*A Better Nation* Gerry Hassan, Simon Barrow, 2022-05-30 As the battle of words over the future of Scotland as a democracy, nation and society continues, *A Better Nation: The Challenges of Scottish Independence* aims to go beyond the superficial divisions and media noise in order to address matters of real substance. Drawing on a range of original thinkers from a wide range of backgrounds, it tackles key issues about money, culture, equality, energy, borders, jobs, Europe and other 'big questions' head on. *A Better Nation* illustrates the high stakes in this debate, as well as the opportunities it affords. Outlining political approaches which are respectful of different views, doubts and ambiguities, it asks what kind of society we want to create and how we want to govern ourselves. The nature of the British state and Scottish democracy, the need to tackle inequalities, the challenges of centre-left politics, the climate emergency and the pressing need for a wellbeing economy are put at the heart of the discussion about independence. Contributors include: Ciaran Martin, Roz Foyer, Paul Mason, Gavin Esler, Joyce McMillan, John Curtice, Dani Garavelli, David Clark, Tanja Bueltmann, Malcolm Chalmers, Kirsty Hughes, John Kay, Lisa Clark, Colin Kidd, Hannah Graham, Paul Sweeney and many others.

**The Privatisation of Immigration Control through Carrier Sanctions** Sophie Scholten, 2015-08-20 Sophie Scholten describes the development of carrier sanctions regimes in the Netherlands and the United Kingdom, from the 1980s and assesses

the effects of carrier sanctions policies on relationships between the actors involved: immigration authorities, private carriers and passengers.

**Computer Assisted Radiology** Heinz U. Lemke,H.U. Lemke,K. Inamura,Carl C. Jaffe,1995-06-19 CAR is a symposium and exhibition covering the impact of computer and communication systems applied to radiology, image-guided therapy and other medical disciplines, which use digital imaging for diagnosis and therapy planning. CAR '95 also provides tutorials, but more emphasis is given to a broad variety of specific problems related to medical/technical issues in digital imaging. This is achieved through in-depth presentations of results of current medical imaging projects on a worldwide basis.

**HM Revenue & Customs** Great Britain: Parliament: House of Commons: Committee of Public Accounts,2012-08-29 In April 2010, the Department launched its renewed strategy to reduce the amount of tax lost each year due to alcohol duty evasion, principally through fraud. In 2010-11, the renewed strategy delivered £433 million in financial benefits against a target of £390 million. However, it is estimated that there is a tax gap - the difference between taxes due and the amount actually collected - of up to £1.2 billion. The Department has not produced an estimate of the tax gap for wine, despite a commitment to do so. Without reliable information on the scale and nature of duty evasion for each category of alcohol the Department cannot tailor its approach or make best use of the additional £917 million it

plans to spend on reducing all kinds of tax avoidance and evasion. The Department is consulting on a range of measures to reduce alcohol duty fraud, including a proposal to introduce fiscal stamps for beer but does not yet have a full understanding of the costs and benefits of these proposals. The Department also does not make best use of intelligence and technology to detect and prevent alcohol duty evasion and needs to work more closely with the industry to improve its understanding of legitimate export markets, and improve how it works with the UK Border Force. In addition, the full capability of the Excise Movement Control System (EMCS), which facilitates the tracking of freight across the European Union and could be used to target interventions and investigations more effectively, is not used

*Applied Laser Medicine* H. Breuer, N. Krasner, T. Okunata, D. Sliney, 2012-12-06 This handbook is intended for the advanced specialist and for the practitioner interested in the application of lasers in medicine. It provides summaries of all available medical laser systems and their clinical use. The first part introduces basic laser physics, including laser-tissue interactions as well as technical equipment and particular techniques developed for medical use in connection with laser. The second part of the text covers all areas of laser application in medicine and has been written by senior specialists from different countries. The book includes about 300 line drawings, more than 100 high quality photographs, an extensive subject and author register, and an

exhaustive list of references.

Laser in der Medizin / Laser in Medicine Wilhelm Waidelich, Gerd Staehler, Raphaela Waidelich, 2013-03-08 Anwendungen von Laserstrahlung in der Medizin sollen unmittelbar der Gesundheit der Menschen zugute kommen. Die Erarbeitung von Laserverfahren setzt ein Zusammenwirken von Mediziner\*innen, Physikern und Technikern voraus. Seit 1973 führt die Kongreß-Messe LASER alle 2 Jahre die internationalen Experten in München zusammen. Im Juni 1995 fanden der 12. Internationale Kongress Lasermedizin und die 10. Tagung der deutschen Gesellschaft für Lasermedizin auf der LASER statt. Die Ergebnisse spiegeln eine aktuelle Standortbestimmung der Lasermedizin wider und vermitteln Perspektiven und Impulse für zukünftige Entwicklungen. Der Inhalt der Vorträge wird daher im vorliegenden Band der Fachwelt zugänglich gemacht.

**Borders Revisited** Bastian A. Vollmer, 2021-08-12 The nature and configuration of borders, and the relationship between state borders and societies, have changed. In the 21st century, internationalism, transnationalism, and super-diversity have further provoked complexities and anxieties. It seems that as border and migration regimes undergo dramatic transformations, their public profile increases. This book revisits borders, bordering practices, and meanings, with a particular focus on the United Kingdom as a case study. Bastian A. Vollmer examines not only the theoretical and historical dimensions of borders but also various empirical data, including extensive text corpora and dozens of in-depth

interviews. Expanding on the concept of vernacular security—that is, an everyday understanding of security—he argues that the existential value of borders is not merely physical, but extends into the order and future construction of states and societies. This book demonstrates decisively that the concept of the border has not left the centre stage of philosophy, political theory, and political sociology, but has instead emerged as a focal point for multidisciplinary engagements. It further demonstrates how attention to a vernacular perspective can inform those engagements, yielding vital insights. As such, it should appeal to students and scholars across disciplines interested in the contemporary development and relevance of borders and their discursive cultures.

Parliamentary Debates (Hansard). Great Britain. Parliament. House of Commons,2013

*Stroboscopy* Gerhard Boehme,Manfred Gross,2005  
Laryngostroboscopy makes the normal and pathological vibration process of vocal folds visible during phonation. Stroboscopy is a routine testing method which is recognized worldwide within the practice of laryngologists, phoniaticians, ENT surgeons, neurologists and voice therapists. This text, featuring full colour illustrations, describes the clinical values for functional and organic larynx-related illness according to basic theoretical principles. Laryngostroboscopy is a routine procedure. However, intensive training is necessary before a higher level of confidence is attained in

performing differential diagnostics using stroboscopy. Principally three major considerations must be taken into account when performing laryngostroboscopy: the laryngostroboscopy image depends on the sound pressure level; the fundamental frequency of the voice; and the assessment of laryngostroboscopic findings is very closely linked to the experience of the examiner.

**Endometriose** Andreas D. Ebert, 2014-10-29 Allein in Deutschland leiden 2-6 Mio. Frauen an Endometriose; mehr als 30.000 Frauen erkranken jährlich. Diese sehr häufige gutartige Tumorerkrankung beeinträchtigt die Betroffenen, ihre Partnerschaft und Sexualität, die Familie und die berufliche Entwicklung durch Schmerzen und Unfruchtbarkeit. Die bereits 4. Auflage des Frauenärztlichen Taschenbuches ist komplett überarbeitet und aktualisiert und enthält über 120 farbige Abbildungen. Es liefert aktuelle und kompakte Informationen für Ärzte und betroffene Frauen und berücksichtigt u.a. die neuen Leitlinien der EHSRE sowie der Deutschen Gynäkologischen Gesellschaft; auch wird die medikamentöse Therapie der Endometriose vorgestellt. Besuchen Sie den 12. Endometriosekongress in Berlin

*Charité - Aufbruch nach der Wende* Manfred Dietel, 2022-08-19 Kurz nach der deutschen Wiedervereinigung übernahm Manfred Dietel die Leitung des berühmten Rudolf-Virchow-Hauses. Zweiundzwanzig Jahre lang führte er das Institut für Pathologie der Charité, diente als Dekan und Ärztlicher Direktor und hatte entscheidenden

Anteil am Auf- und Umbau des traditionsreichen Berliner Krankenhauses. Nach einer kurzen Darstellung seines Werdegangs schildert Manfred Dietel die turbulenten Ereignisse und kontroversen wissenschaftspolitischen Auseinandersetzungen, die sich nach der Wende in der Berliner Universitätsmedizin abspielten. Spannend und eindrucklich beleuchtet er die oft unglückliche Rolle des Berliner Senats wie auch hausinterne Ost-West-Konflikte und die schwierige Position des Wissenschaftsrates in dieser bewegten Zeit. Anschließend bietet der Autor eine ebenso verständliche wie anschauliche Einführung in das faszinierende Fach der klinischen und molekularen Pathologie. Die Integration neuer immunologischer und molekularer Techniken hat diesem für die klinische Diagnostik so zentralen Fach in den letzten drei Jahrzehnten – speziell in der Krebsdiagnostik – einen enormen Bedeutungszuwachs beschert. So entwickelte sich etwa die histologische Gewebediagnostik von einer zumeist deskriptiven zur eher prädiktiven, sprich die Therapieentscheidung direkt beeinflussenden, Disziplin. Der Beitrag, den die Pathologie der Charité durch jahrelange intensive Forschungsarbeit in der Onkologie dazu geleistet hat, ist kaum zu überschätzen und wird exemplarisch dargestellt. Abgerundet werden die Innenansichten durch die amüsante Skizzierung besonderer Ereignisse und origineller Aktivitäten sowie persönlicher Erfahrungen. Originell und humorvoll berichtet Manfred Dietel in diesem Buch von den komplexen Abläufen in der weltberühmten Charité und präsentiert so bewegende Einblicke in

eine prägende Zeit der Medizingeschichte.

