also the author of *SuperBetter: A Revolutionary Approach to Getting Stronger, Happier, Braver and More*

Resilient.

Cyberpragmatics Francisco Yus, 2011-08-22 Cyberpragmatics is an analysis of Internet-mediated communication from the perspective of cognitive pragmatics. It addresses a whole range of interactions that can be found on the Net: the web page, chat rooms, instant messaging, social networking sites, 3D virtual worlds, blogs, videoconference, e-mail, Twitter, etc. Of special interest is the role of intentions and the quality of interpretations when these Internet-mediated interactions take place, which is often affected by the textual properties of the medium. The book also analyses the pragmatic implications of transferring offline discourses (e.g. printed paper, advertisements) to the screen-framed space of the Net. And although the main framework is cognitive pragmatics, the book also draws from other theories and models in order to build up a better picture of what really happens when people communicate on the Net. This book will interest analysts doing research on computer-mediated communication, university students and researchers undergoing post-graduate courses or writing a PhD thesis. Now Open Access as part of the Knowledge Unlatched 2017 Backlist Collection.

Marriage in Past, Present and Future Tense Janet Carsten, Hsiao-Chiao Chiu, Siobhan Magee i, Eirini Papadaki, Koreen M. Reece, 2021-09-01 Marriage globally is undergoing profound change, provoking widespread public comment and concern. Through the close ethnographic examination of case studies drawn from Africa, Asia, Europe and North America, Marriage in Past, Present and Future Tense places new and changing forms of marriage in comparative perspective as a transforming and also transformative social institution. In conditions of widespread socio-political inequality and instability, how are the personal, the familial and the political co-produced? How do marriages encapsulate the ways in which memories of past lives, present experience and imaginaries of the future are articulated? Exploring the ways that

marriage draws together and distinguishes history and biography, ritual and law, economy and politics in intimate family life, this volume examines how familial and personal relations, and the ethical judgements they enfold, inform and configure social transformation. Contexts that have been partly shaped through civil wars, cold war and colonialism – as well as other forms of violent socio-political rupture – offer especially apt opportunities for tracing the interplay between marriage and politics. But rather than taking intimate family life and gendered practice as simply responsive to wider socio-political forces, this work explores how marriage may also create social change. Contributors consider the ways in which marital practice traverses the domains of politics, economics and religion, while marking a key site where the work of linking and distinguishing those domains is undertaken.
