Engines of Innovation Holden Thorp, Buck Goldstein, 2013-08-12 In *Engines of Innovation*, Holden Thorp and Buck Goldstein make the case for the pivotal role of research universities as agents of societal change. They argue that universities must use their vast intellectual and financial resources to confront global challenges such as climate change, extreme poverty, childhood diseases, and an impending worldwide shortage of clean water. They provide not only an urgent call to action but also a practical guide for our nation's leading institutions to make the most of the opportunities available to be major players in solving the world's biggest problems. A preface and a new chapter by the authors address recent developments, including innovative licensing strategies, developments in online education, and the value of arts and sciences in an entrepreneurial society.

Sovereign Entrepreneurs Courtney Lewis, 2019-04-10 By 2009, reverberations of economic crisis spread from the United States around the globe. As corporations across the United States folded, however, small businesses on the Qualla Boundary of the Eastern Band of Cherokee Indians (EBCI) continued to thrive. In this rich ethnographic study, Courtney Lewis reveals the critical roles small businesses such as these play for Indigenous nations. The EBCI has an especially long history of incorporated, citizen-owned businesses located on their lands. When many people think of Indigenous-owned businesses, they stop with prominent casino gaming operations or natural-resource intensive enterprises. But on the Qualla Boundary today, Indigenous entrepreneurship and economic independence extends to art galleries, restaurants, a bookstore, a funeral parlor, and more. Lewis's fieldwork followed these businesses through the Great Recession and against the backdrop of a rapidly expanding EBCI-owned casino. Lewis's keen observations reveal how Eastern Band small business owners have contributed to an economic sovereignty that empowers and sustains their nation both culturally and politically.

Wine for Normal People Elizabeth Schneider, 2019-11-05 This is a fun but respectful (and very comprehensive) guide to everything you ever wanted to know about wine from the creator and host of the popular podcast *Wine for Normal People*, described by *Imbibe* magazine as a wine podcast for the people. More than 60,000 listeners tune in every month to learn a not-snobby wine vocabulary, how and where to buy wine, how to read a wine label, how to smell, swirl, and taste wine, and so much more! Rich with charts, maps, and lists—and the author's deep knowledge and unpretentious delivery—this vividly illustrated, down-to-earth handbook is a must-have resource for millennials starting to buy, boomers who suddenly have the time and money to hone their appreciation, and anyone seeking a relatable introduction to the world of wine.

A Prescription for Change Michael Kinch, 2016-10-07 The introduction of new medicines has dramatically improved the quantity and quality of individual and public health while contributing trillions of dollars to the global economy. In spite of these past successes—and indeed because of them—our ability to deliver new medicines may be quickly coming to an end. Moving from the beginning of the twentieth century to the present, *A Prescription for Change* reveals how changing business strategies combined with scientific hubris have altered the way new medicines are discovered, with dire implications for both health and the economy. To explain how we have arrived at this pivotal moment, Michael Kinch recounts the history of pharmaceutical and biotechnological advances in the twentieth century. Kinch relates stories of the individuals and organizations that built the modern infrastructure that supports the development of innovative new medicines. He shows that an accelerating cycle of acquisition and downsizing is cannibalizing that infrastructure. Kinch demonstrates the dismantling of the pharmaceutical and biotechnological research and development enterprises could also provide opportunities to innovate new models that sustain and expand the introduction of newer and better breakthrough medicines in the years to come.

Regulating Sexually Oriented Businesses David W. Owens, 1997 Examines the legal issues associated with government regulation of sexually oriented businesses. Addresses constitutional issues such as what type of sexually oriented activity can be banned entirely; zoning restrictions on the location of sexually oriented businesses—the type of restrictions most frequently used by local governments; how far the First Amendment allows local governments to go in restricting these businesses; what a local government must do to establish a proper legal foundation for its regulations; and the operational restrictions that can be imposed on sexually oriented businesses.

