**Marketing and Mobile Financial Services** Aijaz A. Shaikh, Heikki Karjalainen, 2018-12-21 Mobile financial services (MFS) are of major interest and importance to both researchers and practitioners. The role played by nonbanking actors including telecoms and FinTech firms as well as other participants, such as PayPal and Amazon, in developing and deploying innovative financial and payment services is undeniable. Peer2peer (P2P) payments from nonbank services are becoming increasingly commonplace and will shortly be codified by EC (EU?) regulations requiring banks to provide access to consumer data for third-party app developers and service providers. Three major mobile financial systems—mobile banking, mobile payments, and branchless banking—currently dominate the electronic retail banking sector. Although interconnected and interrelated, their business models, regulatory frameworks, and target markets are distinct. This book provides a unified

perspective on MFS and discusses its evolution, growth, and future, as well as identifying the frameworks, stakeholders, and technologies used in financial information systems in general and MFS in particular. Academics and researchers in digital and financial marketing will find this book an invaluable resource, as will bank executives, regulators, policy makers, FinTech professionals, and anyone interested in how mobile technology, social media and financial services will increasingly intersect.

Mobile payments can be a convenient way for consumers to pay for goods and services but they also raise consumer protection concerns. This book examines the mobile payments industry and its effects on consumers, while exploring areas where more attention is warranted such as dispute resolution, data security, and privacy.

*Mobile Deposit* Francis A. K. Banson, 2014-06-27 Mobilization of deposit to a bank is as essential as oxygen for human being, (Deb, K. 1988). Deposit mobilization is one of the core functions of banking business and so an important source of working capital for the bank. Since deposits are normally considered as a cost effective source of working fund, the bank's ability to lend more as well as its success greatly lies on its deposit mobilization. Walk in deposit remains the major system where by customers are able to deposit money into their account. This has led to long queues in banking halls to the displeasure of customers since they have to spend a lot of time just to deposit money. In addition, the banks are unable to mobilize deposit from the unbanked since they don't have physical presence in these communities. On the other hand, if the banks can adopt a system where by people in these communities could operate an account and make regular deposits without necessarily visiting the bank, then the bank can mobilize cheap funds to augment its working capital. The findings show that mobile deposit has proven to be very effective means of mobilizing deposit apart from the traditional usual walk in deposit system.
