Social Enterprises in Asia Ernest Lim, 2023-03-30 Social enterprises are regarded as a vital solution to the pressing problem of socio-economic inequality and play a crucial role in the delivery of public goods and services. Ernest Lim argues that social enterprises in four leading Asian jurisdictions – India, Hong Kong, Singapore and Malaysia – should have a new legal form. This entails advancing a nuanced and comprehensive framework consisting of five criteria: (1) corporate purpose; (2) directors' duties; (3) decision-making powers; (4) reporting, impact measurement and certification; and (5) distribution of dividends, assets, and tax benefits. This invaluable work demonstrates that the existing legal forms in common law Asia, the UK and the US do not properly address the various conflicts of interest affecting social enterprises. An essential read for those interested in understanding and evaluating the laws and regulations on social enterprises, as well as designing and implementing creative ones to protect and promote these important businesses.

Beneficial Ownership in International Taxation Kułacki, Bąek, 2022-08-12 This authoritative book provides a structural, global view of evolving judicial and doctrinal trends in the understanding of beneficial ownership in international taxation. Bąek Kułacki presents a route towards an international autonomous meaning of beneficial ownership, while also offering a comprehensive explanation of the divergent understandings and tax policy arguments underpinning its continuing ambiguity.

International Tax at the Crossroads Craig Elliffe, 2023-12-11 In light of the significant transformations affecting international tax in recent years, this book offers in-depth examinations on a series of key issues on the taxation of cross-border transactions. Craig Elliffe brings together a wealth of acclaimed legal academics to consider how the Inclusive Framework (IF) is responding to the ways in which highly digitalised businesses operate.

An Air Transport Strategy for Northern Ireland Great Britain: Parliament: House of Commons: Northern Ireland Affairs Committee, 2012-11-30 Air travel is fundamental to family and economic life in Northern Ireland. To facilitate the rebalancing of the economy it is vital the air links to Great Britain, mainland Europe and the rest of the world are robust. The Committee identified in this report several hurdles to overcome. Air Passenger Duty (APD)-despite the APD on direct long-haul flights being reduced to zero, this does not assist the 98.5 per cent of passengers who travel from NI airports on short haul flights. Ways to reduce or, preferably, abolish APD on all flights into NI from GB and on all direct flights from Northern Ireland to any destination should be explored. Connectivity-air links to hub

airports, particularly Heathrow, must be, at least, maintained at the current level, and further routes should be actively sought. Airports Commission review-the review is being carried out by the Airports Commission into options to maintain the UK's status as an international hub for aviation. As this report is not due until 2015 and the delay as to the future airport configuration and capacity in the South East of England is causing concern among the business community in Northern Ireland. The Committee urged the Government to expedite the review and its decision, as soon as possible given its importance to Northern Ireland's international connectivity. Internal access to Northern Ireland's airports-road and rail links to all three of NI's airports must be improved. Visas-there should be introduced between the UK and Irish Government, a shared visit visa for the UK and the Republic of Ireland, as the current cost of two visas deters both business and leisure travellers from visiting both jurisdictions on a single visit.

The proposal for a national policy statement on ports Great Britain: Parliament: House of Commons: Transport Committee,2010-03-17 National Policy Statements (NPS) are a key component of the new planning system for nationally significant infrastructure projects, introduced by the Planning Act 2008. The Act stipulates that a proposal for a National Policy Statement will be subject to public consultation and allows for parliamentary scrutiny before designation as national policy by the Secretary of State. The draft Ports National Policy Statement (Department for Transport, 2009) has been welcomed by many organisations as a good start which can be built upon. The Committee has recommended a number of modifications and expects the Department will improve the draft as a result of the consultation and scrutiny processes. The Committee has reservations regarding the Government's 2007 policy for ports and the lack of guidance on location for port development in the NPS but this, of itself, does not make the NPS unfit for purpose. But the Committee cannot recommend designation at this stage on two counts. Firstly, a key, related policy statement - the National Networks NPS - has yet to be published. Secondly, the organisation likely to be one of the principal decision-makers for port development - the Marine Management Organisation - has yet to be established and so has been unable to comment on guidance that will be of great importance to its role. These are fundamental flaws in the consultation process and the Ports NPS should not be designated until they are rectified.

