The Messengers Mike Clelland, 2020-08-19 Without question, this is a classic by one of the most exciting new authors in the UFO field today. After reading it, your view of reality will never be the same. The owl has held a place of reverence and mystique throughout history. And as strange as this might seem, owls are also showing up in conjunction with the UFO experience. Mike Clelland has collected a wealth of first-hand accounts in which owls manifest in the highly charged moments that surround alien contact. There is a strangeness to these accounts that defy simple explanations. This book explores implications that go far beyond what more conservative researchers would dare consider. But the owl connection encompasses more than the UFO experience. It also includes profound synchronicities, ancient archetypes, dreams, shamanistic experiences, personal transformation, and death. From the mythic legends of our ancient past to the first-hand accounts of the UFO abductee, owls are playing some vital role. This is also a deeply personal story. It is an odyssey of self-discovery as the author grapples with his own owl and UFO encounters. What plays out is a story of transformation with the owl at the heart of this journey.

The UFO Deception Father Spyridon Bailey, 2021-10-14 When Second World War pilots described seeing small globes flying outside their bombers, military leaders began what would become decades of research, cover-up and misinformation. Father Spyridon explores the key players in this strange phenomenon, identifying how movies, technology and philosophy have been used to guide public perception of what is happening. But as a priest of the Russian Orthodox Church, he demonstrates a much longer history that lies behind it, and how a terrible deception is at work.

Abundance Deepak Chopra, M.D., 2022-03-01 An enlightening guide to success, fulfillment, wholeness, and plenty, offering practical advice on how to cultivate a sense of abundance in times of fear and insecurity, from New York Times bestselling author Deepak Chopra "To attain wealth of the lasting kind, the kind that gives your life meaning, value, and sustenance, base your daily existence on the generosity of spirit."—Deepak Chopra Many of us live and operate from a mindset of lack, scarcity, and limitation. We focus on what we don't have—financial security, confidence, an intimate relationship—which keeps us feeling insecure and inadequate. We think "if only I could have those things, I could be happy." But measuring wealth by money or material possessions leaves us feeling drained and spiritually empty. Constantly striving for more often means our ego is driving our thoughts, actions, and reactions, which prevents us from reaching something greater: a true sense of inner peace, acceptance, and fulfillment. Yet, there is an inner path to prosperity and wealth that, once charted and explored, provides access to the great riches of the universe and life's unbounded possibilities. In *Abundance*, international bestselling author Deepak Chopra illuminates this road to success and wholeness, helping readers tap into a deeper sense of awareness to become agents of change in their own lives. Mixing ancient teachings and spiritual practices with the wisdom he's garnered over four decades as the leading figure in mind-body medicine, Deepak demonstrates how to transcend self-generated feelings of limitation and fear in order to experience true abundance in all aspects of life. To do so, he offers a seven-step plan along with meditations and mindfulness techniques to help you focus and direct your attention, energy, and intuition so you can experience stability, affluence, insight, creativity, love, and true power.

The Mars Mystery Graham Hancock, 2010-08-11 An asteroid transformed Mars from a lush planet with rivers and oceans into a bleak and icy hell. Is Earth condemned to the same fate, or can we protect ourselves and our planet from extinction? In his most riveting and revealing book yet, Graham Hancock examines the evidence that the barren Red Planet was once home to a lush environment of flowing rivers, lakes, and oceans. Could Mars have sustained life and civilization? Megaliths found on the parched shores of Cydonia, a former Martian ocean, mirror the geometrical conventions of the pyramids at Egypt's Giza necropolis. Especially startling is a Sphinx-like structure depicting a face with distinguishable diadem, teeth, mouth and an Egyptian-style headdress. Might there be a connection between the structures of Egypt and those of Mars? Why does NASA continue to dismiss these remarkable anomalies as a trick of light? Hancock points to the intriguing possibility that ancient Martian civilization is communicating with us through the remarkable structures it left behind. In exploring the possible

traces left by the Martian civilization and the cosmic cataclysm that may have ended it, The Mars Mystery is both an illumination of our ancient past and a warning--that we still have time to heed--about our ultimate fate.