Global Brand Strategy Jan-Benedict Steenkamp, 2017-01-03 Steenkamp introduces the global brand value chain and explains how brand equity factors into shareholder value. The book equips executives with techniques for developing strategy, organizing execution, and measuring results so that your brand will prosper globally. What sets strong global brands apart? First, they generate more than half their revenue and most of their growth outside their home market. Secondly, their brand equity is responsible for a massive percentage of their firm's market value. Third, they operate as single brands everywhere on the planet. We find them in B2C and B2B industries, among large and small companies, and among established companies and new businesses. The stewards of these brands have a set of skills and knowledge that sets them apart from the typical corporate marketer. So what's their secret? In a world that is globalizing, but not yet globalized, how do you build a powerful global brand that resonates universally but also accommodates local nuances? How do you ensure that it is dynamic and flexible enough to change at market speed? World-class marketing expert Jan-Benedict Steenkamp has studied global brands for over 25 years on six continents. He has distilled their practices into eight tools that you can start using today. With case studies from around the world, Steenkamp's book is provocative and timely. *Global Brand Strategy* speaks to three types of B2C and B2B managers: those who want to strengthen already strong global brands, those who want to launch their brands globally and get results, and those who need to revive their global brand and stop the bleeding.

Scientists, Business, and the State, 1890–1960 Patrick Joseph McGrath, 2002-01-01 McGrath describes how, between 1890 and 1960, scientific, business, and political leaders together forged a new definition of American democracy in which science and technology were presented to the public as crucial ingredients of the nation's progress, prosperity, and political stability. Scientists even argued that the very act of expert collaboration, whether in business or politics, offered a model of ways to solve social problems and achieve political stability..

Underwriters of the United States Hannah Farber, 2021-10-28 Unassuming but formidable, American maritime insurers used their position at the pinnacle of global trade to shape the new nation. The international information they gathered and the capital they generated enabled them to play central roles in state building and economic development. During the Revolution, they helped the U.S. negotiate foreign loans, sell state debts, and establish a single national bank. Afterward, they increased their influence by lending money to the federal government and to its citizens. Even as federal and state governments began to encroach on their domain, maritime insurers adapted, preserving their autonomy and authority through extensive involvement in the formation of commercial law. Leveraging their claims to unmatched expertise, they operated free from government interference while simultaneously embedding themselves into the nation's institutional fabric. By the early nineteenth century, insurers were no longer just risk assessors. They were nation builders and market makers. Deeply and imaginatively researched, *Underwriters of the United States* uses marine insurers to reveal a startlingly original story of risk, money, and power in the founding era.

Never Stop Learning Bradley R. Staats, 2018-05-15 Keep learning, or risk becoming irrelevant. It's a truism in today's economy: the only constant is change. Technological automation is making jobs less routine and more cognitively challenging. Globalization means you're competing with workers around the world.

Simultaneously, the internet and other communication technologies have radically increased the potential impact of individual knowledge. The relentless dynamism of these forces shaping our lives has created a new imperative: we must strive to become dynamic learners. In every industry and sector, dynamic learners outperform their peers and realize higher impact and fulfillment by learning continuously and by leveraging that learning to build yet more knowledge. In *Never Stop Learning*, behavioral scientist and operations expert Bradley R. Staats describes the principles and practices that comprise dynamic learning and outlines a framework to help you become more effective as a lifelong learner. The steps include: Valuing failure Focusing on process, not outcome, and on questions, not answers Making time for reflection Learning to be true to yourself by playing to your strengths Pairing specialization with variety Treating others as learning partners Replete with the most recent research about how we learn as well as engaging stories that show how real learning happens, *Never Stop Learning* will become the operating manual for leaders, managers, and anyone who wants to keep thriving in the new world of work.

Cool Town Grace Elizabeth Hale, 2020-02-13 In the summer of 1978, the B-52's conquered the New York underground. A year later, the band's self-titled debut album burst onto the Billboard charts, capturing the imagination of fans and music critics worldwide. The fact that the group had formed in the sleepy southern college town of Athens, Georgia, only increased the fascination. Soon, more Athens bands followed the B-52's into the vanguard of the new American music that would come to be known as alternative, including R.E.M., who catapulted over the course of the 1980s to the top of the musical mainstream. As acts like the B-52's, R.E.M., and Pylon drew the eyes of New York tastemakers southward, they discovered in Athens an unexpected mecca of music, experimental art, DIY spirit, and progressive politics--a creative underground as vibrant as any to be found in the country's major cities. In Athens in the eighties, if you were young and willing to live without much money, anything seemed possible. *Cool Town* reveals the passion, vitality, and enduring significance of a bohemian scene that became a model for others to follow. Grace Elizabeth Hale experienced the Athens scene as a student, small-business owner, and band member. Blending personal recollection with a historian's eye, she reconstructs the networks of bands, artists, and friends that drew on the things at hand to make a new art of the possible, transforming American culture along the way. In a story full of music and brimming with hope, Hale shows how an unlikely cast of characters in an unlikely place made a surprising and beautiful new world.

