Asymmetry in Grammar Anne-Marie Di Sciullo, 2003 Asymmetry in Grammar: Syntax and Semantics brings to fore the centrality of asymmetry in DP, VP and CP. A finer grained articulation of the DP is proposed, and further functional projections for restrictive relatives, as well as a refined analyses of case identification and presumptive pronouns. The papers on VP discuss further asymmetries among arguments, and between arguments and adjuncts. Double-object constructions, specificational copula sentences, secondary predicates, and the scope properties of adjuncts are discussed in this perspective. The papers on CP propose a further articulation of the phrasal projection, justifications for Remnant IP movement, and an analysis of variation in clause structure asymmetries. The papers in semantics support the hypothesis that interpretation is a function of configurational asymmetry. The type/token information difference is further argued to correspond to the partition between the upper and lower level of the phrase. It is also proposed that Point of View Roles are not primitives of the pragmatic component, but are head-dependent categories. Configurationality is further argued to be required to distinguish contrastive from non-contrastive Topic. Compositionality is proposed to explain cross-linguistic variations in the selectional behavior of typologically different languages. The papers in syntax include contributions from Antonia Androutsopoulou and Manuel Español-Echevarría, Dana Isac, Edit Jakab, Cedric Boeckx, Julie Anne Legate, Maria Cristina Cuervo, Jacqueline Guéron, Niina Zhang, Thomas Ernst, Manuela Ambar, Jean-Yves Pollock, Anna Maria Di Sciullo, Ilena Paul and Stanca Somesfalean. The papers on semantics include contributions of Greg Carlson, Peggy Speas and Carol Tenny, Chungmin Lee, and James Pustejovsky.

**Paths of Development in L1 and L2 acquisition** Sharon Unsworth, Teresa Parodi, Antonella Sorace, Martha Young-Scholten, 2006-02-15 The main focus of generative language development research in recent decades has been the logical problem of language acquisition – how learners go beyond the input to acquire complex linguistic knowledge. This collection deals with the complementary issue of the developmental problem of language acquisition: How do learners move from one developmental stage to another and how and why do grammars develop in a certain fashion? Building on considerable previous research, the authors address both general and specific issues related to paths of development. These issues are tackled through considering studies of L1 and L2 children and L2 adults learning a range of languages including Dutch, English, French, German, Greek and Japanese.

**Grammatical Theory and Romance Languages** Karen Zagana, 1996-03-01 This volume presents recent theoretical research on Romance languages, selected from papers presented at the 25th Linguistic Symposium on Romance Languages. It includes studies of individual Romance languages as well as comparative studies – both within the Romance family and with non-Romance languages (Basque, Bulgarian, Germanic and Quechua). Papers in phonetics and phonology treat stress, syllable structure, s-weakening, and the declination effect. Morphological topics include class-marker suppression and gender agreement and suppletion. Topics in syntactic theory include clitics, participial and adjectival agreement, the syntax of tense, mood, negation, adjectival predication, Tough-constructions, quantification and null objects.

The Acquisition of Tense and Agreement Vicenç Torrens,2020-06-04 This book presents research on the acquisition of Tense and Agreement in Spanish and Catalan, describing the different theoretical explanations of this process. Its theory is drawn from the Minimalism Program, which proposes Universal Principles for all languages and the existence of parameters that can take different values in particular languages. The study describes the acquisition of root infinitives, subject-verb agreement, the position of clitic pronouns with respect to finite and non-finite verbs, the placement of negation, the position of subjects, and the acquisition of personal pronouns. The book argues that children acquiring Spanish and Catalan have the functional categories of Tense and Agreement at a very early stage. It will be a useful reference for linguists, psycholinguists and psychologists who are interested in language acquisition.

**External Arguments in Transitivity Alternations** Artemis Alexiadou,Elena Anagnostopoulou,Florian Schäfer,2015-01-08 This book is an exploration of the syntax of external arguments in transitivity alternations

from a cross-linguistic perspective. It focuses particularly on the causative/anticausative alternation, which the authors take to be a Voice alternation, and the formation of adjectival participles. The authors use data principally from English, German, and Greek to demonstrate that the presence of anticausative morphology does not have any truth-conditional effects, but that marked anticausatives involve more structure than their unmarked counterparts. This morphology is therefore argued to be associated with a semantically inert Voice head that the authors call 'expletive Voice'. The authors also propose that passive formation is not identical across languages, and that the distinction between target vs. result state participles is crucial in understanding the contribution of Voice in adjectival passives. The book provides the tools required to investigate the morphosyntactic structure of verbs and participles, and to identify the properties of verbal alternations across languages. It will be of interest to theoretical linguists from graduate level upwards, particularly those specializing in morphosyntax and typology.

**Open Dialogue for Psychosis** Nick Putman, Brian Martindale, 2021-07-29 This highly readable book provides a comprehensive examination of the use of Open Dialogue as a treatment for psychosis. It presents the basic principles and practice of Open Dialogue, explains the training needed to practice and explores how it is being developed internationally. Open Dialogue for Psychosis includes first-hand accounts of the process by people receiving services due to having psychotic experiences, their family members and professionals who work with them. It explains how aspects of Open Dialogue have been introduced in services around the world, its overlap with and differentiation from other psychological approaches and its potential integration with biological and pharmacological considerations. The book concludes with a substantive section on the research available and its limitations. Open Dialogue for Psychosis will be a key text for clinicians and administrators interested in this unique approach, particularly those who recognise that services need to change for the better and are seeking guidance on how this can be achieved. It will also be suitable for people who have experienced psychosis and members of their families and networks. See the below link to the dedicated book webpage:
