Industry and Innovation in the North East of England Great Britain: Parliament: House of Commons: North East Regional Committee,2009 In this report, from the North East Regional Committee (HCP 169, session 2009-10, ISBN 9780215542731), renewable industries could lead a recovery in the North East's manufacturing industry. The Committee states that the region is well placed to benefit from the growing global market for green technologies, but warns that British innovation and ideas could be lost as other countries benefit from quicker commercial development and implementation. World-class renewable energy companies in the North East - such as the New and Renewable Energy Centre (NaREC) at Blyth, the North East Process Industries Cluster (NEPIC) on Teesside, and NETPark, the North East Technology park in County Durham - could put the region at the forefront of the Government's efforts to turn the UK into a low-carbon economy. The Committee warns though, that the UK's cumbersome and slow planning process poses a significant risk to long-term development in the North East as businesses from countries like China seek quicker, guaranteed sites elsewhere in Europe. The report also states that the Government should explore incentives to encourage local development of renewable and clean energy. Also, underinvestment in transport links is proving detrimental to investment in the region.

Becoming a Midwife Rosemary Mander,Valerie Fleming,2009-09-10 What is the reality of being a midwife at the beginning of the twenty-first century? What is it like to help and support women throughout pregnancy and childbirth and into motherhood? What roles can midwives play in society? Becoming a Midwife explores what it is to be a midwife, looking at the factors that make midwifery such a special profession, as well as some of the challenges. The chapters cover a variety of settings and several different stages in a woman's pregnancy. Each one is narrated by a midwife who introduces their own theme, recounts a vignette that throws light on their understanding of midwifery and reasons for becoming a midwife and any subsequent career moves. Drawing together these insights, the editors show what it means to be a midwife today. Suitable for those contemplating a career in midwifery and providing an opportunity for reflection for more experienced midwives, this thought-provoking book is an invaluable contribution to midwifery.

What's Left Now? Andrew Hindmoor, 2018-01-26 Our sense of history shapes how we think about ourselves. One of the distinguishing features of the left in Britain is that it holds to a remorselessly bleak and miserabilist view of our recent political history — one in which Margaret Thatcher's election in 1979 marked the start of a still-continuing fall from political grace made evident by the triumph of a free market get-what-you-can neoliberal ideology, dizzying levels of inequality, social decay, rampant individualism, state authoritarianism, and political corruption. The left does not like what has happened to us and it does not like what we have become. Andrew Hindmoor argues that this history is wrong and self-harming. It is wrong because Britain has in many respects become a more politically attractive and progressive country over the last few decades. It is self-harming because this bleak history undermines faith in politics. Post-Brexit, post-Grenfell, and post the 2010, 2015, and 2017 general elections, things may not, right now, look that great. But looked at over the longer haul, Britain is a long way from being a posterchild for neoliberalism. Left-wing ideas and arguments have shaped and continue to shape our politics.

Graduate Psychometric Test Workbook Mike Bryon, 2005 Employers want to fill their top management posts with candidates of the highest calibre. Any mistake in their recruitment process can mean wasteful costs in both time and money. Consequently, recruitment to any management post is by rigorous selection, often including a range of psychometric tests. The Graduate Psychometric Test Workbook provides essential preparation for graduates or managers who face psychometric tests, whether as part of selection or assessment procedures. With correct training and practice a candidate can improve on their expected score, and this workbook provides that opportunity. A companion to the best-selling *How to Pass Graduate Psychometric Tests*, it contains even more practice material and realistic timed mock tests relevant to the selection tests of many top organizations. The larger format allows space for writing answers and notes, and there are detailed explanations of answers with interpretations of scores.

