EA Sports FIFA Raiford Guins, Henry Lowood, Carlin Wing, 2022-07-14 If there is anything close to a universal game, it is association football, also known as soccer, football, futsal, fútbol, fitba, and futebol. The game has now moved from the physical to the digital - EA's football simulation series FIFA - with profound impacts on the multibillion sports and digital game industries, their cultures and players. Throughout its development history, EA's FIFA has managed to adapt to and adopt almost all video game industry trends, becoming an assemblage of game types and technologies that is in itself a multi-faceted probe of the medium's culture, history, and technology. EA Sports FIFA: Feeling the Game is the first scholarly book to address the importance of EA's FIFA. From looking at the cultures of fandom to analyzing the technical elements of the sports simulation, and covering the complicated relations that EA's FIFA has with gender, embodiment, and masculinity, this collection provides a comprehensive understanding of a video game series that is changing the way the most popular sport in the world is experienced. In doing so, the book serves as a reference text for scholars in many disciplines, including game studies, sociology of sports, history of games, and sports research.

The Ultimate Philadelphia Athletics Reference Book 1901-1954 Ted Taylor, 2010-02-10 Jack Coombs (1906-14) won three games in the 1910 World Series, an amazing accomplishment for any pitcher. (In three World Series he was lifetime 5-0.) That year he had gone 31-9 to pace the A's and lead the league in victories. He was 28-12 the following season and 21-10 in 1912, clearly the best years of his fourteen-year-career. He spent four years with Brooklyn and finished up with Detroit. Lifetime in 355 games Jack was 159-110. After his playing days were over he became head baseball coach at Duke University and sent a number of players to the A's during that time. Orge "Pat" Cooper (1946) a pitcher, not the comedian, who was one of those "Cup of Coffee" guys who saw action in one game, one inning and was never seen or heard from again in the majors. In the minors he pitched, played the outfield and first base and got into 622 games over ten years batting, of all things, .318. As a minor-league pitcher, he was 24-16. Arthur "Bunny" Corcoran (1915) was a member of the '15 A's. He was 0-4 in his one game at third base. Played just two minor-league campaigns (1920 at Norfolk and 1921 at Rocky Mount), played in 238 games and batted .230. Ensign "Dick" Cottrell (1913) spent small parts of five different years in the majors—and every one of them with a different team. With the A's he was 1-0, with the rest of them, combined, he was 0-2. In four minor-league seasons, he won 34, lost 26. Why would someone give their kid a military rank as a first name? Stan Coveleski (1912) Hall of Famer, a native of Shamokin, PA, Stan started his fourteen-year career with the A's in 1912 and, somehow, they let him get away after he went 2-1. In fact he spent four years in the minors and was twenty-seven before he was back in the majors to stay, mostly with Cleveland (1916-24). He also saw service with Washington and the Yankees. Lifetime in 450 games, Coveleski won 215, lost 142 with an ERA of 2.88. He was the brother of Harry Coveleski a very good southpaw major-league pitcher who appeared with the Phillies, Reds, and Tigers over nine years (1907-18). Ironically the two brothers never faced each other on the mound. The correct spelling of his last name was Coveleskie, but he never corrected anyone and, as a consequence, his Hall of Famer The Ultimate Philadelphia Athletics Reference Book 1901-1954 93 plaque has his last name spelled incorrectly. (The original spelling of his name was Kowalewski, he and his brother changed it legally). Stan Coveleskie shared the same name (and they spelled it right, too) not the same talents as the well-known Hall of Famer. Stan played in the minors for six seasons (1944-51), five of them in the Phillies farm system, one in the A's organization. A catcher by trade, Coveleskie appeared in 346 games and batted .261. Homer Cox was signed as a catcher by the A's in 1938 and spent the majority of his ten-year minor-league career in their organization. He played in 578 games and had a .301 lifetime batting average, but never really got out of the low minors. He batted .367 for Lexington in 1945 in eighty-four games, his best season. Martin "Toots" Coyne (1914) went zero for two in his one game for the A's. No other pro record exists. Born and died in St. Louis. Jim Roy Crabb (1912) in seven games for the A's he was 2-4, in two games with the White Sox to start the season, he was 0-1. Lifetime, one year, nine games. Spent seven seasons in the minors, winning seventy-six, losing seventy-one. Once lost twenty games playing for three different teams in 1914. George Craig (1907) no decisions in two appearances. He was a left hander. Was 6-5 in his one minor-league season. Roger "Doc" Cramer (1929-35) who belongs in the Hall of Fame and will never get there despite his twenty-year-career and lifetime batting average of .296. His best A's year was 1935 when he batted .332 in 149 games. Cramer appeared in 2,239 games, had 2,705 hits and batted over .300 eight times

The Risk of Trading Michael Toma, 2012-03-23 Develop the skills to manage risk in the high-stakes world of financial speculation The Risk of Trading is a practical resource that takes an in-depth look at one of the most challenging factors of trading—risk management. The book puts a magnifying glass on the issue of risk, something that every trader needs to understand in order to be successful. Most traders look at risk in terms of a stop-loss that enables them to exit a losing trade quickly. In The Risk of Trading, Michael Toma explains that risk is ever-present in every aspect of trading and advocates that traders adopt a more comprehensive view of risk that encompasses the strategic trading plan, account size, drawdowns, maximum possible losses, psychological capital, and crisis management. Shows how to conduct a detailed statistical analysis of an individual's trading methodology through back-testing and real-time results so as to identify when the methodology may be breaking down in actual trading Reveals why traders should think of themselves as project managers who are strategically managing risk The book is based on the author's unique 'focus on the risk' approach to trading using data-driven risk statistical analytics Using this book as a guide, traders can operate more as business managers and learn how to avoid market-busting losses while achieving consistently good results.