Bloomsbury Professional Law Insight - Cryptocurrency in Matrimonial Finance Dean Armstrong KC,Marc Samuels,2022-10-07 This book explores the specialist area of cryptocurrency in the context of matrimonial finance proceedings. The work is split into two parts. The first part provides a

comprehensive primer on cryptocurrency and blockchain technology. It explains what cryptocurrencies are, how they are held by their owners, and how blockchain technology works. This part also considers the legal status and current regulatory treatment of cryptocurrency in England and Wales. The second part provides an overview of financial remedies and the distributive principles applied by the Family Court in matrimonial finance cases. It analyses the current case law on cryptocurrencies as a variety of 'property', before exploring issues that practitioners may face when encountering crypto-assets in litigation. This includes the challenges of valuing, tracing, and freezing cryptocurrency, as well as disclosure considerations. The work includes an overview of the principles relating to 'self-help' disclosure and associated criminal offences pursuant to the Computer Misuse Act 1990 and the Data Protection Act 2018. It also contains a summary of HMRC's current guidance on the taxation of crypto-assets for individuals. This title is included in Bloomsbury Professional's Family Law and Cyber Law online services.

Estimating Value-Added Tax Using a Supply and Use Framework Asian Development

Bank, 2024-02-01 Value-added tax (VAT) generates significant government revenue in many countries and given their broad coverage, VAT measurements are useful indicators for economic and fiscal analyses. This publication presents the Asian Development Bank's National Accounts Statistics Value-Added Tax model, which is designed to provide a more consistent measure of non-recoverable VAT on products for national account statistics. Highlighting application results in Armenia, Kazakhstan, and Uzbekistan, it explains how the model can be used in balancing and reconciling supply and use tables as well as to assess VAT gaps. The publication shows that the model is relatively simple to apply and its consistency with the supply and use system makes it an attractive tool for policymakers.

Emerging Knowledge Economies in Asia Dessy Irawati, Roel Rutten, 2013-10-08 The book aims to identify key issues and developments in ASEAN-5 that illustrate the transition of this region towards a knowledge-based economy. The book contributes to understanding the opportunities and challenges faced by emerging economies. It explains the transition process from a knowledge based perspective, showing how knowledge creation and innovation contribute to the competitiveness of companies and sectors in this region. The book takes a distinctly ASEAN perspective by discussing examples of the transition process from all ASEAN 5 nations that show how this region is attempting to link up to the global knowledge economy of the 21st Century. To achieve these aims the book is divided into three parts, preceded by an introductory chapter explaining the logic, objectives and contributions of the book. Part I discusses ASEAN-5 as an emerging hub in the global economy. Part II discusses the

global links of the ASEAN region. Part III highlights innovation support in the ASEAN region. Each part identifies key developments and discusses relevant challenges and opportunities regarding the economic transition process based on examples for the various ASEAN-5 nations. The book contributes to the literature on emerging economies by explaining their challenges and opportunities of the catching-up process from a knowledge-based perspective. It is definitely a must-read.

Handbook on Critical Political Economy and Public Policy Christoph Scherrer, Ana Garcia, Joscha Wullweber, 2023-01-20 This comprehensive and stimulating Handbook examines the contribution of political economy to public policy. It provides an overview of several strands of critical political economy, supported by case studies from OECD countries, Latin America, South Africa, and South and East Asia.