Mind over Matter - Regulation of Peripheral Inflammation by the CNS Michael Schäfer, Christoph Stein, 2012-12-06 Several new developments in the field of neuroimmunology with focus on the brain-to-immune system communication have been the incentive for this PIR volume. It covers topics such as brain-immune interactions, the impact of stress on the immune response, pain and immunosuppression, the modulation of inflammation and pain by the sympathetic nervous system, consequences of nerve injury for the immune system, neuronal mechanisms of immune cell recruitment, and the modulation of the immune response by corticotropin-releasing hormone or adenosine. The authors are a unique group of scientists who are all interested in brain-to-immune interactions; however, each from a different perspective. The volume will serve both neurobiologists and immunologists to understand the influence of the central nervous system on peripheral inflammation. Many aspects of this book will also be stimulating for researchers in the pain field.

The Border Martin A. Schain, 2019-08-15 In our globalized world, borders are back with a vengeance. New data shows a massive increase of walls and barriers between countries after 2001. However, at the same time, the flow of people and the growth of trade have continued at impressive rates, and arguments for more open borders remain relevant. In *The Border*, Martin Schain compares

how and why border policy has become increasingly important, politicized, and divisive in both Europe and the United States. Drawing from an intensive analysis of documents and interviews, he argues that border control is a growing international movement. In Europe, the European Union is under scrutiny, and many countries seek to block the entry of asylum-seekers from wars in the Near East. In the US, Donald Trump pledged to build a wall along the Mexico border, restricted the entry of Syrian asylum-seekers, and more generally tried to ban Muslim immigration. Moreover, on both sides of the Atlantic, trade barriers appear in the political agendas of major parties. Schain delves into these interlinked phenomena, showing that migration, identity, and trade have been packaged and transformed into hotly contested issues of border governance and control.

**Motorcycling and Leisure** Paul Broughton, Linda Walker, 2016-12-05 Despite the fact that there are around 1.2 million powered two wheelers (PTWs) within the United Kingdom, riders are often misconceived as living at the edge of society; however, this is often far from the truth. Riding a PTW is a high-risk activity and those who ride are often perceived as being 'risk junkies', but through an in-depth exploration of this leisure activity, *Motorcycling and Leisure* explains that riders ride because they enjoy it and do not necessarily enjoy the risk involved. The book presents a range of contemporary research on riders and how they find enjoyment. The book further explores the rider goal of enjoyment and

utilises Fuller's task homeostasis theory along with Csikszentmihalyi's theory of flow to develop an understanding of the interaction between risk and goals. In conclusion it develops principles of interventions with the aim of guiding intervention design and reducing the number of motorcycle crashes.

*Unseen Lives* Kate Garbers, 2021-11-18 '...a fully grown man utterly broken by what he had experienced, physically and mentally exhausted with physical evidence showing the overt signs of the abuse he had been through.' This is how Kate Garbers met Riso, a man who had been trafficked and in forced labour for months, with no way out. Modern slavery is far closer than we think. Yet it is largely unseen and unknown to most of us - a crime against humanity hidden in plain sight. In this revealing exposé, Kate Garbers shares moving stories of survivors she has met and shares insights she has gained through over a decade of anti-slavery work. Survivor stories are complemented by a forensic account of how modern slavery works and the many forms it can take - from forced labour to organ harvesting - and how it is enabled to continue by our current laws and systems. *Unseen Lives* also provides a vision of hope for those looking to challenge and dismantle modern slavery, laying out what changes we need to make as individuals and as a society in order to effectively tackle modern slavery and improve the support of survivors.

SNIPPETS Nathan Boot, 2022-07-15 I'm Nat Boot-- I'm a lawyer turned musician. The book you're holding is a unique memoir of the Brexit and Covid

years, drawing on contemporary emails and linked to a dedicated You Tube Channel. Always original and insightful--before Brexit, I proposed Customs Ports in Northern France, rather than the (crazy) Irish Sea idea... If pressed to describe the book's main thrust, I'd call it: political satire, with no punches pulled, interlaced with poetry and educational gems--not forgetting music... It's a work that all the family will enjoy dipping into (and, hopefully, fighting for!)

**Immigration and the State** Alex Balch, 2016-07-30

This book examines how and why liberalism and human rights have proven insufficient to protect immigrants. Contemporary immigration systems are characterized by increasing complexity and expanding enforcement, and frequently criticized for violating human rights and for causing death, exclusion and exploitation. The 'migrant crisis' can also be understood as a crisis of hospitality for liberal democracies. Through analysis of the immigration histories and political dynamics of Britain and the US, the book explains how these two archetypal liberal states have both sought to create a hostile environment for unwanted immigrants. The book provides a fresh and original perspective on the development of immigration systems, showing how they have become subject to the politics of fear and greed, and revealing how different traditions of hospitality have evolved, survived, and renewed.