Jobs - Apprentice 101 Arthur W. Hoffmann Ed D. P. E., Arthur W. Hoffmann, 2012-06 Jobs - An American Solution is a specific jobs creation idea that would be initiated by businesses and individual entrepreneurs and based on an apprenticeship approach. It is a self-help program that is intended to expedite the creation of good-paying skilled and professional jobs. It is not a government regulated apprenticeship similar to those that are common in European or Asian countries. This Apprentice 101 program is a voluntary, unstructured jobs initiative by private individuals, small or large businesses, trade organizations, unions, municipalities, etc. The basic motivation for a business or entrepreneur is a generous tax credit for every apprentice candidate they hire, sponsor and train. This is not a government hand-out but an investment in America and its citizens that promises to be extraordinary. Researchers at Columbia University and the City University of New York, found that for each unemployed youth - someone between the ages of 16 and 24 who is in neither work or school - costs taxpayers nearly \$ 14,000 dollars per year in direct costs for things like medical bills and government aid, while ultimately creating a social burden of more than \$37,000 dollars annually (when accounting for the costs of crime and lost tax revenue). - Jobs are the life blood of our economy. They create wealth in exchange for services rendered that increase and improve our way of life. - Current unemployment and under-employment is especially high. The many jobless people in America are losing hope of an economic recovery. - Our politicians, Republicans and Democrats, respond with contrasting solutions that focus only on taxes and spending. - Our large cities and communities are especially in need of real good-jobs if we are to succeed in fighting poverty. - We need to encourage our more fortunate citizens to provide job opportunities for the less-fortunate. Our young people need mentors and assurance of employment for high school graduates.

The Oxford Handbook of Job Loss and Job Search Ute-Christine Klehe PhD, Edwin van Hooft PhD, 2018-05-08 Job search is and always has been an integral part of people's working lives. Whether one is brand new to the labor market or considered a mature, experienced worker, job seekers are regularly met with new challenges in a variety of organizational settings. Edited by Ute-Christine Klehe and Edwin A.J. van Hooft, *The Oxford Handbook of Job Loss and Job Search* provides readers with one of the first comprehensive overviews of the latest research and empirical knowledge in the areas of job loss and job search. Multidisciplinary in nature, Klehe, van Hooft, and their contributing authors offer fascinating insight into the diverse theoretical and methodological perspectives from which job loss and job search have been studied, such as psychology, sociology, labor studies, and economics. Discussing the antecedents and consequences of job loss, as well as outside circumstances that may necessitate a more rigorous job hunt, this Handbook presents in-depth and up-to-date knowledge on the methods and processes of this important time in one's life. Further, it examines the unique circumstances faced by different populations during their job search, such as those working job-to-job, the unemployed, mature job seekers, international job seekers, and temporary employed workers. Job loss and unemployment are among the worst stressors individuals can encounter during their lifetimes. As a result, this Handbook concludes with a discussion of the various types of interventions developed to aid the unemployed. Further, it offers readers important insights and identifies best practices for both scholars and practitioners working in the areas of job loss, unemployment, career transitions, outplacement, and job search.

Intersectionality and Ethnic Entrepreneurship Zulema Valdez, Mary Romero, 2018-10-18 Intersectionality and Ethnic Entrepreneurship brings together a group of eminent and up-and-coming young scholars who apply an intersectional perspective to the study of ethnic entrepreneurship. Against the traditional approach's emphasis on ethnicity and its primacy, which tends to conflate ethnicity with other social groupings (i.e., social class), considers their effect as an additive or secondary consequence only (i.e., gender), or ignores their influence altogether (i.e., race), the studies in this volume recognize that multiple dimensions of identity intermix to condition entrepreneurial outcomes. Starting with the premise that systems of oppression and privilege, specifically capitalism, patriarchy, and white supremacy, are endemic to the American social structure, the works in this volume recognize that these interlocking systems of inequality condition the life chances of entrepreneurs from diverse social locations differently, even among members of the same ethnic group. This book was originally published as a special issue of *Ethnic and Racial Studies*.

The Cambridge Companion to British Fiction: 1980-2018 Peter Boxall, 2019-06-27 From 1980 to the present, huge transformations have occurred in every area of British cultural life. The election of Margaret Thatcher in 1979 ushered in a new neoliberal era in politics and economics that dramatically reshaped the British landscape. Alongside this political shift, we have seen transformations to the public sphere caused by the arrival of the internet and of social media, and changes in the global balance of power brought about by 9/11, the emergence of China and India as superpowers, and latterly the British vote to leave the European Union. British fiction of the period is intimately interwoven with these historical shifts. This collection brings together some of the most penetrating critics of the contemporary, to explore the role that the British novel has had in shaping the cultural landscape of our time, at a moment, in the wake of the EU referendum of 2016, when the question of what it means to be British has become newly urgent.