FinTech Development for Financial Inclusiveness Anshari, Muhammad, Almunawar, Mohamad Nabil, Masri, Masairol, 2021-11-26 Financial technology (FinTech) and its related products are considered a major disruptive innovation in financial services, substantially elevating financial solutions and new business models. Resulting from the fusion of finance and smart mobile technology, this innovative technology requires additional investigation into its adoption, challenges, opportunities, and future directions so that we may understand and develop the technology to its full potential. FinTech Development for Financial Inclusiveness moves beyond the theoretical areas of FinTech to comprehensively explore the recent FinTech initiative scenarios with respect to processes, strategies, challenges, lessons learned, and outcomes within economic development as well as trade and investment. Covering a range of topics such as decentralized finance and global electronic commerce, it is ideal for industry professionals, business owners, consultants, practitioners, instructors, researchers, academicians, and students.

Strategic Leadership for Business Value Creation Don Argus, Danny Samson, 2021-01-13 This book focuses on leadership and strategy, corporate governance, operational excellence, and corporate social responsibility. In doing so, it offers both conceptual perspectives and case studies on these topics that are targeted at business executives who want to develop and mature towards being successful value creators in their leadership roles. Authored by the former CEO of National Australia

Bank (NAB), Don Argus, and business school professor Danny Samson, the book provides insights on the strategic leadership factors that make a significant and positive difference when they are executed effectively and, in contrast, what happens when ineffective leadership/ strategy are deployed. It proposes and illustrates core leadership axioms, and also delves into sustainable development as an element of strategy. The authors do this by developing and illustrating core concepts that relate to the two major case study companies of NAB and BHP. Readers will be particularly interested in the core elements of leadership and strategy, and the grounded reality of how they operated in the case studies. The authors bring insiders' and leaders' perspectives to these topics, including tables that document shareholder value creation, and the logic behind strategic decisions, as well as key organisational leadership and strategic decision processes.

Business, Government and Labor Linda Y C Lim, 2017-12-07 *Business, Government and Labor in the Economic Development of Singapore and Southeast Asia* analyzes the inter-linked and evolving roles of private sector business, government public policy, and labor markets in the economic development of Singapore and its Southeast Asian neighborhood. It does this through 16 essays written by Prof. Linda Y C Lim, an early and long-established scholar of these subjects, and published over a 35-year period. For Singapore, often considered the world's most successful economy, the essays highlight the determining role of government's industrial and social policy through to the present day, when the growth model of the past faces many external market and domestic resource constraints. In the rest of Southeast Asia, in contrast, the essays explore how private sector business, dominated by the locally-domiciled ethnic Chinese minority, thrived and drove economic growth in underdeveloped markets with imperfect institutions, and consider if and how this might change with China's increasing presence in the regional economy. A final set of essays analyzes the forces underlying women's employment, from labor-intensive Southeast Asian export factories in the 1980s to Singapore's foreign-labor-dependent economy and its current productivity challenges. Taken together, the essays show how government, business and labor interact in the process of economic development.

6th International Finance Conference on Financial Crisis and Governance Mondher Bellalah, 2011-08-08 Financial markets, the banking system, and the real estate, commodity and energy markets have, since 2007, been experiencing higher integration, more volatility and have undergone several shocks. More coordination is needed between G20 and market authorities. Regulators, banking supervision agencies and politicians are worried about economic growth and

financial crisis. This book covers seven aspects related to financial economic issues, along with some connected topics. The first covers risk assessment, corporate governance and value creation through an appropriate risk management system. The second covers international investments, market correlation, institutional holdings and market reactions during crisis. The third part is devoted to empirical and quantitative analysis of the observed economics and finance issues. The fourth part is devoted to the role of debt in financial crisis and its impact on financial markets and the world economy. The fifth part is devoted to debt policy, free cash flows and the structure of governance. The sixth part deals with management control and the importance of communication. The last part covers Islamic finance as an alternative to conventional finance for the debt solution, the importance of the energy sector and the role of financial innovations.