In Plain Sight: an Investigation Into UFOs and Impossible Science Ross Coulthart,2023-05-03 An award-winning journalist investigates a story largely ignored by mainstream media but right there, in front of our eyes ... UFOs, UAPs, flying cigars, extraordinary new technologies ... Are we not alone? Award-winning investigative journalist Ross Coulthart has been intrigued by UFOs since mysterious glowing lights were reported near New Zealand's Kaikoura mountains when he was a teenager. The 1978 sighting is just one of thousands since the 1940s, and yet research into UFOs is still seen as the realm of crackpots and conspiracy theorists. In 2020, however, after decades of denial, the US Department of Defence made the astonishing admission that strange aerial and underwater objects frequently reported and videoed by pilots and tracked by sensors are real, unexplained, and pose a genuine national security concern. Compelled to investigate, Coulthart has embarked on what's become the most confronting and challenging story of his career, speaking to witnesses, researchers, scientists, spies and defence and intelligence officials and insiders. What he has found suggests that the world is on the cusp of extraordinary technological breakthroughs and cultural revelations. Bizarre, sometimes mind-blowing and utterly fascinating, In Plain Sight tells a story that's largely escaped the radar of mainstream media coverage but has been there all along. Now it's time to observe what's in front of our eyes.

UFO Encounters J. B. Michaels,2017-12-16 ORIGINAL INSIDE COVER For years the government has denied and possibly covered up the existence of UFOs. Despite the efforts, thousands of people around the world claim to have had UFO and alien encounters and refuse to accept these denials. Modern technology and the candor of witnesses has helped to support the claims of alien visitors, abductions, and UFO sightings. In UFO Encounters, author J.B. Michaels exposes evidence on the Carp landing and the Brookhaven incident which helps support the existence of aliens and government cover ups. In Carp, Ontario Canada, a local resident video taped a craft as it landed on a farm. After expert examination the tape was verified to be authentic. Several years later, a mother spacecraft was shot down by the military over Long Island. Another smaller ship lost control and crashed in nearby South Haven Park causing a fire that was seen by local residents. J.B. Michaels has interviewed over two hundred people who witnessed the Carp landing, the South Haven Park crash or actually encountered the alien that survived the crash and was held at Brookhaven Labs. These conversations along with the video footage that Mr. Michaels obtained prove without a doubt that UFO Encounters are a reality. THE CRASHIt was a clear night. There wasn't a lot of pollution on this part of Long Island, and there was a beautiful, cloudless night sky, with brilliant shining stars from horizon to horizon. Richard jumped as he noticed a V shaped formation of glowing lights moving above the trees.Holy shit! said Todd, holding his arm in front of his face. The objects were moving above Brookhaven Labs to the north of them. What are those? Suddenly he gasped as a huge glowing sphere became visible in the sky.I can't watch this and drive! Todd rammed his foot down on the brake. The truck skidded to a stop at the side of the freeway. Both boys jumped out of the truck.Whoa! said Richard. Will you look at this? Above the trees, a glowing ball hung motionless in the sky, streams of yellow, orange, and dark crimson flames swirling around it, the unnatural hue of those colors reflected off the storm clouds moving in from the east.Three smaller craft darted about the sphere and then were motionless. They were much smaller, each perhaps the size of a commercial plane. They were triangular, with rounded edges like a Stealth jet. However, the sphere - mother ship as Richard later would call it - was immense. It was some 60 to 80 feet in diameter, the size of a four to five story building. What made it all the more unusual was the almost complete silence. The two boys looked up, mesmerized by the bright objects and the magnetic resonant hum that they felt more than heard. The lights of the truck flickered, blinking in an odd strobe like rhythm. Suddenly the lights along the highway dimmed, and began to go out one by one. A wave of darkness swept across the rows of houses that were just a few hundred feet from the highway. It's a blackout, said Dan. Somebody's drawing power from the main lines, and I don't think it's those UFOs. There was one last surge of power and then all the lights in the town for several miles around went out. The giant sphere glowed as a beam of energy shot from the ground just north of them much too close. There was a low rumble, and the craft shimmered, became incandescent, and then exploded. Two of the other craft streaked across the sky, leaving a shining trail of vapor behind them, and then one shot straight up into the night sky.The remaining craft just hovered, as if whatever was piloting it was completely stunned by the destruction of the larger vessel. Before it could make a move to escape, another beam of light pulsed up from the ground near Brookhaven National Laboratory. Energy swirled around the object. The crippled ship veered at a 45-degree angle, and then plummeted down into Southaven Park. The earth trembled as the object crashed and huge flames shot up i

