Millennials, Generation Z and the Future of Tourism

Fabio Corbisiero, Salvatore Monaco, Elisabetta Ruspini, 2022-06-23

This book examines the lifestyles, expectations and plans of Millennials and Generation Z and how they are redefining tourism. It demonstrates that if the tourism industry is to enjoy future growth, it must understand and meet the particular needs of these two generations. The volume explores the present and future challenges faced by the tourism industry as a result of the generational turnover, and seeks to answer the following questions: What contribution can the new generations make to the future of tourism? How are technological advancements and social networks shaping future travel trends? Can a generational perspective be useful to help the tourism industry recover from the COVID-19 crisis? The book will be of interest to researchers and students of sociology and tourism studies, as well as tourism professionals.

Strategy First Brad Chase, 2020-06-16 Business Success Requires Strategy First In *Strategy First*, Brad Chase, the mind behind some of Microsoft's largest and most successful initiatives, explains why building robust strategies is the imperative to business success. Chase leads readers through his easy-to-use strategy model, $\text{Strategy} = E \times mc^2$, which teaches readers the art of strategy—how to build and execute winning strategies relative to the competition. To supplement the model, Chase provides 5 key tips to strategy prosperity and over 50 examples from a broad range of businesses that help the reader think about how they can use his *Strategy First* toolkit. The author will inspire readers to examine the effectiveness of their current strategies, using the model that has served him in his distinguished career. Chase began his Microsoft tenure in 1987, where his award-winning marketing campaign promoting Windows 95 broke numerous records and his efforts as MSN.com's leader prompted a turnaround of the site's success. Chase ended his tenure at Microsoft in 2002 and since then has served as an advisor and/or board member to many companies, such as GE, Brooks, Expedia, and the Boys and Girls Clubs. Chase has also shared his *Strategy First* approach across the nation through speeches to executives at large and small businesses, incubators, and students at topflight MBA programs and at conferences.

Prioritizing Academic Programs and Services Robert C. Dickeson, 2010-01-26 *Prioritizing Academic Programs and Services* REVISED AND UPDATED Increasing economic concerns make the new edition of this best-selling classic an invaluable resource for those who want and need to implement a proven step-by-step approach to reallocating resources in tough times. Thoroughly

revised and updated, *Prioritizing Academic Programs and Services* includes new recommendations from the field, communication strategies for more successful campus implementation, a new section on the sources of hidden costs, and a Prioritization Process and Implementation workbook designed to help administrators avoid costly mistakes. This book includes access to additional content online, including models for prioritization from a variety of campuses. Based on the author's extensive consulting experience, this necessary and timely resource offers the best advice for addressing the current economic concerns affecting most colleges and universities. Praise for *Prioritizing Academic Programs and Services* For more than a decade, higher education leaders have turned to Dickeson's practical guide to academic program assessment. These newly expanded approaches are just in time for today's competitive environment. —SUZANNE SHIPLEY, president, Shepherd University Dickeson provides a compelling rationale for program prioritization as well as a practical planning structure that promotes alignment between programs, resources, and university mission. Presidents and provosts can use his approach to frame campus discussions around the future of the institution and away from legacy programs whose time has passed. —KYLE R. CARTER, provost and senior vice chancellor, Western Carolina University Dickeson's approach ensures that critical decisions regarding academic programs and resource allocation are aligned with strategic goals and institutional mission. As one of the early adopters of the process that he proposes, I am convinced that it is a powerful and practical tool for any college or university committed to remaining focused, resilient, vital, and relevant in a dynamic and increasingly challenging environment. —DAVID MAXWELL, president, Drake University

