Digital Technology and Changing Roles in Managerial and Financial Accounting Allam Hamdan,Bahaaeddin Alareeni,Reem Khamis,2024-01-29 Digital Technology and Changing Roles in Managerial and Financial Accounting explores the profound impact of digital technology on the accounting profession.

Artificial Intelligence (AI) and Finance Bahaaeddin A. M. Alareeni,Islam Elgedawy,2023-08-26 Artificial intelligence (AI) has the potential to significantly improve efficiency, reduce costs, and increase the speed and accuracy of financial decision-making, making it an increasingly important tool for financial professionals. One way that AI can improve efficiency in finance is by automating tasks and processes that are time-consuming and repetitive for humans. For example, AI algorithms can be used to analyze and process large amounts of data, such as financial statements and market data, in a fraction of the time that it would take a human to do so. This can allow financial professionals to focus on higher-value tasks, such as interpreting data and making strategic decisions, rather than being bogged down by mundane tasks. AI can also reduce costs in finance by increasing automation and eliminating the need for certain tasks to be performed manually. This can result in cost savings for financial institutions, which can then be passed on to customers in the form of lower fees or better services. AI can be used to identify unusual patterns of activity that may indicate fraudulent behavior. This can help financial institutions reduce losses from fraud and improve customer security. AI-powered chatbots and virtual assistants can help financial institutions provide faster, more efficient customer service, particularly when it comes to answering common questions and handling routine tasks. Some financial institutions are using AI to analyze market data and make trades in real-time. AI-powered trading algorithms can potentially make faster and more accurate trading decisions than humans. In terms of speed and accuracy, AI algorithms can analyze data and make decisions much faster than humans, and can do so with a high degree of accuracy. This can be particularly useful in fast-moving financial markets, where quick and accurate decision-making can be the difference between success and failure. This book highlights how AI in finance can improve efficiency, reduce costs, and increase the speed and accuracy of financial decision-making. Moreover, the book also focuses on how to ensure the responsible and ethical use of AI in finance. This book is a valuable resource for students, scholars, academicians, researchers, professionals, executives, government agencies, and policymakers interested in exploring the role of artificial intelligence (AI) in finance. Its goal is to provide a comprehensive overview of the latest research and knowledge in this area, and to stimulate further inquiry and exploration.

Islam and Capitalism in the Making of Modern Bahrain Rajeswary Ampalavanar Brown,2023-05-01 In recent decades, the culture, society, politics, and economics of Bahrain have been transformed, driving its global ambitions while retaining to a degree the rule of law and cosmopolitanism. Islam and Capitalism in the Making of Modern Bahrain examines the transformation of Bahrain from the 1930s, from a regional trading port and then an important oil producer into the financial hub for the Gulf and into a global centre of Islamic finance. It focuses on the

changes and tensions that transformation brought to Bahrain's political, legal, economic, religious, and social structures. In this book, Rajeswary Brown explores the rising force of youth populism driven by the persistence of poverty and unemployment, notably among rural Shi'ite communities and unemployed middle-class youth, as well as examining Bahrain's skillful reconciliation of the demands of Islamic faith, expressed in the Sharia, to the requirements of modern financial capitalism. In this, Bahrain's experience can be set against the modern history of much of the rest of the Middle East, most strikingly with respect to the position of Islamic charities, notably in Syria, comparisons of which are fully explored here.

The Report: Jordan 2014 Oxford Business Group, 2014-10-30 A number of Jordan's key economic indicators have improved over the last year and GDP is forecast to grow by 3.5% in 2014. Jordan's reliance on energy imports is being addressed with increased focus on domestic oil shale reserves and nuclear energy, while plans to build a pipeline through the country from Iraq will provide a stable oil supply at discounted rates. Jordan's expanding population has put pressure on state services, particularly health, where the private sector is expected to play an increasingly prominent role. Tourism revenues rose in 2014 and, with the unveiling of a new arrivals terminal at Aqaba International Airport and plans for a national rail network, these are expected to rise further in the coming years. All in all, continued political stability, large scale transportation developments, the availability of a young, educated workforce and government efforts to reduce the fiscal deficit and the country's reliance on energy imports should ensure Jordan maintains its strong position in the region.

It will highlight the role of ICTs in achieving the Sustainable Development Goals and present the newly agreed SDG indicator framework, including the ICT indicators. The report will also include a chapter looking into new metrics to measure mobile uptake, and a chapter presenting data analyzing Internet use and uptake.
