Northern Arizona University Lee C. Drickamer, Peter J. Runge, 2011 Any university is composed of faculty, students, and staff. But these living components change over time and in varying degrees, while the campus buildings are more permanent, remaining for decades, a century, or longer. This book looks at the buildings that have graced the campus of Northern Arizona University from its opening in 1898 to the present. The school began with a single building, Old Main, and it was joined by five other structures prior to World War I. In the following decades the campus remained relatively small, expanding to approximately twenty-five structures by the late 1950s. During the tenure of President J. Lawrence Walkup (1957-1979), the university effectively doubled in size, spreading southward and adding more than forty buildings, including an entire south campus academic center. Since 1979 the campus has witnessed the addition of more than thirty structures, most as infill within the existing campus layout. Arranged chronologically, this extensively illustrated volume briefly describes the history of every building that has been a part of the university's physical layout. The authors describe various structural aspects of each building and provide entertaining and informative anecdotes about events and people associated with the structures. By combing the university's archives, Drickamer and Runge have turned up photographs of each building as it looked shortly after construction and at present, providing a fascinating visual time lapse. With more than two hundred images of campus buildings, many of them never before published, *Northern Arizona University: Buildings as History* provides a wonderful pictorial chronicle of the campus that will interest architectural historians as well as all those who have called NAU

home.

The American Jewish Philanthropic Complex Lila Corwin Berman, 2022-08-30 The first comprehensive history of American Jewish philanthropy and its influence on democracy and capitalism. For years, American Jewish philanthropy has been celebrated as the proudest product of Jewish endeavors in the United States, its virtues extending from the local to the global, the Jewish to the non-Jewish, and modest donations to vast endowments. Yet, as Lila Corwin Berman illuminates in *The American Jewish Philanthropic Complex*, the history of American Jewish philanthropy reveals the far more complicated reality of changing and uneasy relationships among philanthropy, democracy, and capitalism. With a fresh eye and lucid prose, and relying on previously untapped sources, Berman shows that from its nineteenth-century roots to its apex in the late twentieth century, the American Jewish philanthropic complex tied Jewish institutions to the American state. The government's regulatory efforts—most importantly, tax policies—situated philanthropy at the core of its experiments to maintain the public good without trammeling on the private freedoms of individuals. Jewish philanthropic institutions and leaders gained financial strength, political influence, and state protections within this framework. However, over time, the vast inequalities in resource distribution that marked American state policy became inseparable from philanthropic practice. By the turn of the millennium, Jewish philanthropic institutions reflected the state's growing investment in capitalism against democratic interests. But well before that, Jewish philanthropy had already entered into a tight relationship with the governing forces of American life, reinforcing and even transforming the nation's laws and policies. *The American Jewish Philanthropic Complex* uncovers

how capitalism and private interests came to command authority over the public good, in Jewish life and beyond.

The I-35W Bridge Collapse Kimberly J. Brown, 2018-07 “A bridge shouldn’t just fall down,” Senator Amy Klobuchar said after the August 1, 2007, collapse of the Minneapolis I-35W eight-lane steel truss bridge, which killed 13 motorists, injured 145, and left a collective wound on the city’s psyche and infrastructure. On her way to a soccer game with a fellow teammate, Kimberly J. Brown experienced the collapse firsthand, falling 114 feet in her teammate’s car to the Mississippi River. Although terrified, injured, and in shock, she survived. In this sobering memoir and exposé, Brown recounts her harrowing experience. In the aftermath of the disaster, Brown became both an advocate for survivors and an unofficial whistle-blower about decaying infrastructure. She details her investigation and correspondence with Thornton Tomasetti engineers, including the false official account of the collapse and the eventual revelation of its real causes. In addition, she chronicles the ongoing decay of America’s bridges and the continuing challenges faced by leaders to address infrastructure problems across the country. After nearly a decade of research into the collapse and her active and ongoing recovery from psychic and physical injuries, Brown shares her experience and answers the questions we should all be asking: Why did this bridge collapse? And what could have been done to prevent this tragedy?

A Shot of Jack Daniels Jack Kyle Daniels,2009 Under any description of the start of my life, the odds were against me. With the untimely death of my mother at age 31 in September and the suicide of my father on the following Christmas Day, I was orphaned at the age of two along with six siblings. Through the efforts of a Methodist pastor, we were placed in the Methodist Orphans Home in Waco, Texas on January 21, 1937. This is the story of my life and how I was able to overcome those gigantic odds. Who would believe that the two-year-old orphan boy would later serve for the last twenty-five years of his career as the President/CEO of the agency that rescued him and his six siblings?