Alien Oceans Kevin Hand,2021-09-21 Inside the epic quest to find life on the water-rich moons at the outer reaches of the solar system Where is the best place to find life beyond Earth? We often look to Mars as the most promising site in our solar system, but recent scientific missions have revealed that some of the most habitable real estate may actually lie farther away. Beneath the frozen crusts of several of the small, ice-covered moons of Jupiter and Saturn lurk vast oceans that may have existed for as long as Earth, and together may contain more than fifty times its total volume of liquid water. Could there be organisms living in their depths? Alien Oceans

reveals the science behind the thrilling quest to find out. Kevin Peter Hand is one of today's leading NASA scientists, and his pioneering research has taken him on expeditions around the world. In this captivating account of scientific discovery, he brings together insights from planetary science, biology, and the adventures of scientists like himself to explain how we know that oceans exist within moons of the outer solar system, like Europa, Titan, and Enceladus. He shows how the exploration of Earth's oceans is informing our understanding of the potential habitability of these icy moons, and draws lessons from what we have learned about the origins of life on our own planet to consider how life could arise on these distant worlds. *Alien Oceans* describes what lies ahead in our search for life in our solar system and beyond, setting the stage for the transformative discoveries that may await us.

Typeset in the Future Dave Addey, 2018-12-11 A designer's deep dive into seven science fiction films, filled with "gloriously esoteric nerdery [and] observations as witty as they are keen" (Wired). In *Typeset in the Future*, blogger and designer Dave Addey invites sci-fi movie fans on a journey through seven genre-defining classics, discovering how they create compelling visions of the future through typography and design. The book delves deep into *2001: A Space Odyssey*, *Star Trek: The Motion Picture*, *Alien*, *Blade Runner*, *Total Recall*, *WALL·E*, and *Moon*, studying the design tricks and inspirations that make each film transcend mere celluloid and become a believable reality. These studies are illustrated by film stills, concept art, type specimens, and ephemera, plus original interviews with Mike Okuda (*Star Trek*), Paul Verhoeven (*Total Recall*), and Ralph Eggleston and Craig Foster (Pixar). *Typeset in the Future* is an obsessively geeky study of how classic sci-fi movies draw us in to their imagined worlds.

Confessions of an Alien Hunter Seth Shostak, 2009-03-17 Aliens are big in America. Whether they've arrived via rocket, flying saucer, or plain old teleportation, they've been invading, infiltrating, or inspiring us for decades, and they've fascinated moviegoers and television watchers for more than fifty years. About half of us believe that aliens really exist, and millions are convinced they've visited Earth. For twenty-five years, SETI has been looking for the proof, and as the program's senior astronomer, Seth Shostak explains in this engrossing book, it's entirely possible that before long conclusive evidence will be found. His informative, entertaining report offers an insider's view of what we might realistically expect to discover light-years away among the stars. Neither humanoids nor monsters, says Shostak; in fact, biological intelligence is probably just a precursor to machine beings, enormously advanced artificial sentients whose capabilities and accomplishments may have developed over billions of years and far exceed our own. As he explores what, if anything, they would tell us and what their existence would portend for humankind and the cosmos, he introduces a colorful cast of characters and provides a vivid, state-of-the-art account of the past, present, and future of our search for extraterrestrial intelligence.