What Do We Know and What Should We Do About Tax Justice? Alex Cobham, 2024-01-05 This book lays out what we know about the scale, history and impacts of tax abuse. From profit-shifting by multinational corporations to the exploitation of offshore tax havens. It sheds light on the people and organisations that enable tax abuse, and the stark social inequalities it creates. Crucially, it also explores what we can do about it. What are the practical realities of challenging the threats of tax injustice and of holding abusers accountable? What are the policies and institutional shifts we need to see and fight for? It is estimated that cross-border tax abuse accounts for around half a trillion dollars of lost revenue around the world each year. This is important. Alex Cobham shows us that tax is more than just business regulation or economic policy. It is a powerful tool for creating a fair and just society. It is our social superpower. Alex Cobham is an economist and chief executive of Tax Justice Network. The 'What Do We Know and What Should We Do About...?' series offers readers short, up-to-date overviews of key issues often misrepresented, simplified or misunderstood in modern society and the media. Each book is written by a leading social scientist with an established reputation in the relevant subject area. Short, sharp and compelling. - Alex Preston, The Observer If you want to learn a lot about what matters most, in as short a time as possible, this is the series for you. - Danny Dorling, Halford Mackinder Professor of Geography, University of Oxford

The Law of Bitcoin Stuart Hoegner, 2015-06-29 THE LAW OF BITCOIN is the definitive guide to navigating the rules in the dynamic world of cryptocurrency. This book is the first of its kind delving into cryptocurrency law in four jurisdictions: Canada, Germany, the United Kingdom, and the United States. Written by knowledge leaders in the legal cryptocurrency space, THE LAW OF BITCOIN addresses

such topics as the intersection of cryptocurrencies and criminal law, taxation, anti-money laundering and counter-terrorist financing regulations, securities law, consumer protection, negotiable instruments, currency law, and financial regulation. THE LAW OF BITCOIN will be a leading resource and go-to text both for those wishing to understand the basics of how the law affects cryptocurrency and for those in the legal community searching for sophisticated answers to more advanced questions. “It is unique because the authors concisely and objectively explain how Bitcoin and bitcoin are lawfully viewed. They provide relevant, up-to-date clarity in a space that is often nebulous, confusing and filled with conflicting partisan information. The authors arrive at what will likely be unpopular conclusions that are only possible because they are not seeking to defend special interest groups. This includes issues such as fungibility which is handled in a manner that flips the conventional narrative within the Bitcoin community on its head, yet is important for any entrepreneur, developer, investor and user in the nascent space. THE LAW OF BITCOIN is a helpful guide to novices and veterans alike.” —Tim Swanson, author of THE ANATOMY OF A MONEY-LIKE INFORMATIONAL COMMODITY and GREAT CHAIN OF NUMBERS

International Taxation of Banking John Abrahamson, 2020-02-20 Banking is an increasingly global business, with a complex network of international transactions within multinational groups and with international customers. This book provides a thorough, practical analysis of international taxation issues as they affect the banking industry. Thoroughly explaining banking’s significant benefits and risks and its taxable activities, the book’s broad scope examines such issues as the following: taxation of dividends and branch profits derived from other countries; transfer pricing and branch profit attribution; taxation of global trading activities; tax risk management; provision of services and intangible property within multinational groups; taxation treatment of research and development expenses; availability of tax incentives such as patent box tax regimes; swaps and other derivatives; loan provisions and debt restructuring; financial technology (FinTech); group treasury, interest flows, and thin capitalisation; tax havens and controlled foreign companies; and taxation policy developments and trends. Case studies show how international tax analysis can be applied to specific examples. The Organisation for Economic Co-operation and Development Base Erosion and Profit Shifting (OECD BEPS) measures and how they apply to banking taxation are discussed. The related provisions of the OECD Model Tax Convention are analysed in detail. The banking industry is characterised by rapid change, including increased diversification with new banking products and services, and the increasing significance of activities such as shadow banking outside current regulatory regimes. For all these

reasons and more, this book will prove to be an invaluable springboard for problem solving and mastering international taxation issues arising from banking. The book will be welcomed by corporate counsel, banking law practitioners, and all professionals, officials, and academics concerned with finance and its tax ramifications.