Two Billion Cars Daniel Sperling,Deborah Gordon,2009-01-13 Today there are over a billion vehicles in the world, and within twenty years, the number will double, largely a consequence of China's and India's explosive growth. Given that greenhouse gases are already creating havoc with our climate and that violent conflict in unstable oil-rich nations is on the rise, will matters only get worse? Or are there hopeful signs that effective, realistic solutions can be found? Blending a concise history of cars and their impact on the world, leading transportation experts Daniel Sperling and Deborah Gordon explain how we arrived at this state, and what we can do about it. Sperling and Gordon assign blame squarely where it belongs-on the auto-industry, short-sighted government policies, and consumers. They explore such solutions as getting beyond the gas-guzzler monoculture, re-inventing cars, searching for low-carbon fuels, and more. Promising advances in both transportation technology and fuel efficiency together with shifts in traveler behavior, they suggest, offer us a way out of our predicament. The authors conclude that the two places that have the most troublesome emissions problems--California and China--are the most likely to become world leaders on these issues. Arnold Schwarzenegger's enlightened embrace of eco-friendly fuel policies, which he discusses in the foreword, and China's forthright recognition that it needs far-reaching environmental and energy policies, suggest that if they can tackle the issue effectively and honestly, then there really is reason for hope. Updated with a new afterword that sheds light on the profound changes in the global economy in the last year, *Two Billion Cars* makes the case for why and how we need to transform transportation now more than ever. Authoritatively prescriptive. --Tom Vanderbilt, *Wilson Quarterly*

Provocative and pleasurable, far-seeing and refreshing, fact-based and yet a page-turner, global in scope but rooted in real places. The authors make a convincing case that smart consumers driving smart electric-drive cars can find the critical path to a safer planet. --Robert Socolow, Princeton University In this insightful and persuasive book, Sperling and Gordon highlight one of the biggest environmental challenges of this century: two billion cars. They rightly contend that we cannot avert the worst of global warming without making our cars cleaner and petroleum-free. Luckily the authors also offer a roadmap for navigating this problem that is both visionary and achievable. --Frances Beinecke, President, Natural Resources Defense Council

Berkeley ,2004-08-25 Berkeley is as much a concept as a city, resonating powerfully with those on all sides of the political spectrum. This sumptuous photographic tour with text shows exactly what makes the city special, offering dazzling images of the city's vibrant street life, gorgeous natural attractions, emerging arts district, lovely Rose Garden, legendary Claremont Hotel spa, and much more.

California Indian Languages Victor Golla,2022-02 Nowhere was the linguistic diversity of the New World more extreme than in California, where an extraordinary variety of village-dwelling

peoples spoke seventy-eight mutually unintelligible languages. This comprehensive illustrated handbook, a major synthesis of more than 150 years of documentation and study, reviews what we now know about California's indigenous languages. Victor Golla outlines the basic structural features of more than two dozen language types and cites all the major sources, both published and unpublished, for the documentation of these languages—from the earliest vocabularies collected by explorers and missionaries, to the data amassed during the twentieth-century by Alfred Kroeber and his colleagues, to the extraordinary work of John P. Harrington and C. Hart Merriam. Golla also devotes chapters to the role of language in reconstructing prehistory, and to the intertwining of language and culture in pre-contact California societies, making this work, the first of its kind, an essential reference on California's remarkable Indian languages.

A Day with the Cow Column in 1843 Jesse A. Applegate, 1952

Portland in the 1960s Polina Olsen, 2012 In 1968, Newsweek reported an imminent threat of twenty thousand hippies descending on Portland, Oregon. Although the numbers were exaggerated, Portland did boast a vibrant 1960s culture of disenchanting and disenfranchising individuals seeking social and political revolution. Barefoot and bell-bottomed, they hung out in Portland's bohemian underground and devised a better world. What began in coffee shop conversations found its voice in the Willamette Bridge newspaper, KBOO radio station and the Portland State University student strike, resulting in social, artistic and political change in the Rose City. Through these stories from the counterculture, author Polina Olsen brings to life the beat-snapping Caffe Espresso, the incense and black light posters of the Psychedelic Supermarket and the spontaneous concerts and communal soups in Lair Park.