From Dissertation to Book William Germano, 2014-02-27 How to transform a thesis into a publishable work that can engage audiences beyond the academic committee. When a dissertation crosses my desk, I usually want to grab it by its metaphorical lapels and give it a good shake. "You know something!" I would say if it could hear me. "Now tell it to us in language we can understand!" Since its publication in 2005, *From Dissertation to Book* has helped thousands of young academic authors get their books beyond the thesis committee and into the hands of interested publishers and general readers. Now revised and updated to reflect the evolution of scholarly publishing, this edition includes a new chapter arguing that the future of academic writing is in the hands of young scholars who must create work that meets the broader expectations of readers rather than the narrow requirements of academic committees. At the heart of *From Dissertation to Book* is the idea that revising the dissertation is fundamentally a process of shifting its focus from the concerns of a narrow audience—a committee or advisors—to those of a broader scholarly audience that wants writing to be both informative and engaging. William Germano offers clear guidance on how to do this, with advice on such topics as rethinking the table of contents, taming runaway footnotes, shaping chapter length, and confronting the limitations of jargon, alongside helpful timetables for light or heavy revision. Germano draws on his years of experience in both academia and publishing to show writers how to turn a dissertation into a book that an audience will actually enjoy, whether reading on a page or a screen. He also acknowledges that not all dissertations can or even should become books and explores other, often overlooked, options, such as turning them into journal articles or chapters in an edited work. With clear directions, engaging examples, and an eye for the idiosyncrasies of academic writing, he reveals to recent PhDs the secrets of careful and thoughtful revision—a skill that will be truly invaluable as they add "author" to their curriculum vitae.

Aaron McDuffie Moore Blake Hill-Saya, 2020-03-02 Aaron McDuffie Moore (1863-1923) was born in rural Columbus County in eastern North Carolina at the close of the Civil War. Defying the odds stacked against an African American of this era, he pursued an education, alternating between work on the family farm and attending school. Moore originally dreamed of becoming an educator and attended notable teacher training schools in the state. But later, while at Shaw University, he followed another passion and entered Leonard Medical School. Dr. Moore graduated with honors in 1888 and became the first practicing African American physician in the city of Durham, North Carolina. He went on to establish the Durham Drug Company and the Durham Colored Library; spearhead and run Lincoln Hospital, the city's first secular, freestanding African American hospital; cofound North Carolina Mutual Life Insurance Company; help launch Rosenwald schools for African American children statewide; and foster the development of Durham's Hayti community. Dr. Moore was one-third of the mighty Triumvirate alongside John Merrick and C. C. Spaulding, credited with establishing Durham as the capital of the African American middle class in the late nineteenth and early twentieth centuries and founding Durham's famed Black Wall Street. His legacy can still be seen on the city streets and country backroads today, and an examination of his life provides key insights into the history of Durham, the state, and the nation during Reconstruction and the beginning of the Jim Crow Era.

The Faces of Poverty in North Carolina Gene R. Nichol, 2021-11-01 More than 1.5 million North Carolinians today live in poverty. More than one in five are children. Behind these sobering statistics are the faces of our fellow citizens. This book tells their stories. Since 2012, Gene R. Nichol has traveled the length of North

Carolina, conducting hundreds of interviews with poor people and those working to alleviate the worst of their circumstances. In an afterword to this new edition, Nichol draws on fresh data and interviews with those whose voices challenge all of us to see what is too often invisible, to look past partisan divides and preconceived notions, and to seek change. Only with a full commitment as a society, Nichol argues, will we succeed in truly ending poverty, which he calls our greatest challenge.
