Keep Your Android Phone Running All Day Steven Mann,2011-06 One of the biggest complaints on all of these new fancy smart phones is that the battery gets drained very quickly. I noticed this from day one with my recent Android phone purchase. However, after a day of tweaking every single possible setting to conserve power without losing performance or functionality, I can now run my Android phone for over 24 hours before needing a charge. I was able to tweak my phone and make a huge difference. Some settings are very obvious while other tricks, tips, and settings may not be. I thought that a guide book like this would help others and provide people with some things to think about or change in order to preserve battery life and enjoy their phone experience - without having to run for a charger.
