Darkness of Dragons (Wings of Fire #10) Tui T. Sutherland,2017-07-25 An ancient evil, a terrible prophecy -- and five dragonets who could save the world . . . Don't miss the most thrilling adventure yet in the New York Times bestselling Wings of Fire series! Qibli knows Darkstalker must be stopped. And he knows he could stop him -- if he had magic. With even a sliver of the ancient dragon's all-powerful scroll, Qibli could rewrite history the right way: end war forever; make every dragon happy; perhaps even cast a very small spell so that everyone would like him . . . Instead, as Darkstalker's dangerous influence spreads across Pyrrhia, entrancing or killing every dragon in the seven tribes, Qibli can only grasp the small animus objects he's borrowed from Turtle. With some clever thinking, Qibli's talons finally hold the power to make a difference. But prophecies are not easy to rewrite. Can Qibli be the magical force Pyrrhia needs, or will he be the one to bring Jade Mountain -- and his family, his friends, his whole world -- crashing down?

Game Dynamics Oliver Korn,Newton Lee,2017-03-29 This book offers a compendium of best practices in game dynamics. It covers a wide range of dynamic game elements ranging from player behavior over artificial intelligence to procedural content generation. Such dynamics make virtual worlds more lively and realistic and they also create the potential for moments of amazement and surprise. In many cases, game dynamics are driven by a combination of random seeds, player records and procedural algorithms. Games can even incorporate the player's real-world behavior to create dynamic responses. The best practices illustrate how dynamic elements improve the user experience and increase the replay value. The book draws upon interdisciplinary approaches; researchers and practitioners from Game Studies, Computer Science, Human-Computer Interaction, Psychology and other disciplines will find this book to be an exceptional resource of both creative inspiration and hands-on process knowledge.

Vesper Flights Helen Macdonald,2020-08-25 The New York Times-bestselling author of *H is for Hawk* explores the human relationship to the natural world in this “dazzling” essay collection (*Wall Street Journal*). In *Vesper Flights*, Helen Macdonald brings together a collection of her best loved essays, along with new pieces on topics ranging from nostalgia for a vanishing countryside to the tribulations of farming ostriches to her own private vespers while trying to fall asleep. Meditating on notions of captivity and freedom, immigration and flight, Helen invites us into her most intimate experiences: observing the massive migration of songbirds from the top of the Empire State Building, watching tens of thousands of cranes in Hungary, seeking the last golden orioles in Suffolk’s poplar forests. She writes with heart-tugging clarity about wild boar, swifts, mushroom hunting, migraines, the strangeness of birds’ nests, and the unexpected guidance and comfort we find when watching wildlife.

A Sky Full of Kindness Rob Ryan,2013-03-26 With magical, intricate papercuts Rob Ryan tells the story of two birds about to become parents for the first time. Fishing and Tying Small Flies Ed Engle,2019-06-26 When fishing gets tough, fly fishers might be tempted to use bigger, flashier flies, but expert angler Ed Engle knows that tiny, sparsely dressed flies often work when nothing else will. With a little attention to tying the flies and fishing technique, fly fishers will take trout on flies as small as 24, 28, and even 30. Now combining his two classic books on small fly tying and fishing in one updated, second-edition volume, Engle covers the patterns and how to fish them. You’ll learn how to find and observe trout in small-fly water, how to evaluate the major small-fly hatches, how to fish the surface and below, and how to strike, play, and land trout on tiny flies. Engle deftly covers small-fly history and how the flies have developed. Tying tools, special materials, specific patterns for aquatic insects, tying techniques, and a full complement of patterns complete the book.

Cold War, Hot Wings Chris J. Bain,2007-11-13 A former Royal Air Force fighter pilot chronicles his time in service during the Cold War in this gripping memoir. This is a semi-autobiographical account of a fighter pilot in the RAF from 1962 to 1994. He was both a Hunter and Harrier pilot, rose to Squadron Leader level, and commanded fighter and strategic reconnaissance units. He was CO of the Desert Rescue Team, flew Dakotas on desert supply running, and saw active fighter service receiving bullet holes in his aircraft during the Aden Radfan campaign. He flew Cold War covert reconnaissance missions, commanded the Harrier unit in Belize, spent the Gulf War working with the U.S. Defense Intelligence Agency, and became a nuclear weapons specialist. The book includes inside accounts of army support missions on the Yemen border, flying cold war reconnaissance missions in Europe, early day conversion to Harriers without any training aids, and long range ultra-high-level, covert photo intelligence gathering sorties, including helping police and customs with airborne photography, most notably for the 2nd Moors Murder Inquiry. It also includes political, geographical and economic background of all the places in which he served, and comments on political and military decisions made at those times.
