Space and the Architect Herman Hertzberger,2010 The work of Herman Hertzberger is the subject of wide international esteem. 1991 first saw publication of Hertzberger's Lessons for Students in Architecture, an elaborated version of lectures he had given since 1973 at Delft University of Technology. This immensely successful book has gone through many reprints and has also been published in Japanese, German, Italian, Portuguese, Taiwanese, Dutch, Greek, Polish, Iranian, Korean and Chinese. Space and the Architect is the second book written by Hertzberger. It charts the backgrounds to his work of recent years and the ideas informing it, drawing on a wide spectrum of subjects and designs by artists, precursors, past masters and colleagues, though with his own work persistently present as a reference. Space is its principal theme, physical space but also the mental or intellectual regions the architect calls upon during the process of designing. Once again Hertzberger's broad practical experience, his ideas and his seemingly inexhaustible 'library' of images are a major source of inspiration for anyone whose concern is the design of space.

The Red Dragon & Tom Sloper,2009-04-10 The Red Dragon & The West Wind is the perfect introduction to this ancient game of strategy and subterfuge, covering all aspects of the two most common varieties, American and Chinese, along with an overview of other global approaches. The book begins with the history and origin and moves on to the rules of play and ways to win and avoid essential errors as well as the etiquette to follow. With everything from clear instructions on dealing, building, and distributing tiles to a look at the history and future of the game, this is the essential book for anyone who wants to have fun—and win—while playing mah-jongg.

Dictionary of the Jatki or Western Panjábi Language Andrew John Jukes,2019-11-14 Originally published in 1900. This volume is a compilation of the Jatki or Western Punjábi language. The compiler has worked entirely in the South of the Punjáb, and the work does not pretend to be more than a contribution to a very widely spokn and full language. No one man could hope to complete a dictionary of dialects spread over so wide an area.

Ruimte en Leren Herman Hertzberger,2008 In het omvangrijke oeuvre van Herman Hertzberger is de bouw van scholen een van de belangrijkste opgaven. Hij bouwde tot op heden ruim dertig scholen. Volgens Hertzberger is scholenbouw vandaag de dag een van de weinige deelgebieden binnen de architectuur waarbij de ontwerper nog de menselijke condities kan bepalen en beïnvloeden. Hij stelt dat er evenwicht moet zijn tussen gebruik, functionaliteit en de architectuur van schoolgebouwen, waarbij de architectuur geïnspireerd wordt door het onderwijs. Juist met de huidige ontwikkelingen in het onderwijs, van klassikaal naar meer individueel gericht onderwijs, dienen de gebouwen steeds opnieuw bedacht te worden. De wisselwerking tussen onderwijs, onderwijssystemen en architectuur is evident. In Ruimte en Leren legt Hertzberger zijn ruime ervaring, kennis en opvattingen vast in een theoretische beschouwing over de ruimtelijke condities van leren.

Crush Richard Siken,2019 This collection about obsession and love is the 99th volume of the Yale Series of Younger Poets Richard Siken's Crush, selected as the 2004 winner of the Yale Younger Poets prize, is a powerful collection of poems driven by obsession and love. Siken writes with ferocity, and his reader hurtles unstoppably with him. His poetry is confessional, gay, savage, and charged with violent eroticism. In the world of American poetry, Siken's voice is striking.

The Future of Architecture Herman Hertzberger,Anna Heringer,Jean-Philippe Vassal,2013 At eighty, internationally acclaimed Dutch architect Herman Hertzberger invited colleagues and students to reflect on the future of architecture. While questioning the profession's status as 'the discipline par excellence that has lent itself to the representation of a new, better world', Hertzberger acknowledges that 'it is exactly when the ground under your feet is collapsing that you need elevation'. In this pamphlet, Herman Hertzberger, Anna Heringer, Jean-Philippe Vassal and other contributors opt for 'building as building up, composing, multiplying, improving and establishing: the opposite of decline'. Recognizing the need to change our lifestyle and the way we build if we want to preserve the planet for future generations, these pages offer optimism, making the case to abandon all preconceptions and imagine a new way of practicing architecture that is not a derivative or feeble reflection of today's reality. The envisioned architect is sensitive to ecology, responsible, fair, creative and communicative.

Architecture and Structuralism Herman Hertzberger,2015 Architect and architectural author Herman Hertzberger (1932) is internationally recognized for both his built work and his written work. Buildings such as Centraal Beheer in Apeldoorn (1972) and many of Apeldoorn's schools, but also his publications, such as Lessons for Students in Architecture (which has been translated into many languages) have inspired generations of architects and students. In this book, Hertzberger lays down the foundations of his architectural vision. 'This book is an attempt to formulate what structuralism means in architecture, and why that matters. There are many misunderstandings about the concept of structuralism in general, and especially where architecture is concerned. There is also a renewed interest in structuralism. What I see as the real structuralism in architecture is a way of thinking that has far-reaching opportunities for the reuse of buildings, which can give a new impulse to the

discussion about sustainability. In addition, the possibility of users having a greater influence has revealed the blueprint for a more democratic architecture. - Herman Hertzberger, Exhibition: The New Institute, Rotterdam, The Netherlands (20.09.2014-January 2015).--Provided by publisher.

Numenera Corebook Monte Cook,2013-06-01 There have been eight previous worlds ... Each left behind remnants. People of the new world, the Ninth World, sometimes call these remnants magic, and who are we to say they're wrong? But most give a unique name to the legacies of the nigh-unimaginable past. They call them Numenera. The Ninth World is built on the bones of the previous eight. The game of Numenera is about discovering the wonders of the worlds that came before, not for their own sake, but as the means to improve the present and build a future.-- Page 4 of cover.
